PREFACE	v
CHAP.	
I. ELEMENTARY THEORY	
§§ 1-4. Pure Geometry	1
§§ 5, 6. Refraction at a single spherical surface	5
§ 7. Various formulae	8
§§ 8, 9. The general system—the <i>K</i> -formulae	9
§ 10. The <i>J</i> -formulae	11
§ 11. The 'modified' notation	12
§ 12. The addition of systems	13
§ 13. The aperture stop and the field stop	14
§ 14. Aplanatism	15
References	16
II. THE CHARACTERISTIC FUNCTION AND THE EIKONAL	
§§ 1-3. The reduced path and its properties	16
§ 4. The Characteristic Function	19
§§ 5-7. The Eikonal	20
§ 8. The Aberration Function	23
§ 9. Axial aberration for the pupil planes	24
§§ 10, 11. The Characteristic Function; the Aberration Function	26
§ 12. Elementary properties	28
References	29
III. THE GEOMETRICAL ABERRATIONS	
§ 1. General properties	30
§ 2. Change of focus	30
§ 3. The primary displacement	31
§ 4. Spherical Aberration	32
§ 5. Coma	33
§ 6. Astigmatism and Curvature of the Field	34
§ 7. Distortion	36
§§ 8-12. Aberrations of higher orders	37
§ 13. The third order aberrations	42
§ 14. The combination of aberrations	45
§ 15. Change of focus	46
§ 16. Some general remarks	47
References	49

viii

CONTENTS

CHAP.		PAGE
IV.	THE SINE-CONDITION AND THE OPTICAL COSINE LAW	
	§§ 1, 2. The Sine-Condition	49
	§ 3. The Cosine-Conditions	52
	§ 4. Herschel's Condition	52
	§ 5. Geometrical proof of the Sine-Condition	55
	§§ 6-8. The Optical Cosine Law	57
	References	61
V.	THE COMPUTATION OF OPTICAL SYSTEMS	
	§§ 1, 2. The Focal Eikonal for a single spherical surface	61
	§ 3. The aberration coefficients	63
	§ 4. The equation for the addition of aberrations	64
	§§ 5, 6. Addition of aberration coefficients	65
	§ 7. Formulae for aberration coefficients	68
	§ 8. Aberrations at the principal foci	70
	§ 9. Thin systems	71
	References	71
VI.	DIFFRACTION PATTERNS ASSOCIATED WITH THE SYMMETRICAL OPTICAL SYSTEM	
	§§ 1-4. General formulae	72
	§ 5. The Airy disc	75
	§ 6. Change of focus and spherical aberration	77
	§ 7. The axial intensity	78
	§§ 8, 9. Comatic patterns	80
	§§ 10-12. Curvature of the field and astigmatism	83
	§ 13. Distortion	87
	References	88
VII.	VARIOUS FORMS OF APERTURE	
	§§ 1-5. The Annular Aperture	88
	§§ 6-9. The Slit Aperture	94
	§§ 10-14. The Semi-circular Aperture	99
	References	102
