INDEX

- Activation, 12, 41
 allometric growth, 20, 99, 124
aristopedia, 115
 autolysis, 18

 Bateson's law, 122
 Berlese theory, 1
 brachypterism, 72
 brain and moulting, 25

 Castes, 3, 126
 cell size, 15
 chromatic droplets, 12
 chromatolysis, 12, 18
 competence, 75
 corpus allatum, 34, 36, 56, 77, 88, 94
 corpus cardiacum, 34, 37, 65, 79
 critical period, 22
 cuticle formation, 13
 cytochrome system, 41
 cytoskeleton, 102, 112

 Dedifferentiation, 12
 dermal glands, 14, 109
 determination, 104
 diapause, 27, 41, 72
 diapause factor, 47
 differentiation, 75, 96, 103, 111
 Diptera, 33
 Dyar's law, 19

 Ecdysis, 11
 embryology, 3
 endocrine organs, 36
 endomitosis, 17
 endopterygote insects, 15
 epigenesis, 10
 evocator, 117
 evolution of metamorphosis, 4

 Fields, 118
 flavoprotein, 44

 Germ band, 3

 gradient factor, 99
 granular spheres, 19
 group effect, 48, 127
 growth coefficient, 20
 growth and moulting hormone, 97
 growth ratios, 19
 gynandromorphs, 123

 Haemocytes, 19
 harmonic growth, 20
 hibernation substance, 47
 histoblasts, 18
 histolysis, 18
 homeösis, 113
 hormone balance, 72, 73
 hormones, 41, 45, 46
 and metabolism, 80
 hybrids, 23, 72
 hypermetamorphosis, 86
 hypocerebral ganglion, 34
 hypostigmatic gland, 28

 Imaginal discs, 7, 15, 35, 51, 61, 77
 imaginal rings, 18
 inductors, 103
 inhibitory hormone, 56
 integration of growth, 97
 integument, 14
 intersegmental glands, 31
 intersexes, 123

 Juvenile hormone, 56, 68, 83, 88

 Larva, 2
 latent imaginal pattern, 51, 100

 Metabolic hormones, 80
 metathetely, 69
 modifiers, 103
 morphogenesis, 110
 mosaic egg, 4
 moulting, 11
 of adult, 48
 fluid, 13

[More information](#)*Index*

- Neotenin, 56
 neoteny, 68, 70, 75, 126
 neurosecretory cells, 26, 30, 36, 79
 nymph, 2
- Origin of metamorphosis, 4
 oxidase, 41
 oxygen consumption, 83
- Parabiosis, 22, 27, 66
 pars intercerebralis, 26
 penetrance, 2, 115
 pericardial glands, 31
 peritracheal glands, 31, 34, 63
 phagocytosis, 18
 phenocopies, 116
 plasmagenes, 101
 polyeidism, 3
 polymorphism, 2, 96, 123
 polyploidy, 17
 preformation, 10
proboscipedia, 115
 progression factor, 19
 protein metabolism, 81
 prothetely, 69
 prothoracic gland, 28
 prothoracotropic hormone, 96
 pupa, 6
 pupal characters, 68
 puparium, 45
- Quantitative action of hormones 91
- queen substance, 128
- Rate genes, 115
 regeneration, 118
 regulation, 3
 relative growth, 99
 reproduction, 77
 respiratory enzymes, 41
 reversal of metamorphosis, 83
 ring gland, 33, 63
- Sensilla, 111
 sensitive period, 116
 sex, 2, 123
 sex determiners, 123
 sex reversal, 124
 social hormone, 127
 spermatocytes, 44
 storage of secretion, 40
 suboesophageal ganglion, 40, 47
 synchronous development, 98
- Tetraltera*, 115
tetraptera, 115
 thoracic glands, 31, 64
 thoracic growth centre, 28
- Weismann's ring, 33
 wound healing, 49, 52
- Yolk formation, 78
