## INDEX

- Abelian group, 8, 130, 132  
 Absolute value, 111  
 Additive group, 8  
 Adjoint matrix, 57  
 Adjunction of a unity element to:  
   an algebra, 220  
   a ring, 22 f.  
 Algebraic extension, 152 ff.  
   of  $p$ -adic fields, 296 ff.  
 Algebraic:  
   fields, 153  
   numbers, 288  
   quantities, 18  
 Algebras, 17, 43, 217 ff.  
   characteristic equation (function) of, 224  
   cyclic, 242  
   degree of, 224  
   direct product of, 226, 227  
   direct sum of, 226  
   equivalence over  $\mathfrak{F}$  of, 44  
   general quantity of, 224  
   group, 221  
   minimum equation (function) of, 224  
   multiplication constants of, 44, 217  
   nilpotent, 249  
   normal, 309  
   normal simple, 310  
   of order  $n$  over  $\mathfrak{F}$ , 43, 217 ff.  
   polynomial, 160, 245  
   quadrate, 233 ff.  
   quaternion, 59  
   rank, rank function of, 224  
   real quaternion, 59  
   reciprocal, 222  
   regular representation of, 219  
   scalar extension of, 222  
   similar, 219  
   splitting fields of, 233  
   subalgebras of, 44  
   total matrix, 227  
   zero, 162  
 Alternating:  
   function, 141  
   group, 142  
 $\mathfrak{A}$ -modul; *see* Linear set  
 Analysis, lemmas from, 277 ff.  
 Analytic equivalence, 257  
 Archimedean order, 251  
 Archimedean valuation, 281  
   fields with an, 284 ff.  
 Associated elements, 26  
 Associative  
   algebras, 217  
   law, 7  
   rings, 217  
 Augmented matrix, 70  
 Automorphism group, 173  
   of an equation, 183  
   fundamental theorems on, 173 ff.  
 Automorphisms:  
   inner, 90  
   of a group, 10  
   of a matrix algebra, 89, 229, 231, 235,  
     236, 246  
 Basis, 40, 43, 44, 219  
   cyclic, 241  
   diagonal, 92  
   normal, 201, 203  
 Bilinear form, 70  
 Binary form, 43  
 Canonical forms, 76  
 Centrum of:  
   a group, 12, 131  
   a ring, 19  
   a total matrix algebra, 56, 57  
 Characteristic:  
   equation, function, 78, 84  
   roots, 86  
 Characteristic of a:  
   division ring, 24  
   field, integral domain, 29  
   ring, 22  
 Closed extension in a group, 126  
 Closure, 4, 7  
 Cofactor, 54  
 Column:  
   of a matrix, 46  
   rank, space, 63

- Commutative:
  - group, 8
  - matrices, 93, 238, 244 ff.
  - ring, 19
- Commutators, 10
- Complementary submatrix, 53
- Complete field, 263
  - algebraic extension of, 269
  - quadratic extension of, 272
- Complex numbers, 113, 276, 280, 288
- Composites of:
  - fields, 151, 161 ff., 180
  - subgroups, 126
- Composition series, 135
- Congruent:
  - matrices, 100
  - numbers, 6
- Conjugate:
  - elements of a quadratic field, 112
  - fields, 160
  - group elements, 131
  - groups, 131
  - matrix, 100
  - quantities, 160
- Conjunctive matrices, 100
- Contained in, 2
- Contains properly, 2
- Convergent series, 281
- Convergents, 293, 294
- Correspondence, 2, 3
- Coset, 127
- Cubic fields, 178
- Cubic forms, 43
- Cycle, 140
- Cyclic:
  - algebras, 242 ff.
  - fields, 186, 192 ff.
  - functions, 151
  - group, 11, 128
- Cyclotomic:
  - equation, 187
  - fields, 187, 190
- Decomposable matrices, 82
- Degree of:
  - an algebra, 224
  - an algebraic field, quantity, 153
  - a permutation group, 139
  - a term, 43
  - a total matrix algebra, 232
- Derivative, 164
- Derived field, 261, 262, 268, 269, 271
- Determinant, 52, 53
  - of Vandermonde, 189, 195
- Diag  $\{A_1, \dots, A_k\}$ , 81
- Diagonal element, matrix, 55
- Difference:
  - group, 132, 252
  - ring, 253
- Direct product of:
  - algebras, 226 ff.
  - fields, 155
  - groups, 127
  - matrix by identity matrix, 229
- Direct sum of:
  - algebras, 226, 246
  - matrices, 82
- Distributive laws, 14
- Divisibility of ideals, 254, 302
- Divisible quantities, 30
- Division algebra, 45
- Division algorithm for:
  - integers, 6
  - rings  $\mathfrak{A}[x]$ , 24
- Division ring, 23
- Divisorless ideals, 254, 301, 302
  - degree of, 300, 301
  - of  $p$ -adic fields, 292, 298, 299
  - ramification order of, 300, 301
- Divisors of zero, 15
- Elementary:
  - divisors, 84, 86
  - matrix, 61
  - symmetric functions, 147
  - transformations, 59
  - $T$ -transformations, 100
- Elements, 1
  - identity, 9
  - irreducible, 31
  - negative, 110
  - positive, 110
  - prime, 31
  - primitive, 36
  - regular, 15
  - relatively prime, 32
  - unity, 15
  - zero, 9
- Equation:
  - cyclic, 193

- cyclotomic, 187
- group of  $n$ , 183
- inseparable, 164, 165
- linear, 67 ff.
- normalized, 194
- pure, 206, 188
- separable, 164, 165
- solubility by radicals, 191
- Equivalence of:
  - algebras over  $\mathfrak{F}$ , 44
  - fields, integral domains, 29
  - groups, 10
  - linear sets, 16
  - matrices, 59, 63
  - rings, 14
  - sequences, 261
  - valuations, 257
- Equivalence relation, 5
- Equivalent elements, 5
- Euclid's process, 34
- Exponent:
  - of a field, 165
  - of a group, 130
- Extension:
  - algebraic, 152
  - scalar, 79, 223
  - transcendental, 152
- Factor, 25
- Factor theorem, 26
- $\mathfrak{F}$ -elementary divisors, 84
- Fermat theorem, 166, 206
- Fields, 27
  - algebraic, 153
  - algebraic extension of, 152
  - algebraic number, 288
  - algebraically closed, 109, 280
  - analytic equivalence of, 257
  - archimedean ordered, 251
  - characteristic of, 30
  - complete, 263
  - composites of, 151, 161 ff., 180
  - conjugate, 160
  - cubic, 178
  - cyclic, 186, 192 ff.
  - degree over  $\mathfrak{F}$ , 153
  - derived, 261
  - extensions of, 152
  - exponent of, 165
  - finite, 166 ff., 256
  - function, 32
  - Galois; *see* finite, normal
  - infinite, 170
  - inseparable, 168, 170
  - metacyclic, 187
  - modular, non-modular, 30
  - normal, 172 ff.
  - ordered case of, 112
  - ordered closed, 113
  - ordered equivalent, 111
  - $p$ -adic, 290 ff.
  - perfect, 165
  - $\phi$ -degree of, 289
  - prime, 30
  - quadratic, 155
  - quartic, 155 ff.
  - quotient, 28
  - residue class, 29, 36
  - root, 157
  - separable, 168
  - simple, 152
  - solubility by radicals of, 189
  - splitting, 233
  - stem, 157
  - transcendental extension of, 152
- Formally unaltered quantities, 149
- Forms:
  - rank of, 43
  - $T$ -equivalence of, 125
  - types of, 125
- Function:
  - alternating, 141
  - characteristic, 78, 84
  - minimum, 79, 84
- Fundamental theorem:
  - of algebra, 156, 280
  - of ideal theory, 301
- Galois field, 167
- Galois group; *see* Automorphism group
- Gauss lemma, 37
- General equation, 185
- Greatest common divisor:
  - of ideals, 254
  - of integers, 7
  - of polynomials, 33
  - of quantities of a u.f. domain, 35

- Group, 7 ff., 126 ff.  
 abelian, 8, 130, 132  
 additive, 8  
 algebra, 221  
 alternating, 142  
 automorphism, 173 ff.  
 automorphism of  $a$ , 10  
 center of  $a$ , 12, 131  
 commutators of, 10  
 composition series of, 135  
 conjugate elements of, 131  
 conjugate subgroups of, 131  
 decomposition of, 128  
 difference, 133  
 exponent of  $a$ , 130  
 finite, 126 ff.  
 Galois; *see* automorphism  
 generated by a subset, 126  
 generators of, 127  
 identity of, 9  
 infinite, 11  
 multiplicative, 8  
 normal divisor of, 131  
 order of, 11  
 regular, 184  
 representation by permutations, 144, 183  
 similarity, 76  
 simple, 131, 134  
 solvable, 137  
 symmetric, 139  
 transitivity of, 140
- Group element:  
 order of, 11  
 period of, 128  
 two-rowed representation of, 139
- Groups:  
 direct product of, 127  
 equivalence of, 10  
 homomorphic, 134  
 multiply isomorphic, 134  
 permutation, 138 ff.  
 rotation, 8  
 simply isomorphic, 10  
 transformation, 12
- Homogeneous polynomial, 43
- Ideal:  
 basis of an, 253  
 divisorless, 254  
 generated by a subset, 253  
 prime, 301  
 principal, 263  
 unit, 253  
 zero, 253
- Ideals in rings, 252 ff.  
 of algebraic numbers, 301  
 greatest common divisor of, 254  
 least common multiple of, 254  
 of  $p$ -adic numbers, 292  
 of  $\mathbb{B}$ -adic numbers, 298  
 product of, 253
- Idempotent matrices, 88
- Identity:  
 element, 9  
 group, 128  
 matrix, 55
- Inclusion of sets, 2
- Indeterminates, 18
- Induction, 5
- Infinite fields, 170
- Inseparable field, 168, 170  
 equation, polynomial, 164  
 quantity, 168
- Integers:  
 algebraic, 294, 301  
 congruent, 6  
 ordinary, 5  
 $p$ -adic, 291  
 prime, 7  
 relatively prime, 7
- Integral domains, 26  
 algebraic extensions of, 294  
 associated elements of, 26  
 equivalence of, 29  
 greatest common divisor in, 31  
 quotient fields of, 28  
 subdomains of, 30  
 units of, 26
- Invariant factors, 72, 77  
 non-trivial, 81
- Invariant subgroup, 131
- Invariant subring, 252
- Inverse element, 9  
 of a matrix, 57
- Involution, 96 ff.
- Irreducible in  $\mathfrak{F}$ , 33  
 quantity, 31
- Jordan-Hölder theorem, 136

## INDEX

317

- $\mathbb{R}$ -composites, 161
- Kronecker  $\delta$ , 90, 228
- $\lambda$ -matrix, 77
- Leading coefficient, 24
- Linear algebras; *see* Algebras
- Linear combination, 40
  - dependence, 40
  - equations, 67 ff.
  - form, 43
  - independence, 40
  - set (space) over a ring, 16
- Linear sets over  $\mathfrak{F}$ , 40
  - basis of, 40
  - forming an algebra, 43
  - of matrices, 47
- Linear transformations, 67 f., 75
  - equivalence of, 75
  - non-singularity of, 75
  - product of, 67
- Logarithm, 278
- Matric algebra, 55
  - automorphisms of, 89
  - basis of, 56, 92, 241
  - commutative with algebra, 231, 234
- Matrices, 46 ff.
  - alternate, 96
  - associative law for, 50
  - column rank and space of, 63
  - commutative with a given matrix, 93
  - commutative with a subfield, 244
  - congruent, conjugate, conjunctive, 100
  - decomposition of, 89
  - definite, 116
  - diagonal, 55
  - diagonals of, 55
  - direct sum of, 82
  - distributive law for, 51
  - elementary transformations on, 59
  - elementary  $T$ -transformations on, 100
  - elements of, 46
  - equivalence of, 59, 63
  - field of, 244
  - Hermitian, 100
  - idempotent, 88
  - indecomposable, 82
  - indices of nilpotent, 87
  - inverse of a product of, 57
  - linear combination of, 47
  - linear set of, 47
  - of maximum rank, 55
  - minors of, 54
  - negative, 116
  - negative definite, 116
  - nilpotent, 87
  - order of, 54
  - orthogonal, 119
  - orthogonal equivalence of, 119
  - pairwise orthogonal idempotent, 89
  - partitioning of, 49, 250
  - positive definite, 116
  - product of, 48
  - rectangular, 46
  - reduction of, 103 ff.
  - regular, 106
  - row by column rule for, 49
  - scalar, 55
  - similar, 76
  - singular, 57
  - skew, 96 ff.
  - square, 51
  - submatrices of, 53
  - symmetric, 96 ff., 114 ff.
  - transposed, 47, 51
  - $T$ -symmetric, 103 ff.
  - unitary, 119
  - $U$ -equivalent, -skew, -symmetric, 99
  - with separable characteristic equations, 236
- Matrix:
  - adjoint, 57
  - characteristic function of, 78
  - of coefficients, rank of, 67
  - determinant of, 52
  - elementary, 61
  - elements below diagonal in, 55
  - elements of, 46
  - inverse of, 57
  - Kronecker reduction of, 104
  - minimum function of, 79
- Maximal normal divisor, 134
- Metacyclic field, 187
- Minimum equation, function of:
  - an algebra, 224
  - an element, 152
  - a matrix, 79
- Modul, 9, 252

- Monic polynomial, 24
- Multiplication constants, 44, 47
- $n$ -ary  $q$ -ic form, 43
- Newton identities, 151, 199
- Nilpotent matrices, 87
- Non-constant polynomials, 32
- Non-empty set, 2
- Non-singular matrix, 57
- Norm, 160, 181, 243
  - theorem, 199
- Normal divisor, 131
- Operation, 4
- Order of:
  - an algebra, 43, 217
  - a group, 11
  - a group element, 11
  - a linear set, 40
  - a permutation, 140
- Order relation, 110
- Ordered closure, 113
- Ordered fields, 110 ff.
- Orthogonal equivalence, 119 ff
- $p$ -adic number fields, 290 ff.
  - algebraic extension of, 296
  - convergents in, 293
  - series representation in, 294
- $\mathfrak{P}$ -adic number fields, 303 ff.
- $p$ -equal quantities, 209
- Permutation group, 138 ff.
- Permutations, even and odd, 141
- Polynomial:
  - factorization of, 33
  - irreducible, 33
  - primitive, 36
- Polynomial algebras  $\mathfrak{F}[A]$ , 245 ff.
- Polynomial algebra  $\mathfrak{F}[\xi]$ , 160
- Prime:
  - factor groups, 136
  - field, 30, 166
  - integer, 7
  - quantity, 31
- Principal ideal ring, 255
- Principal minor, 103
- Quadrat algebra, 233 ff.
- Quadratic field, 112, 155, 162
- Quadratic form, 43
- Quantity, 1, 46
- Quartic fields, 156, 179
- Quasi-field, 23
- Quaternary form, 43
- Quaternions, 43, 59
- Quotient group, 132
- Ramification order, 300
- Rank of:
  - algebras, 224
  - matrices, 53
- Real number field, 266
- Real symmetric matrices, 114
- Reciprocal algebra, 222
- Reduced characteristic function, 79
- Reference notations, 1
- Regular:
  - group, 184
  - matrix, 106
  - representation, 219
- Regular sequences, 257
  - rational representation of, 265
- Relation, 4
- Relative degree, 153
- Relative trace, 181
- Relatively prime:
  - elements, 32
  - integers, 7
- Remainder theorem of algebra, 25
- Resolvent cubic, 179
- Right divisor, 25
- Rings, 19 ff.
- Scalar:
  - extension, 79, 222
  - matrix, 55
  - multiplication, 16
  - polynomial, 19
  - of a ring, 18
- Secondary diagonal, 55
- Self-conjugate subgroup, 131
- Separability, 164, 168
- Sequences, 16, 260 ff.
- Sets, 1, 2
- Similar:
  - algebras, 219
  - matrices, 76
  - representations, 220
- Similarity group, 76
