INDEX.

Active leucocytosis 142
Acute lymphatic leukaemia 170
— — marrow in 118
Acute swelling of red corpuscles 23
Administration of iron 16
Agony leucocytosis 146
Alexines 139
Alkali distribution in blood 47
— test for in blood 46
Anaemia 1
— bothriocephalus 65
— definition 2
— haemoglobin in 49
— iron in blood and organs in 16
— isotonic point of corpuscles in 25
— leukopenia in 189
— pernicious see Pernicious anemia
— platelets in 193
— posthaemorrhagic 49, 51
— — erythroblasts in 51
— — platelets in 193
— pseudo-leukaemia infantum 77

Anaemia, pulse in 3
— retinal vessels in 3
— specific gravity of blood in 18
— volume of corpuscles in 23

Anæmic degeneration of corpuscles 49-52
— leucocytosis 146
Arsenurietted hydrogen, leucocty-
tosis from 145

Asthma
— eosinophilia in 150, 158
— sputum in 157
— suppuration in 160
Atypical leucocytes 77-80
— — in leukaemia 179

Basic double staining 38
Baths, leucocytosis from 144
Blasts, theory of 128
Birds, eosinophil cells of 107, 130
Blood, quantity of 2
— — — in anæmias 3
— specific gravity of 17
Blood corpuscles, enumeration of 5, 6
— — enumeration of in anæmia 12

© in this web service Cambridge University Press

www.cambridge.org
INDEX.

Blood corpuscles, estimation of 12
— — red see Red blood corpuscles
— — volume of 13
— — count, factors in 11
— crises 62
— dust 193
— platelets 190
— — alkali in 47
— — in chlorosis 193
— — origin of 192
— — poisons, leucocytosis from 145

Bone-marrow 105, 112
— — carcinoma of 178
— — cells of, in various animals 106
— — changes in anæmia 117
— — changes in lymphatic leukaemia 118
— — changes in pernicious anæmia 117, 129
— — connection with leucocytosis 155
— — connection with leucopenia 189
— — development of leucocytes in 108–110
— — giant cells in 107
— — of dog 114
— — protective organ 111
— — tumours of 115

Cachectic leucocytosis 146
Camphor, eosinophilia from administration of 154
Catarhral jaundice, volume of corpuscles in 23
Charcot’s crystals 151
Chemiotaxis 139

Chemiotaxis, positive 139
— — negative 140
Chenzinsky’s fluid 43
Chloroform narcosis, leucocytosis from 145
Chlorosis, platelets in 193
Coagulation, rate of 23
— — connection with platelets 192, 193
— — in purpura 193
Coagulometer 23
Compensatory eosinophilia 154
Congenital syphilis, leucocytosis in 147

Corpuscles, at high altitudes 8
— — enumeration of 5
— — influences on 7
— — red see Red corpuscles
— — volume of 21
— — white see Leucocytes
Crisis, blood 62
— — in infective fevers 145

Diabetes, glycogen in blood in 75
Differential count of corpuscles 31
— — staining, theory of 37
Digestion, leucocytosis of 102
Diphtheria, myelocytes in 78, 146
Dog, bone-marrow in 114
Dry preparations 32
— — substance of blood 20
Dühring’s disease, eosinophilia in 156

Electricity, resistance to, of corpuscles 25
Enumeration of corpuscles 5, 31
— — in anæmia 12
Eosine-methylene blue methods 43
Eosinophil cells 78, 185
INDEX.

Eosinophil cells after splenectomy 89, 94
— — development of 109
— — in birds 130
— — in leukemia 176, 177
— — in malignant lymphoma 163
— — in mammary glands 163
— — origin of 160, 161
— — secretion in 134
— leucocytosis 148
— — causes of 165
— — distinction from leukemia 178
— — occurrence 150–154, 158
— — origin of 154
— myelocytes 78
— — in leukemia 174

Erythroblasts, in leukemia 180
— in spleen 99
— nuclei of 57, 61
— origin of 55
— varieties of 55, 56

Exercise, leucocytosis from 144

Ferrometer 16

Fevers, complication of leukemia 177, 181
— leucocytosis in 144, 146
— spleen in 98

Fixation of films 34

Formalin as fixative 35

Giant cells in bone-marrow 107

Gigantoblasts 56

Glycogen in gonorrheal pus 46
— in platelets 192

Glycogen in polynuclear leucocytes 75
— stain for 45

Gonorrheal pus, glycogen in 46
— — mast cells in 160

Granulation, absence of 118, 129, 182
— — chemical nature of 134
— — ripening of 108

Granules 121
— — connection with emigration 132
— — distribution of 130
— — function of 127
— — history of 121–130
— — intravital staining of 124
— — intravital staining of by neutral red 125
— — reaction of 126
— — secretory nature of 134
— — specificity of 133
— — survival staining of 125

Guinea-pig, leucocytes in 85, 112

Hämatocrit 21

Hämatocytometer 4

Hämatoxylin-eosine mixture 42

Hämocoin 193

Hämoglobin, amount of 13
— — connection with specific gravity 18
— — equivalent in anemias 49
— estimation of 14–17

Hämoglobinometer 15

Hämorrhages, acute 51

Hämorrhagic small-pox, pseudolymphocytes in 79

Hayem’s solution 5

Heat as fixative agent 34
INDEX.

Hedgehog, splenectomy in 107
Helmintiasis, eosinophilia in 150
High altitudes, erythrocytes at 8–12
    — poikilocytosis at 9
Hodgkin’s disease (malignant lymphoma) 101, 102
    — eosinophil cells in 165
Hyaline cells see Large mononuclear leucocytes
Hydrodynamometry 20

Infectious diseases, leucocytosis in 146, 147
    — myelocytes in 77
    — splenic enlargement in 99
Intestinal diseases, leucocytosis in 102
Intravital staining 124
Iron, administration of 16
    — connection of, with hemo-
        globin 16–18
    — in blood 16
    — in eosinophil cells 134
Isotonic point of corpuscles 25

Jenner’s stain 44
Kresyl-violet-R, metachromatism with 76
Kurloff’s researches 85
Leucocytosis, eosinophil cells in 163
    — mast cells in 163
Large mononuclear leucocytes 73, 112, 185
    — mononuclear leucocytes in
        measles 113
Leucocytes 71
    — atypical forms 77, 179
    — enumeration of 5
    — in birds 131
    — in guinea-pig 85–87, 112
    — places of origin 81
Leucocytosis 138
    — active 142
    — agony 146
    — cachectic 146
    — chemically produced 189
    — classification of 142
    — diagnostic importance of 146
    — eosinophil see Eosino-
        phil leucocytosis
    — function of bone-marrow 110
    — in anaemia 146; congenital syphilis 147;
        measles 113, 145, 189; parotitis 144;
        pneumonia 144, 174; rheumatism 144;
        tumours of bone-marrow 116; typhoid
        146, 189
    — mixed 143, 167
    — of digestion 102
    — origin of 146
    — passive 142
    — physiological 144
    — polynuclear neutrophil 145
    — theories of 138
Leukæmia, acute lymphatic 118, 170; chronic 170;
    suppuration in 105
    — myelogenic 169
    — atypical cases 182
INDEX.

Leukæmia, myelogenic, atypical leukocytes in 179
— — characteristics of 174–181
— — complicated with other diseases 174, 181
— — contrasted with eosinophilia 178
— — contrasted with pneumonia 174
— — diagnosis from blood 171
— — eosinophilia in 176
— — mast cells in 179
— — mitoses in 180
— — mononuclear eosinophils in 175
— — myelocytes in 174
— — origin of blood condition 183, 187
— — pleuritic exudation in 186
— — polymuclear myelocytes in 175
Leukopenia 188–190
— — experimental 140
— — in various diseases 189
Liver, granules in 127
Lymphæmia see Lymphocytosis
Lymphatic glands 100
— — myelocytes in 110
Lymphocytes 71
— — in disease of lymphatic glands 101; lymphatic tumours 101; polymuclear leucocytosis 143
Lymphocytosis 101, 103, 144
— — after splenectomy 90, 94

Lymphocytosis, causes of 101–103
— — in leukæmia 170
— — origin of 104
Lymphoma malignum (Hodgkin's disease) 101, 102
Malignant tumours, eosinophilia from 153
Mast cells 76, 160
— — halo round 135
— — in gonorrhœa 162; leukæmia 179; purpura (horse) 136
— — in skin 160
— — origin of 162
— — secretion in 135
Measles, leukopenia in 145, 189
Medicinal eosinophilia 154
Megaloblasts 56–62
— — in bothriocephalus anæmia 65; leukæmia 180; pernicious anæmia 62, 66; tumours of bone-marrow 117
Megalocytes 64
Metachromatism in mast cells 76
Methylal method 44
Microblasts 57
Mitoses in leukemic blood 180
Mononuclear leukocytes 73, 112, 116
— — origin of 113
— — power of motion 185
Mouse, polymuclear cells in 131
— — spleen in 99
Myelæmia, origin of 183, 187
Myelocytes 77, 110
— — importance in blood 110; in diphtheria 78
— — in anæmia pseudo-leuk-

INDEX.

Potassium chloride, leucocytosis from 155
Pregnancy, leucocytosis in 144
Pseudo-eosinophils cells 85, 133
— — — secretion in 137
Pseudo-lymphocytes 79
Purpura, of horse, mast cells in 136
— platelets in 193
Pyknosis 61
Pyrobin, leucoysis from 145
Quadratic ocular diaphragm 31
Quantity of blood, estimation of 2
Red corpuscles 48
— — acute swelling of 21
— — at high altitudes 8–12
— — connection with spleen 99
— — in anemia 49–57
— — isotonic point of 25
— — nucleated see Erythroblasts
— — number of, in health 7
— — number of differences in age 7; in sex 7; 9 food 7; from vasomotor influences 11
— — polychromatophil degeneration in 49
— — size of 12
— — volume of 21
Retinal vessels in anemia 3
Rheumatic fever, leucocytosis in 152
Scarlet fever, leucocytosis in 146
— — lymphatic glands in 110
Separation of serum 24
Serum, specific gravity of 20
Sex, influence on red corpuscles 7
— — — specific gravity of blood 17
Shock, effect of, on specific gravity of blood 18
Size of red corpuscles 12
Skin diseases, eosinophilia in 150
Small-celled infiltration 105
Specific gravity of blood 17
— — — connection with hemoglobin 18
— — — in anemias 18
— — — influences acting on 18
— — — of serum 20
Spleen 84
— as blood forming organ 84, 99
— enlargement of, in fevers and phosphorus poisoning 98
— excision of see Splenectomy
— functions of 98
— in guinea-pig 91, 93, 99
— tumours of 97, 98
Splenectomy, effect of on blood
— in hedgehog 107; in guinea-pig 88; in man 93, 95, 96, 113
Staining, theory of 36
— vital 124
Stimulation forms of leucocytes 79
Stroma of corpuscles, influence on specific gravity of blood 19
Suppuration in lymphatic leukaemia 104; in myelogenic 177; in pemphigus 157
Survival staining 125
INDEX.

Thyroid, changes after splenectomy 84
Time of life, influence of, on corpuscles 7
Toxic leucoytosis 145
Transitional forms of leucocytes 74, 113
Triacid stain 42, 131
Trichinosis, eosinophilia in 152
Tropies, influence of, on red corpuscles 12
Tuberculin injections, eosinophilia from 152
— — lymphocytosis in 103

Tumours of bone-marrow 115
Typhoid fever, leukopenia in 146, 189
Urticaria, eosinophilia in 150
Vital staining 124
Volume of corpuscles 21
White blood corpuscles see Leucocytes
Whooping cough, lymphocytosis in 103
Worms see Helminthiasis
Wright’s coagulometer 23
