
Contents

I. Hyperbolic Geometry <i>Aline Aigon-Dupuy, Peter Buser, Klaus-Dieter Semmler</i>	1
II. Selberg's Trace Formula: An Introduction <i>Jens Marklof</i>	83
III. Semiclassical Approach to Spectral Correlation Functions <i>Martin Sieber</i>	121
IV. Transfer Operators, the Selberg Zeta Function and the Lewis-Zagier Theory of Period Functions <i>Dieter H. Mayer</i>	143
V. On the Calculation of Maass Cusp Forms <i>Dennis A. Hejhal</i>	175
VI. Maass Waveforms on $(\Gamma_0(N), \chi)$ (Computational Aspects) <i>Fredrik Strömberg</i>	187
VII. Numerical Computation of Maass Waveforms and an Application to Cosmology <i>Ralf Aurich, Frank Steiner, Holger Then</i>	229
