	<i>Preface</i>	<i>page</i> ix
1	Introduction	1
1.1	Graph-theoretic notions	1
1.1.1	Some graphs	5
1.2	Spectra of graphs	8
1.2.1	Spectrum of a graph	10
1.2.2	Laplacian spectrum of a graph	12
1.2.3	Signless Laplacian spectrum of a graph	14
1.2.4	Relations between A , L , and Q	16
1.3	Some more specific elements of the theory of graph spectra	18
1.3.1	Eigenvalue interlacing	18
1.3.2	Small perturbations	19
1.3.3	Hoffman program	20
1.3.4	Star complement technique	21
1.4	A few more words	22
1.4.1	Selected applications	22
1.4.2	Spectral inequalities and extremal graph theory	26
1.4.3	Computer help	27
2	Spectral radius	28
2.1	General inequalities	28
2.1.1	Walks in graphs	29
2.1.2	Graph diameter	38
2.1.3	Other inequalities	43
2.2	Inequalities for spectral radius of particular types of graph	50
2.2.1	Bipartite graphs	51
2.2.2	Forbidden induced subgraphs	55

vi	<i>Contents</i>	
	2.2.3	Nearly regular graphs 56
	2.2.4	Nested graphs 58
2.3		Extremal graphs 63
	2.3.1	Graphs whose spectral radius does not exceed $\frac{3\sqrt{2}}{2}$ 63
	2.3.2	Order, size, and maximal spectral radius 66
	2.3.3	Diameter and extremal spectral radius 68
	2.3.4	Trees 71
	2.3.5	Various results 74
	2.3.6	Ordering graphs 76
		Exercises 82
		Notes 85
3		Least eigenvalue 87
	3.1	Inequalities 87
	3.1.1	Bounds in terms of order and size 88
	3.1.2	Inequalities in terms of clique number, independence number or chromatic number 90
	3.2	Graphs whose least eigenvalue is at least -2 92
	3.3	Graphs with minimal least eigenvalue 95
	3.3.1	Least eigenvalue under small graph perturbations 96
	3.3.2	Graphs of fixed order and size 98
	3.3.3	Graphs with prescribed properties 100
		Exercises 102
		Notes 103
4		Second largest eigenvalue 105
	4.1	Inequalities 105
	4.1.1	Regular graphs 106
	4.1.2	Trees 113
	4.2	Graphs with small second largest eigenvalue 115
	4.2.1	Graphs with $\lambda_2 \leq \frac{1}{3}$ or $\lambda_2 \leq \sqrt{2} - 1$ 115
	4.2.2	The golden section bound 117
	4.2.3	Graphs whose second largest eigenvalue does not exceed 1 118
	4.2.4	Trees with $\lambda_2 \leq \sqrt{2}$ 123
	4.2.5	Notes on reflexive cacti 125
	4.2.6	Regular graphs 126
	4.3	Appendix 134
		Exercises 143
		Notes 144

<i>Contents</i>		vii
5	Other eigenvalues of the adjacency matrix	146
5.1	Bounds for λ_i	146
5.2	Graphs with $\lambda_3 < 0$	149
5.3	Graphs G with $\lambda_{n-1}(G)$ and $\lambda_{n-1}(\overline{G}) \geq -1$	150
	Exercises	153
	Notes	154
6	Laplacian eigenvalues	155
6.1	General inequalities for L -spectral radius	155
6.1.1	Upper bounds	156
6.1.2	Lower bounds	161
6.2	Bounding L -spectral radius of particular types of graph	163
6.2.1	Triangle-free graphs	163
6.2.2	Triangulation graphs	165
6.2.3	Bipartite graphs and trees	167
6.3	Graphs with small L -spectral radius	168
6.4	Graphs with maximal L -spectral radius	169
6.4.1	Graphs with $\mu_1 = n$	169
6.4.2	Various graphs	171
6.5	Ordering graphs by L -spectral radius	174
6.6	General inequalities for algebraic connectivity	176
6.6.1	Upper and lower bounds	179
6.6.2	Bounding graph invariants by algebraic connectivity	184
6.6.3	Isoperimetric problem and graph expansion	185
6.7	Notes on algebraic connectivity of trees	188
6.8	Graphs with extremal algebraic connectivity	190
6.9	Ordering graphs by algebraic connectivity	193
6.10	Other L -eigenvalues	193
6.10.1	Bounds for μ_i	194
6.10.2	Graphs with small μ_2 or μ_3	197
	Exercises	198
	Notes	202
7	Signless Laplacian eigenvalues	204
7.1	General inequalities for Q -spectral radius	204
7.1.1	Transferring upper bounds for μ_1	205
7.2	Bounds for Q -spectral radius of connected nested graphs	210
7.3	Graphs with small Q -spectral radius	213
7.4	Graphs with maximal Q -spectral radius	214
7.4.1	Order, size, and maximal Q -spectral radius	214

viii	<i>Contents</i>	
	7.4.2 Other results	216
	7.5 Ordering graphs by Q -spectral radius	217
	7.6 Least Q -eigenvalue	217
	7.6.1 Upper and lower bounds	218
	7.6.2 Small graph perturbations and graphs with extremal least Q -eigenvalue	221
	7.7 Other Q -eigenvalues	222
	Exercises	227
	Notes	229
8	Inequalities for multiple eigenvalues	231
	8.1 Spectral spread	231
	8.1.1 Upper and lower bounds	231
	8.1.2 Q -Spread and L -spread	234
	8.1.3 Extremal graphs	234
	8.2 Spectral gap	236
	8.3 Inequalities of Nordhaus–Gaddum type	238
	8.4 Other inequalities that include two eigenvalues	240
	8.5 Graph energy	243
	8.6 Estrada index	245
	Exercises	247
	Notes	250
9	Other spectra of graphs	251
	9.1 Normalized L -eigenvalues	251
	9.1.1 Upper and lower bounds for $\hat{\mu}_1$ and $\hat{\mu}_{n-1}$	253
	9.2 Seidel matrix eigenvalues	255
	9.3 Distance matrix eigenvalues	255
	9.3.1 Upper and lower bounds for $\hat{\delta}_1$	257
	9.3.2 Graphs with small $\hat{\delta}_2$ or large $\hat{\delta}_n$	260
	Exercises	261
	Notes	262
	<i>References</i>	265
	<i>Inequalities</i>	290
