- Akerlof, George, 9, 126
- algorithmic trading, 163
- all-equity financed firm, 72, 73
- American option, 108, 110
- American puts, 110–111
- Annual Percentage Rate (APR), 35
- Apple company, 16, 19
- arbitrage portfolios, 158
- Arbitrage Pricing Theory (APT), 161
- asymmetric information
 - agency problems, 131–133
 - conclusion, 176–177
 - corporate governance, 143–149
 - introduction, 9, 126
 - “lemons” problem, 126–131, 133
 - NPV and, 39
 - screening models, 140–143
 - signaling models, 133–140
- bankruptcy, 76, 89
- Berkshire Hathaway, 153, 160
- binomial model, 112*f*, 116*f*, 118*f*, 112–121
- Black, Fischer, 9, 100
- Black-Scholes Model, 121–122
- bondholders
 - bankruptcy and, 90
 - increased risk, 82
 - overview, 15, 18
 - present value payments by, 74
- book value of assets, 90
- borrowing rates, 39, 39*f*
- boundary conditions, 121–122
- brutal competition, 155
- Buffet, Warren, 153, 160, 165, 166
- business example in signaling models, 140
- business school example, asymmetric information, 134–135
- buying used car, asymmetric information example, 126–131
- call option, 107, 108–109, 115
- Cambridge Shakespeare Festival, 98
- Cameron, James, 163
- capital asset pricing model (CAPM)
 - conclusion, 175–176
 - deriving a version of, 64*f*, 64–68, 66*f*
 - discount rate, 32–33
 - increased risk to, 80, 177
 - introduction, 7
 - issuing debt, 88
 - market efficiency, 161, 171
 - overview, 10, 32–33
- capital gains, 36–37
- capital markets, 71, 78*t*, 79*t*, 80*t*, 80–83
- capital structure theory
 - conclusion, 176
 - corporate taxes and, 83–89
 - in efficient capital markets, 71–83, 78*t*, 79*t*, 80*t*
 - introduction, 7–8, 70
 - leverage, impact on discount rate, 70–71
 - pecking-order hypothesis, 93–96
 - trade-off hypothesis, 89–93, 90*t*, 93*f*
- capital types
 - financial capital, 15
 - human capital, 15
 - intellectual capital, 15–16
- cash-flow rights, 148
- cash flows, 33–34, 36, 42–43
- Center for Research in Security Prices (CRSP), 47
- charting (technical analysis), 152, 163
- co-variance, 55–57, 65–66, 67
- coin toss game, 165
- commercial banks, 3
- competition and corporate governance, 144
- competitor incentives, 14

180 Index

- concentration of ownership, 148
- corporate borrowing rate, 73
