

## INDEX

- Adjuvants added to canned foods 6
- Anaerobes in canned foods 42, 43, 49, 50
- Animal parasites and canned foods 89
- Anti-scorbutic vitamin in canned foods 97
- B. botulinus* 73, 77, 78, 105
- B. cloacae* 45, 52
- B. coli* 45, 52, 53
- B. pleofructi* 53
- B. proteus* 45, 52
- B. tuberculosis* and condensed milk 85
- Bacteria  
and spoilage 55  
characters in relation to spoilage 45  
isolated from sound canned foods 42
- Bacteriological examination of canned foods 132
- Bacteriology of canned foods 39, 55, 105
- Botulism and canned foods 73, 74
- British canned food industry 12
- Canned foods :  
amounts condemned 35  
animal parasites in 89  
bacteriology of 39  
changes after canning 57  
chemical contamination of 90  
chemical detection of unsound contents 87  
chemical standards 33  
cost relative to fresh foods 102  
dating of 30  
decomposed contents and health 86  
development in Great Britain 12  
disease causation from 62  
food poisoning from 63, 70  
growth and extent of the industry 7  
historical development 1  
importance of raw material 4
- Canned foods (*continued*):  
imports and exports 8, 9, 10  
labelling of 29  
manufactures in Great Britain 11  
principles involved 4  
processing of 6, 103  
reliability of examination methods 27  
sterility of 40  
supervision after distribution 25  
supervision exercised 14, 26  
supervision exercised by the trade 18  
supervision exercised at ports of entry 21  
supervision exercised in U.S.A. 16  
types of can 6, 119, 125  
wastage 34
- Canned fruit and *B. botulinus* 73, 79, 81
- Canners' Associations 18, 20
- Changes in contents after canning 57
- Chemical contamination of canned foods 90
- Chemical examination of canned foods 128
- Condensed milk, changes with time 58
- Condensed milk Regulations 33
- Condensed milk, survival of *B. tuberculosis* 85
- Condensed milk varieties 33
- Containers, types used 6, 119, 125
- Dating of canned foods 30
- Fat-soluble A vitamin in canned foods 94
- Fish and decomposition changes 87
- Food and Drugs Act 1906 U.S.A. 16
- Food poisoning outbreaks and canned foods 63, 70, 73, 74, 101
- Food poisoning outbreaks, seasonal prevalence 67

- Gases in canned foods 128, 131  
 Growth and extent of canning industry 7
- Herrings, canned, changes with time 61  
 Historical development of canned food industry 1
- Labelling of canned foods 29  
 Laboratory control over inspectors' examinations 27  
 Laboratory methods of examination 118, 133  
 Leaks in tins 121  
 Loch Maree outbreak 77, 83
- Maine Sardine industry 18  
 Marine products—changes with time 59  
 Maturation changes 31, 59  
 Meat Inspection Act 1906 U.S.A. 17  
 Micrococci in canned foods 42, 43, 48
- National Canners Association 18  
 Non-sporing bacilli in canned foods 42, 43, 51, 52
- Preservatives in canned foods 90, 132  
 Processing 6, 56, 103  
 Ptomaines and canned foods 65, 88  
 Putrefactive food and health injury 86, 89
- Repainting canned foods 32
- Salmonella group bacilli in canned foods 66, 68, 101
- Salmonella group toxins in canned foods 66, 68, 101  
 Sardines, changes with time 60  
 Soil infected with *B. botulinus* 78  
 Spoilage prevention 55, 101  
 Spores, factors affecting survival in canned foods 107  
 Sporing aerobes in canned foods 42, 43, 50  
 Standards for canned foods 32  
 Sterility of canned foods 40  
 Storage changes 60  
 Streptococci in condensed milk 86  
 Supervision of canned foods:  
   after distribution 25  
   after rejection 37  
   at ports of entry 21  
   at source 15  
   by the trade 18  
   general 14, 26  
   in U.S.A. 16
- Thermophils in canned foods 42, 43, 54, 107  
 Tin in canned foods 31, 90, 128
- Unsound Food Regulations 1908 21  
 Utilization of rejected tins 36
- Vacuum in canned food tins 120  
 Vitamins in canned foods 63, 93
- War, influence on canning industry 1  
 Wastage of canned foods 34  
 Water-soluble B vitamin in canned foods 96
- Yeasts in canned foods 42, 43, 46
