

## CONTENTS

	PAGE
<b>LECTURE I</b>	
SHORT HISTORICAL ACCOUNT OF THE CANNING INDUSTRY—PRINCIPLES INVOLVED IN THE METHODS OF MANUFACTURE—GROWTH AND EXTENT OF THE INDUSTRY—SUPERVISION EXERCISED OVER CANNED FOODS—THE VALUE AND LIMITATIONS OF THE CONTROL EXERCISED—CERTAIN SPECIAL POINTS RELATING TO INFORMATION ON THE TINS—WASTAGE OF CANNED FOODS AND UTILIZATION OF REJECTED TINS . . . . .	1
<b>LECTURE II</b>	
THE BACTERIOLOGY OF CANNED FOODS—SUMMARY OF BACTERIOLOGY OF CANNED FOODS IN RELATION TO SPOILAGE—CHANGES WHICH OCCUR IN SOUND FOOD AFTER CANNING . . . . .	39
<b>LECTURE III</b>	
DIRECT RELATIONSHIP TO DISEASE CONDITIONS—FOOD POISONING OUTBREAKS DUE TO CANNED FOODS, APART FROM BOTULISM—BOTULISM—INFECTION FROM OTHER SPECIFIC BACTERIA—DANGER TO HEALTH FROM CANNED FOODS WHICH SHOW SIGNS OF DECOMPOSITION—ANIMAL PARASITES—CHEMICAL CONTAMINATION—VITAMINS AND CANNED FOODS—GENERAL CONCLUSIONS . . . . .	62
<b>APPENDIX I</b>	
NOTES ON THE PRINCIPLES INVOLVED IN THE PROCESSING OF CANNED FOODS . . . . .	103
<b>APPENDIX II</b>	
REPORT UPON LABORATORY METHODS FOR THE EXAMINATION OF CANNED FOODS—PROCEDURE SUGGESTED FOR EXAMINATION OF CANNED FOODS IN THE LABORATORY . . . . .	118
SELECTED BIBLIOGRAPHY . . . . .	137
INDEX . . . . .	145
