CAMBRIDGE
UNIVERSITY PRESS

University Printing House, Cambridge CB2 8BS, United Kingdom

Cambridge University Press is part of the University of Cambridge.

It furthers the University's mission by disseminating knowledge in the pursuit of education, learning and research at the highest international levels of excellence.

C O N T E N T S

<i>Preface</i>	<i>page vii</i>
<i>Introduction</i>	ix
1. The fundamental notation	1
2. The equation of the Burkhardt primal	4
3. Similarity, or equal standing, of the forty-five nodes, and of the twenty-seven pentahedra	5
4. The Jacobian planes of the primal	7
5. The κ -lines of the primal	10
6. The Burkhardt primal is rational	20
7. The particular character of the forty-five nodes, and the linear transformation of the primal into itself by projection from the nodes	21
8. The forty Steiner threefold spaces, or primes, belonging to the primal	26
9. The plane common to two Steiner solids	29
10. The enumeration of the twenty-seven Jordan pentahedra, and of the forty-five nodes, from the nodes in pairs of polar κ -lines	34
11. The reason for calling the Steiner tetrahedra by this name	35
12. The enumeration of the twenty-seven pentahedra from nine nodes of the Burkhardt primal	37
13. The equation of the Burkhardt primal in terms of a Steiner solid and four associated primes	38
14. Explicit formulae for the rationalization of the Burkhardt primal	43
15. The equation of the Burkhardt primal referred to the prime faces of a Jordan pentahedron	48
16. The thirty-six double sixes of Jordan pentahedra, and the associated quadrics	52
17. The linear transformations of the Burkhardt primal into itself	61

vi

CONTENTS

18. Five subgroups of the group of $2^3 \cdot 3^4 \cdot 40$ transformations	64
19. The expression of the fundamental transformations B, C, D, S as transformations of x_1, \dots, x_6 . The expression of B, C, D, S in terms of nodal projections	74
20. The application of the substitutions of x_1, \dots, x_6 to the twelve pentahedra $\{A\}, \{B\}, \dots, \{F_0\}$	82
21. The transformation of the family $\{A\}$ by means of Burkhardt's transformations	92
22. Derivation of the Burkhardt primal from a quadric	94
<i>Appendix, Note 1.</i> The generation of desmic systems of tetrahedra in ordinary space	99
<i>Appendix, Note 2.</i> On the group of substitutions of the lines of a cubic surface in ordinary space	102
<i>Index of notations</i>	107
