EDITORIAL NOTE

This handbook has been brought up-to-date at the time of going to press, but like other books in the same series it does not attempt to describe the last phases of the changing military situation. Its object is rather to provide an accurate background by showing the constant factors in the life of the Greeks, the traditions and ideas which are in their minds, and the known consequences of the enemy occupation from which they have suffered. We are greatly indebted to members of the Greek Department of Information for contributions of fact, and to British officials for reading the typescript and suggesting improvements. The appendix is contributed by a British subject who has had long experience of work with the Greek Red Cross.

JOHN EPPSTEIN

September 1944
