

Index

- 2-closed group, 14
- 2-closure, 14
- 2'-elusive group, 22
- $D(Q)$, 36
- $\Delta(G)$, 3
- $\delta(G)$, 3
- Inndiag, 25, 44, 46, 56
- $\Phi(r, q)$, 73
- r -elusive group, 16
- σ -orbit, 74
- \mathcal{S}_r , 74
- $v(x)$, 72

- absolutely irreducible module, 64
- almost simple group, 16
- Aschbacher's theorem, 64
- automorphism
 - diagonal, 25, 44, 46
 - field, 26, 45, 47, 57–59, 85, 99, 115, 141
 - graph, 27, 45, 58, 59, 85, 100
 - graph-field, 27, 47, 58, 89, 116, 142
 - triviality, 58, 143
- biquasiprimitive group, 15
- Birkhoff–von Neumann Theorem, 31
- Boston–Shalev Conjecture, 6
- Brauer group, 8

- Cayley digraph, 12
- characteristic polynomial, 71
- circulant, 13
- collineation, 30
- companion matrix, 71

- derangement, 3

- digraph, 12
- discriminant, 36
- dual pair of spaces, 40
- duality, 30

- elementary divisor, 71
- elusive group, 11

- finitary symmetric group, 3
- form
 - alternating, 28
 - bilinear, 28
 - elliptic, 33
 - hermitian, 29
 - hyperbolic, 33
 - nondegenerate, 28, 31
 - parabolic, 33
 - quadratic, 31
 - reflexive, 28
 - sesquilinear, 28
 - skew-symmetric, 28
 - symmetric, 28
- Frobenius group, 5

- general linear group, 24
- general semilinear group, 26
- general unitary group, 43
- geometric subgroup, 19, 64
- Gram matrix, 28, 31

- hermitian matrix, 29
- homogeneous game, 10

- inverse-transpose map, 26
- irreducible block, 73

- Isbell's Conjecture, 9
- isometry, 34
- isometry group, 35

- Jordan decomposition, 72
- Jordan's theorem, 3

- labelled partition, 135

- minimal polynomial, 71

- non-geometric subgroup, 20, 68
- nonsingular quadratic form, 50
- non-subspace action, 196
- normal covering, 5
- novelty subgroup, 20, 65, 69, 300

- O'Nan–Scott Theorem, 16
- orthogonal complement, 30
- orthogonal group, 49
- orthonormal basis, 28

- polar space, 34
- polarity, 30
- Polycirculant Conjecture, 14
- primitive group, 2
- primitive prime divisor, 73
- projective general linear group, 24
- projective semilinear group, 26
- projective special linear group, 25

- quasiprimitive group, 2

- radical, 28, 50
- rational canonical form, 71
- reflection, 52
- regular unipotent element, 78
- relative Brauer group, 8

- semilinear map, 26
- semiregular permutation, 11
- semisimilarity, 35
- semisimple element, 72
- sharply 2-transitive group, 6

- signed partition, 111
- similarity, 35
- socle, 16
- space
 - anisotropic, 32
 - elliptic, 34
 - hyperbolic, 34
 - nondegenerate, 31, 32
 - nonsquare-parabolic, 37
 - orthogonal, 31
 - parabolic, 34
 - square-parabolic, 37
 - totally isotropic, 31
 - totally singular, 33
- special linear group, 25
- special unitary group, 43
- spinor norm, 52
- standard basis
 - elliptic, 33
 - hermitian, 29
 - hyperbolic, 33
 - parabolic, 33
 - symplectic, 29
- strongly r -elusive group, 16
- subspace action, 20, 149
- symplectic group, 46
- symplectic-type k -group, 67, 282

- tensor product of forms, 41
- transvection, 87
- triviality, 58

- unipotent element, 72
- unitarily similar, 100
- unitary-nonsquare, 100
- unitary-square, 100

- vector
 - nonsingular, 32
 - singular, 32

- Witt's Lemma, 38

- Zsigmondy's Theorem, 73
