5 twelve thousand e How far the Nampa doll was found under the earth.

2 Read the article. What sort of animals do the Nazca lines show?

Solving the World Mysteries with Science:

**THE NAZCA LINES OF PERU**

The Nazca Lines in Peru are huge pictures that were drawn into the ground by digging shallow lines into the earth. The lines take away the red stone which covers the surface leaving the white rock below exposed. An area of 190 square miles in the Nazca desert in Southern Peru is covered by these simple pictures, which include birds, spiders, fish and sharks. Some of these pictures are nearly 200 metres wide.

What’s so mysterious about these lines? Well, although they date back to between 400 and 650 AD, they were only discovered in the 1930s. The reason for this is that the pictures only become clear when they are seen from the air. So it was only when aeroplanes started flying over the area that people realised what they were. Of course, this led to the question: how did these pictures get there all those years ago? How could these people have made such drawings without the ability to fly? Or did they have the ability to fly? Author Jim Woodman suggested that the Nazca people could have invented simple hot-air balloons and used them to produce the art. He even built a working balloon using materials they would have had. Not many people were convinced by his ideas though. Other people suggested the lines might be extraterrestrial, that they were the work of aliens visiting our Earth. More and more theories were offered and one of the great modern mysteries was born.

However, when some wooden sticks were found in the ground in the area and carbon-dated, it showed that they were from the same age as the drawings. Some scientists suggested that the Nazca people might have put these sticks in the ground to help them with the drawings. By placing the sticks in the correct positions and connecting them with long ropes, the Nazca people could have used them to draw the lines to make the pictures. One scientist, Dr. Joe Nickell of the University of Kentucky was so sure that this was the answer that he decided to try and show how it could be done. Using only tools that the Nazca might have had he set about trying to draw a huge picture of a bird on a piece of land. With a few friends it took him a few hours to produce a perfect Nazca picture and show how these pictures probably got there.

3 Read the article again and answer the questions.

1 How were the lines drawn?

2 When and how were the pictures discovered?

3 What is Jim Woodman’s theory?

4 What did he do to try and prove it?

5 How does Joe Nickell believe the lines were made?

6 What did he do to prove these ideas?

DEVELOPING WRITING

A blog entry about a mystery

1 Read the blog entry. What does the writer think about the Bélmez faces? Tick a box.

They were fake.    They were real.

What do you think?

They were fake.    They were real.

---

[A] On the 23rd August 1971, María Gómez Cámaras saw a human face appear on the kitchen floor of her home in the southern Spanish town of Bélmez. So she told her husband and son, who, [B] broke up the kitchen floor and laid down another. However when a second face appeared sometime after, word got out to the mayor of Bélmez. He ordered that the floor should be cut out and taken away for study.

Ever since these initial sightings, there have been a number of reports of the sudden appearance and disappearances of human faces in the kitchen floor. [C] Tourists have visited La Casa de las Caras (The House of the Faces) hoping to experience the phenomena for themselves.

Of course, several theories were put forward to try and explain what was going on. One idea was that María herself could have produced the faces through a process called ‘thoughtography’, in which María was subconsciously projecting the pictures onto the floor from her mind.

Other people looked for a more scientific explanation and a lot of testing was done on the chemicals in the concrete. Studies showed that the images might have formed through chemical reactions. This could have been a natural process or it could have been done deliberately.

[D] I think the faces were made by María’s husband or son. [E] To make a lot of money perhaps. [F] What about you?

In part 2 of the listening exam, you will listen to a monologue (one person speaking) or a recording with two or more speakers lasting around three minutes. To answer the questions, you have to complete the sentences using the information you hear in the recording.

- You will be given plenty of time to read through the questions first. Read the sentences to help you prepare yourself for some of the things you will hear.
- Underline some of the key words in each of the sentences. This will help you focus on the important parts of the listening.
- The focus of this listening test is on detail, and to answer the questions correctly you will need to identify specific information. You should write the word(s) exactly as you hear them in the recording.
- The monologue can be quite long, so try to stay focussed. If you lose your place, remember that the questions are in the same order as the information in the recording, so concentrate on answering the next question.
- Use your second listening to focus on the answers you didn’t get the first time round and to check the answers you did get.
- The answers tend to be a single word and you will rarely need to write more than three.

   2 Which phrase has its origins in Viking times?

WORDS ABOUT MONEY

Money has been around for 12,000 years. The oldest money ever found were some coins made of obsidian, which is a dark glass-like volcanic rock. The obsidian coins were found in what is now modern day Turkey. Paper money has been around since the 9th Century AD. It was invented in China and it was called ‘flying money’ because it would blow away in the wind.

So money has been around for centuries, but have you ever wondered why we call it money? The answer is that the Romans made their coins in the temple of Juno Moneta, who was the goddess of marriage and women. The word ‘money’ comes from the name ‘Moneta’. Did you know the word in English for ‘to manufacture coins’ is ‘mint’ and that also comes from ‘Moneta’?

In fact, the Romans were the first to stamp a face on a coin. And can you guess who that famous Roman was? Yes, it was the great Roman Emperor, Julius Caesar. He had just won a war, and he decided that he would reward himself by putting his portrait on the coins.

‘Cash’ is another term we use for money. It comes from the ancient Chinese word for a bundle of coins. The Chinese used to carry their coins on strings. One hundred coins on a string was called one ‘cash’. The Chinese may have got the word from the Portuguese who called their coins ‘caixa’, which is pronounced ‘cash-a’.

When someone loses all their money they become ‘bankrupt’, and the origin of that word is the Italian phrase ‘banca rott’a, which means ‘broken bench’. In the years of early banking, people who exchanged and lent money did their business in the marketplace at a bench. If the man at the bench, or the ‘banker’, ran out of money or was unfair, his bench would be broken.

Another term we use when talking about money is ‘to pay through the nose’. If we say ‘he paid through the nose’ we mean that he paid a high price for something. That phrase has its origins in Viking times. The Vikings asked for a reward for not raiding a town. If the king refused to pay the reward, his nose was cut off. In other words, the king paid through the nose.

3 Read the article again and answer the questions.

   1 Where was the oldest money found?
   2 Which word originates from the name of a Roman goddess?
   3 How many Chinese coins made one ‘cash’?
   4 Which language does the word ‘cash’ probably originate from?
   5 When would the Italians break the ‘banker’s bench’?
   6 What does ‘to pay through the nose’ mean?

4 Do some research on the Internet to find the origins of the word ‘salary’. Then write a short paragraph about it.
An essay about the importance of money

1. Read Matt’s essay for the title ‘Money is not the most important thing in the world’ and answer the questions.
   1. Is the style formal or informal?
   2. Is it a balanced argument, i.e. are there arguments for and against the statement?

   My dad earned a huge salary and he had a very successful career, but we never saw him. For me, money is not the most important thing in the world. Firstly, some people earn a lot of money but they don’t have time to spend it because they are working so hard. Secondly, they spend long hours in an office, so they don’t have time to see family or friends. Without doubt, there is a feeling of safety in being wealthy. You will never be homeless or hungry. You will be able to buy your children everything they want. In addition, you will probably have reached the top of your career and you have achieved success as well as wealth, but will you be happy? Furthermore, will your family be happy?

   On the one hand, money makes you rich, but on the other hand, it makes you poor. You are able to buy your children everything they want. However, you can’t give them all the time and love they want. For this reason, I conclude that money is definitely not the most important thing in the world.

2. Match the underlined words and phrases with the similar phrases below. Then find two other examples in the essay of ways to link ideas.

   but | furthermore | therefore | without question

3. Number the statements in the correct order for an essay plan:
   Matt’s plan for his essay
   - Present my first argument against the statement.
   - State whether I am ‘for’ or ‘against’ the argument in the introductory paragraph.
   - Present my first argument for the statement.

4. Now plan your essay. Write two statements to support your argument, two statements against and a conclusion.

**HONEST TEENS IN CASH MACHINE SCANDAL**

When Matthew Hewlett and Caleb Turon decided to try and hack into a cash machine they could hardly have imagined how easy it would be. The two 14 year-old Canadians had found a manual explaining how to operate the Bank of Montreal ATM online. In the manual there was a password. One day during their lunch break from school they decided to try out the password at the machine in their local supermarket. To their surprise the six digit password took them straight into the machine’s computer where they were able to access all the data it contained.

The boys went straight to the closest branch of the Bank of Montreal where they told workers there what had happened. The bank staff refused to believe the boys, saying that they couldn’t have hacked into the machine and that they had no evidence to support their story. So the boys asked if it would be all right if they got some proof. The bank workers agreed that they could but told them they would never be able to get anything out of the cash machine.

The boys returned to the machine and hacked in once again. This time they printed out information such as all the cash withdrawals that had been made that day and how much money was in the machine. They also changed the welcome message on the screen to ‘Go away. This machine has been hacked.’

They returned to the bank with the evidence and this time they were taken seriously. The manager of the bank came to thank them personally. He even wrote them a note to show to their teachers explaining why they were so late back from their lunch break!
