

## INDEX OF NOTATIONS

(The references are to the sections)

- Asymptotic cone at a node, 4
- Cauchy, subgroups of substitutions of six objects, 20
- Cross-plane, common to two Steiner solids, 9
- Double sixes of pentahedra, 16
- Duad, 1
- Jacobian planes of the primal, 4
- Jordan pentahedra, 1
- Jordan primes, 1
- $\kappa$ -lines of the primal, 5
- Polar  $\kappa$ -lines, 5
- Polar prime of a node, 1
- Projection of the primal into itself from a node, 7
- Quadric, derivation of the primal from, 22
- Quadrics associated with the double sixes, 16
- Rational, the primal is rational, 6
- Similarity of the nodes and pentahedra, 3
- Skew pentahedra; any two are mutually inscribed, 5
- Steiner solids, and tetrahedra, 8
- Syntheme, 1
