INDEX

[This index does not include forms which appeared so hopelessly corrupt as to be useless; but a number of borderline cases have been retained, where the form, though probably corrupt, might be of some interest. The inclusion of a name here is thus in no sense a guarantee of its authenticity, but is intended merely to lead the reader to the page or pages where he can consider for himself the evidence in each case. To obtain the full information, both simplex and vṛddhi forms of a name should be consulted.

Names of major gotras and gaṇas, and pravara-names which do not occur in this index can be readily found in the tables on pp. 31–7.]
