Introduction

The *Cambridge Primary Science* series has been developed to match the Cambridge International Examinations Primary Science curriculum framework. It is a fun, flexible and easy to use course that gives both learners and teachers the support they need. In keeping with the aims of the curriculum itself, it encourages learners to be actively engaged with the content, and develop enquiry skills as well as subject knowledge.

This Teacher's Resource for Stage 3 gives extensive support for teaching Stage 3 of the curriculum framework. It frequently references the Learner's Book, ISBN 978-1-107-61141-2, and Activity Book, ISBN 978-1-107-61145-0, for Stage 3, offering guidance on how to get the best out of using those products. There are also many additional teaching ideas for you to choose from.

The main sections in this Teacher's Resource are:

Teaching ideas. These give you a whole range of ideas for how to present the topics in the classroom. This includes ideas for classroom activities, assessment and differentiation, and suggestions for ICT resources. References to the Learner's Book and Activity Book are provided throughout, including guidance notes on the activities suggested in the Learner's Book. The Teaching ideas are also available in editable format on the CD-ROM included with this Teacher's Resource, so that you can include your own notes.

Worksheets. A large collection of worksheets offers further activity and exercise ideas in addition to those included in the Learner's Book and Activity Book, while some of the worksheets are intended to support the Learner's Book activities. The worksheets are also available in editable format on the CD-ROM included with this Teacher's Resource, so that you can adapt them to your own needs.

Answers to questions. Answers to all the questions from the Learner's Book, the exercises in the Activity Book and the worksheets in this resource are provided.

We hope you enjoy using this series.

With best wishes,
the Cambridge Primary Science team.
