

CONTENTS

CHAP.		PAGE
I.	MIGRATION OF BIRDS Definition—Variation of migration.	1
II.	CAUSE AND ORIGIN OF MIGRATION Direction of passage—The potentiality of flight—Habit of wandering—Memory—Extension of range—Influence of Temperature—Desire for Light—Glacial Epoch—Food Basis—Sexual Impulses—Competition.	13
III.	ROUTES Route or Broad Front—Coasting—Fly-lines—Isepip- teses—Land-bridges—Coast Lights.	33
IV.	THE HEIGHT AND SPEED OF MIGRATION FLIGHT Altitude of Normal Migration—Variation in Speed— Effect of Wind.	47
V.	ORIENTATION AND ROUTE FINDING Route Finding—Use of Memory—Eyesight—Errors— Guidance of Young—Beam Winds—Homing of Terns.	56
VI.	THE DISTANCES TRAVELLED BY BIRDS The Swallow—Variation in Distances—Marking Birds —Results—Routes of the Golden Plover—Evolution of the Routes.	65

viii	THE MIGRATION OF BIRDS	
<small>CHAP.</small>		<small>PAGE</small>
VII.	MIGRATION AND WEATHER	83
	Knowledge of Approaching Weather—Favourable and Unfavourable Conditions—Importance of Winds—Cyclonic and Anticyclonic Winds—Continental Migration.	
VIII.	THE PERILS OF MIGRATION	104
	Contrary Winds—Lighthouses and Lightships—Lee- ward Drift—Catastrophes.	
IX.	EARLY IDEAS OF MIGRATION	114
	Literature—Hibernation—Carriage of Small by Large Birds.	
X.	SUGGESTIONS AND GUESSES	119
	Trans-Atlantic Migration—Ship-borne Wanderers— Storm-blown Birds—Casual Wanderers—Swimming and Walking.	
XI.	SUMMARY	126
	BIBLIOGRAPHY	131
	INDEX	135

LIST OF MAPS

	FACING PAGE
Map showing the range of the American Golden Plover, with its known migration route	76
<i>(From The National Geographic Magazine.)</i>	
Map showing the evolution of the migration route of the American Golden Plover	78
<i>(From The National Geographic Magazine.)</i>	
Map showing the evolution of the migration route of the Eastern or Pacific Golden Plover	80
<i>(From The National Geographic Magazine.)</i>	
Map to show that a bird leaving Norway, near Aalsund, might be carried round the British Islands in twenty- four hours. The arrows indicate the actual directions and force of wind at the times marked during a slow- travelling circular storm in autumn 1901. Speed of bird about twenty-five miles per hour	98
