

THE ENGLISH PHRASAL VERB,
1650–PRESENT

Providing a detailed and comprehensive account of the development of phrasal verbs from Early Modern to present-day English, this study covers almost 400 years in the history of English, and provides both a diachronic and synchronic account based on over 12,000 examples extracted from stratified electronic corpora. The corpus analysis provides evidence of how registers can inform us about the history of English, as it traces and compares the usage and stylistic drifts of phrasal verbs across ten different genres – drama, fiction, journals, diaries, letters, medicine, news, science, sermons, and trial proceedings. The study also sheds new light on the morphosyntactic and semantic features of phrasal verbs, proposing a new approach to the category, considering not only their grammatical features, but also their historical development, by discussing the category in terms of a number of central mechanisms of language change.

PAULA RODRÍGUEZ-PUENTE is PhD Lecturer of English Language and Linguistics at the University of Oviedo, Spain. She has published widely in international journals such as *English Studies*, *English Language and Linguistics*, and *Folia Linguistica Historica* and has contributed to prestigious edited volumes.

STUDIES IN ENGLISH LANGUAGE

 Charles F. Meyer (University of Massachusetts)

The aim of this series is to provide a framework for original studies of English, both present-day and past. All books are based securely on empirical research, and represent theoretical and descriptive contributions to our knowledge of national and international varieties of English, both written and spoken. The series covers a broad range of topics and approaches, including syntax, phonology, grammar, vocabulary, discourse, pragmatics, and sociolinguistics, and is aimed at an international readership.

Already published in this series:

Christiane Meierkord: *Interactions across Englishes: Linguistic Choices in Local and International Contact Situations*

Haruko Momma: *From Philology to English Studies: Language and Culture in the Nineteenth Century*

Raymond Hickey (ed.): *Standards of English: Codified Varieties around the World*

Figures

2.1	Distribution of genres in ARCHER and the OBC according to the dimensions of (in)formality and their speech-like vs. written characterisation	page 43
4.1	Normalised figures of <i>bring up</i> per 1,000,000 words in the HC and ARCHER	127
4.2	Normalised frequencies of <i>bring up</i> per 1,000,000 words in the CLMETEV	128
4.3	Normalised frequencies of <i>put down</i> per 1,000,000 words in the HC and ARCHER	131
4.4	Normalised frequencies of <i>put down</i> per 1,000,000 words in the CLMETEV	131
4.5	Normalised frequencies of <i>take in</i> per 1,000,000 words in the HC and ARCHER	132
4.6	Normalised frequencies of <i>take in</i> per 1,000,000 words in the CLMETEV	133
4.7	Cline of lexicalisation in phrasal verbs	146
4.8	Cline of idiomatisation in phrasal verbs	146
5.1	Distribution of the combinations that break the 'phonological constraint' in ARCHER and the OBC. Normalised frequencies per 10,000 words	159
5.2	Distribution of phrasal verb particles in ARCHER and the OBC. Normalised frequencies per 100,000 words	162
5.3	The development of particles which show a tendency to increase in frequency in ARCHER and the OBC. Normalised frequencies per 100,000 words	164
5.4	The development of recent phrasal verb particles. Normalised frequencies per 100,000 words	165
5.5	The development of the particle <i>forth</i> in ARCHER and the OBC. Normalised frequencies per 100,000 words	167

List of Figures

xi

5.6	The development of <i>about</i> , <i>around</i> , and <i>round</i> in ARCHER and the OBC. Normalised frequencies per 100,000 words	169
5.7	The development of phrasal verbs from 1650 to 1990 in ARCHER and the OBC	175
5.8	Diachronic development of phrasal verbs in ARCHER	177
5.9	Diachronic distribution of semantic types of phrasal verbs in ARCHER and the OBC. Normalised frequencies per 100,000 words	187
5.10	Distribution of phrasal verb passives per genre in ARCHER and the OBC. Normalised frequencies per 10,000 words	199
5.11	Diachronic distribution of the VPO and VOP arrangements with nominal objects in ARCHER and the OBC	201
5.12	Distribution across semantic groups of the VPO and VOP arrangements with nominal objects in combinations with <i>up</i>	202
5.13	Diachronic distribution of <i>-ing</i> nominalisations in ARCHER and the OBC. Normalised frequencies per 10,000 words	207
5.14	Cross-genre distribution of phrasal verb <i>-ing</i> nominalisations in ARCHER and the OBC. Normalised frequencies per 10,000 words	208
5.15	Diachronic distribution of phrasal verb derivations other than <i>-ing</i> nominalisations in ARCHER and the OBC. Normalised frequencies per 10,000 words	210
5.16	Diachronic distribution of phrasal verb derivations other than <i>-ing</i> nominalisations in ARCHER and the OBC excluding the <i>follow-up</i> examples from 1950 to 1990. Normalised frequencies per 10,000 words	210
5.17	Cross-genre distribution of phrasal verb derivations other than <i>-ing</i> nominalisations in ARCHER. Normalised frequencies per 10,000 words	211
6.1	Frequency of phrasal verbs across genres in ARCHER and the OBC. Boxplot analysis	219
6.2	Comparison of the frequency of phrasal verbs in diaries and journals. Boxplot analysis	224
6.3	Comparison of the frequency of phrasal verbs in diaries and journals over time. Normalised frequencies per 10,000 words	225
6.4	The development of phrasal verbs in letters in ARCHER. Normalised frequencies per 10,000 words	236
6.5	Comparison of the frequency of phrasal verbs in drama and fiction. Boxplot analysis	241

xii	<i>List of Figures</i>	
6.6	Comparison of the frequency of phrasal verbs in drama and fiction over time. Normalised frequencies per 10,000 words	242
6.7	The development of phrasal verbs in drama excluding the files 1944bagn.d7b and 1960bolt.d8b. Normalised frequencies per 10,000 words	244
6.8	The development of phrasal verbs in news in ARCHER. Normalised frequencies per 10,000 words	248
6.9	Comparison of the frequency of phrasal verbs in medicine and science. Boxplot analysis	254
6.10	Comparison of the frequency of phrasal verbs in medicine and science over time. Normalised frequencies per 10,000 words	255
6.11	The development of phrasal verbs in sermons in ARCHER. Normalised frequencies per 10,000 words	261
6.12	The development of phrasal verbs in the trial proceedings from the OBC. Normalised frequencies per 10,000 words	266
6.13	The development of phrasal verbs in the trial proceedings from the OBC and the legal cross-examinations from the ICE-GB. Normalised frequencies per 10,000 words	266
6.14	Diachronic development of phrasal verbs in the speech-related text types from ARCHER and the OBC. Normalised frequencies per 10,000 words	273
6.15	Diachronic development of phrasal verbs in the writing-based and writing-purposed from ARCHER. Normalised frequencies per 10,000 words	274

Tables

1.1	Classification of group-verbs (Denison 1981: 24–33)	<i>page</i> 4
1.2	Common classifications of phrasal verbs and related structures	7
1.3	Periodisation of the English language	13
2.1	Number of words of British English across genres in ARCHER	18
2.2	Number of words of American English across genres in ARCHER	19
2.3	Number of files and words per subperiod in the OBC sample	23
2.4	Total files and number of words of diaries and journals in ARCHER 3.1	29
3.1	Raw and normalised frequencies (per 10,000 words) of combinations containing <i>up</i> as an emphatic particle in the text types from ARCHER and the OBC	65
3.2	Common terminology for the three levels of meaning in verb-particle combinations traditionally distinguished in the literature	77
3.3	Tests for phrasal verbs. <i>Turn on</i> as a case in point	106
4.1	Syntactic tests of cohesion applied to the combination <i>ring up</i>	144
4.2	Degrees of prototypicality in phrasal verbs	149
5.1	Most common verbs used in the formation of phrasal verbs in ARCHER and the OBC	156
5.2	Raw figures and normalised frequencies per 10,000 words of verb types in ARCHER and the OBC	156
5.3	Diachronic distribution of most common verbs used in the formation of phrasal verbs in ARCHER and the OBC	157
5.4	Comparison of the origin of the verbal element in the combinations between the subperiods 1650–99 and 1950–90 in ARCHER	160

xiv	<i>List of Tables</i>	
5.5	Raw and normalised frequencies per 100,000 words of the distribution of the eight most frequent particles in ARCHER and the OBC	163
5.6	The development of <i>about</i> , <i>around</i> , and <i>round</i> in drama. Raw and normalised frequencies per 10,000 words	170
5.7	Most common phrasal verb combinations in ARCHER and the OBC	172
5.8	Diachronic distribution of the fifteen most common combinations in ARCHER and the OBC	173
5.9	Ratio of type/token frequency of phrasal verbs in the seven subperiods of ARCHER	179
5.10	Ratio of type/token frequency of phrasal verbs in the four subperiods of the OBC	179
5.11	Raw and normalised frequencies per 10,000 words of new types per corpus subperiod in ARCHER	180
5.12	Raw and normalised frequencies per 10,000 words of new types per corpus subperiod in the OBC	180
5.13	Raw figures and percentages of the distribution of semantic types of phrasal verbs in ARCHER and the OBC	187
5.14	Patterns of transitive phrasal verbs in ARCHER and the OBC	195
5.15	Distribution of the two main transitive phrasal verb patterns and object types in ARCHER and the OBC	200
6.1	Raw and normalised figures of phrasal verbs per 10,000 words across the genres in ARCHER	221
6.2	Raw and normalised figures of phrasal verbs per 10,000 words in the OBC	221
6.3	Raw and normalised frequencies per 10,000 words of phrasal verbs in diaries and journals	231
6.4	Diachronic distribution of semantic types of combinations with <i>up</i> in diaries and journals. Normalised frequencies per 10,000 words	233
6.5	Raw and normalised frequencies (per 10,000 words) of new types introduced over time in diaries and journals	234
6.6	Diachronic distribution of semantic types of combinations with <i>up</i> in letters. Normalised frequencies per 10,000 words	238
6.7	Raw and normalised frequencies (per 10,000 words) of new types introduced over time in letters	240
6.8	Raw and normalised frequencies (per 10,000 words) of new types introduced over time in drama and fiction	245

6.9	Diachronic distribution of semantic types of combinations with <i>up</i> in drama and fiction. Normalised frequencies per 10,000 words	246
6.10	Raw and normalised frequencies (per 10,000 words) of new types introduced over time in news	252
6.11	Diachronic distribution of semantic types of combinations with <i>up</i> in news. Normalised frequencies per 10,000 words	253
6.12	Raw and normalised frequencies (per 10,000 words) of new types introduced over time in medicine and science	258
6.13	Diachronic distribution of semantic types of combinations with <i>up</i> in medicine and science. Normalised frequencies per 10,000 words	259
6.14	Raw and normalised frequencies (per 10,000 words) of new types introduced over time in sermons	264
6.15	Diachronic distribution of semantic types of combinations with <i>up</i> in sermons. Normalised frequencies per 10,000 words	264
6.16	Raw and normalised frequencies (per 10,000 words) of new types introduced over time in trial proceedings	269
6.17	Diachronic distribution of semantic types of combinations with <i>up</i> in trial proceedings. Normalised frequencies per 10,000 words	270

Acknowledgements

This book deals with the development of phrasal verbs from the end of the Early Modern English period to the present day, and with the relationship between these structures and the processes of lexicalisation, grammaticalisation, and idiomatisation. The manuscript is a revised version of my doctoral dissertation, which was publicly defended at the University of Santiago de Compostela in September 2013. The structure of the chapters has been changed, new data have been added, and a number of valuable comments that I have received on the original version have been taken into consideration. The final result represents a significant personal achievement, one which would not have been possible without the help and support of many people over many years.

First of all, I would like to acknowledge the support of the research team *Variation, Linguistic Change and Grammaticalization* (University of Santiago de Compostela), sponsored by the Spanish Ministry of Economy and Competitiveness (grant FFI2017-86884-P). I am especially grateful to María José López-Couso, my PhD supervisor, for her professional guidance, constructive criticism, and constant encouragement, and Teresa Fanego, the team leader, for supporting my research from the outset.

I would like to express my deepest appreciation for the guidance of those who have helped to orientate and refine my research during various visits abroad, namely Christian Mair (University of Freiburg), David Denison and Nuria Yáñez-Bouza (University of Manchester), and Terttu Nevalainen and the members of the *Research Unit for Variation, Contacts and Change in English* (VARIENG) at the University of Helsinki. The greatest debt of gratitude goes to Nuria, not only as my ‘supervisor- and mentor-in-the-shadows’, but for generously providing me with her self-collected data, which made possible an important part of the corpus research presented in this monograph. To her I owe my enthusiasm for historical sociolinguistics, historical pragmatics, and corpus analysis. This book would not have been written without her unfailing help and encouragement.

I would also like to thank Helen Barton, the Commissioning Editor for Linguistics at Cambridge University Press, for her support and understanding from the first moment she received the initial book proposal and manuscript, and especially Merja Kytö, the editor of the series *Studies in English Language*, for her valuable comments and suggestions for improvements, these always made in a friendly and sympathetic way.

My gratitude also goes to colleagues and friends from various departments of the Faculty of Philology of the University of Santiago de Compostela and the Faculty of Philology and Translation of the University of Vigo for support on both the academic and personal level. I am likewise very grateful to my colleagues and friends from the Department of Philology of the University of Cantabria, especially to my *P.*, for his support, encouragement, and valuable friendship during the years I spent in Santander, and to my friends and colleagues from the Department of English, French, and German from the University of Oviedo, where I currently hold the position of PhD Lecturer (*Ayudante Doctora*).

Last but by no means least, I would like to express my warmest gratitude to the closest members of my family. So, I dedicate this book to *Uxia*, *Álvaro*, and *mamá*, in recompense for the many hours that it has kept me away from them. Thank you all for your patience, understanding, and constant support.
