## Contents

<i>Preface</i>	page vii
<b>1 Ramsey classes: examples and constructions</b> <i>Manuel Bodirsky</i>	1
<b>2 Recent developments in graph Ramsey theory</b> <i>David Conlon, Jacob Fox and Benny Sudakov</i>	49
<b>3 Controllability and matchings in random bipartite graphs</b> <i>Paul Balister and Stefanie Gerke</i>	119
<b>4 Some old and new problems in combinatorial geometry</b> <b>I: around Borsuk's problem</b> <i>Gil Kalai</i>	147
<b>5 Randomly generated groups</b> <i>Tomasz Łuczak</i>	175
<b>6 Curves over finite fields and linear recurring sequences</b> <i>Omran Ahmadi and Gary McGuire</i>	195
<b>7 New tools and results in graph minor structure theory</b> <i>Sergey Norin</i>	221
<b>8 Well quasi-order in combinatorics: embeddings and homomorphisms</b> <i>Sophie Huczynska and Nik Ruškuc</i>	261
<b>9 Constructions of block codes from algebraic curves over finite fields</b> <i>Liming Ma and Chaoping Xing</i>	295
