
An Introduction to Community and Primary Health Care

Community nursing is the fastest-growing area of nursing practice in Australia. In today's diverse society, health professionals require the skills and knowledge to meet the complex needs of a wide range of communities and individuals. This book offers an engaging introduction to the theory, skills and application of community and primary health care in Australia.

Based on the social model of health, *An Introduction to Community and Primary Health Care* explores how social and environmental factors affect health care in Australian communities. It explains how health is embedded within social policy frameworks, and advocates community participation in a collaborative health care process. It discusses the principles of health and mental health promotion, the importance of cultural competence and the practice of community needs assessment.

The book is divided into three parts. Part I explains the key theories behind primary and community health care, while Part II identifies the skills needed in health care practice. Part III examines specific health professional roles in areas such as Indigenous nursing, men's and women's health, rural nursing and youth health. Drawing on the diverse expertise of the contributing authors, this section is unique to this book in that it encourages students to consider how various nursing roles address issues of social justice, equality and access. Case studies illustrate each role in practice.

Each chapter includes learning objectives, reflective questions, critical thinking activities and further reading to consolidate learning. Comprehensive online resources are available at www.cambridge.edu.au/academic/communityhealth. Instructor resources include multiple-choice questions and videos. Student resources include weblinks and an interactive glossary.

Readable and highly practical, *An Introduction to Community and Primary Health Care* equips students with the theory, skills and understanding they will need as community and primary health care professionals working across Australia.

Diana Guzys is Lecturer in the Faculty of Health Sciences at La Trobe University.

Eileen Petrie is Assistant Professor in the Faculty of Health at the University of Canberra.

Contributors

Nick Arnott (RN; Master of Advanced Practice (Community & Primary Healthcare); Grad Cert International Health; Grad Cert International Development; MACN) is the General Manager of Disability, Aged and Complex Care Services at a large social and community health service in Melbourne. He also holds a part-time appointment as a Lecturer in Nursing at La Trobe University. Nick is a registered nurse and health service executive with 25 years' experience in the planning and delivery of primary and community health care services, in Australia and overseas.

Gabrielle Canfield graduated in nursing in 2012 and has worked as a mental health nurse. She graduated from La Trobe University in 2013 with a Postgraduate Diploma in Mental Health Nursing Science. She is currently working in Bendigo, Victoria as a community mental health nurse. Prior to this she worked in hospitality management, business and complementary health.

Leona Evans (Cert Nursing, Cert Midwifery, Bachelor of Health Science (Nursing Studies)) is a Primary School Nurse working in the Primary School Nurse Program of the Victorian Department of Education and Early Childhood Development. Prior to this she worked for 17 years in the Child and Adolescent Unit at Bendigo Hospital and spent two years as a midwife.

Sandi Grieve (Grad Dip Nursing, Masters of Advanced Nursing Practice, Cert Pharmacology for Advanced Practice) is Chief Executive Officer of the Walwa Bush Nursing Centre. She was the first nurse practitioner endorsed in rural and remote Victoria. Sandi is also a Sessional Lecturer in Community Nursing at La Trobe University.

Barbara Hanna (RN, RM Mid Cert, Infant Welf Cert, Bachelor of Nursing (Hons), PhD) was Senior Lecturer in Nursing at Deakin University for 20 years, and went on to work as a facilitator in the medical school. She coordinated the Deakin maternal and child health course for many years. Her clinical background includes district nursing, community health, maternal and child health, policy advising and research, culminating in her career at the Monash/Alfred Psychiatric Research Centre.

Anne Hepner teaches at La Trobe University and Bendigo TAFE, as well as in a range of health promoting programs in the community. She has over 20 years' experience working to improve the health of women and children in various roles, including as clinical and community midwife, lactation consultant, academic, remote area nurse (Northern Territory), women's health nurse, clinical nurse educator (women's and children's health), consultant for UNFPA/WHO Solomon Islands and Team Leader of the Women's and Children's Health Project, Papua New Guinea.

Gylo (pronounced 'Julie') **Hercelinksjy** is Assistant Professor in Nursing at the University of Canberra. Her clinical, teaching and research expertise and areas of publication are in mental health, aged care, interprofessional learning, innovative educational approaches to learning and teaching, identity and social inclusion. She has extensive experience in

teaching at undergraduate and postgraduate levels, and is the coordinator of postgraduate studies in mental health nursing at the University of Canberra.

Kim Hyde is a Maternal and Child Health Nurse for a local shire with immense diversity, works at a local public hospital as a lactation consultant (outpatients' clinic) and has a small private practice as a lactation consultant. She has a background in general, midwifery and paediatric nursing, with a particular focus on supporting parent–child interactions and breastfeeding, and is also a paediatric massage consultant.

Dean Hyland is an ATOD/MH Clinical Nurse Consultant in remote Far North Queensland. A Credentialed Mental Health Nurse, he is currently completing a masters program in mental health nursing and has postgraduate diplomas in Community Nursing, Addiction Studies and Dual Diagnosis. He has interests in all areas of men's health.

Lynda Jarvis (Bachelor of Psychology, Masters in Applied Psychology) is a Lecturer in the School for Nursing and Midwifery at the University of Western Sydney. Prior to working as an academic, she worked in community health nursing and aged care.

Basseer Jeeawody is Assistant Professor in the Faculty of Health at the University of Canberra. He is a trilingual Registered Nurse and Registered Psychologist, and has held corporate positions internationally, including as sub-dean for international programs in health, Director of Multidisciplinary Professional Development for a Regional Health Authority, Foundation Director of the Djirruwang National Indigenous capacity building mental health project and senior academic.

Denise Johnston is a Registered Nurse working within medical clinics as a Credentialed Diabetes Educator (CDE) in two small, rurally isolated towns in north-eastern Victoria: Corryong and Tallangatta. Over the past 43 years Denise has worked within the fields of midwifery, acute nursing, aged care, child and maternal health, and nutrition (she has an Associate Diploma of Nutrition).

Gail MacVean is a registered nurse. She has been working as an occupational health nurse in a large manufacturing plant for the past 22 years. During this time Gail has completed courses in audiometry, spirometry, health promotion in the workplace, ergonomics and coordinating return to work.

Marisa Monagle (Bachelor of Public Health, Grad Dip Adolescent Health and Welfare, Master of Youth Health and Education Management) is a PhD candidate at La Trobe University and a Registered Nurse who has worked with young people in community health for the past 20 years in educational facilities and the community.

Rebecca O'Reilly is Lecturer and Academic Course Advisor in the School of Nursing and Midwifery at the University of Western Sydney.

Susan Reid (Postgrad Dip in Maternal Child Health, Family and Community Nursing) has worked as a Breast Care, Sexual Health and Immunisation Nurse. She is currently completing a masters degree in nurse practitioner studies in women's and sexual health, and is committed to continuing her work within the rural community.

Wayne Rigby (RN, certificates in psychiatry, general retardation and community health, Bachelor of Social Welfare, Masters of Health Science) is an Aboriginal man of Bundjalung

descent. He is a senior clinician in mental health, and has worked in welfare, health and education at Commonwealth and state levels for over 40 years as a clinician, manager and academic.

Vanessa Robertson (RN, Postgrad Dip Mental Health Nursing Science) is a Registered Nurse and works in an acute psychiatric inpatient ward.

Andrea Scott (Bachelor of Public Health) works as a school nurse in both primary and secondary schools for the Department of Education and Early Childhood Development and has been delivering primary health care and health promotion for the past 12 years. Prior to that she worked as a nurse in the Child and Adolescent Unit at Bendigo Health in Victoria for 12 years.

Preface

This book aims to provide an easy-to-read foundation for any health care professional engaged in primary health care practice in the community.

The first part introduces the key concepts that underpin nursing practice. The objective is to provide a basic understanding of these concepts to enable students to explore the associated theory in depth; to provide a fundamental understanding that is so often assumed, rather than built.

The second part of the text provides information relating to skills used in community and primary health care practice. This information is discussed at a beginning practitioner level, with a view to being a launching pad for future practice.

The final part of the text uses a number of community nursing roles to enable students to explore the numerous opportunities and diverse ways in which the concepts discussed in Parts I and II are implemented in daily practice. Although this section focuses on nursing practice, many of these roles occur within interdisciplinary teams, and therefore it provides similar insights for students from other health care disciplines. While a wide selection of roles are presented, it is important to keep in mind that these are not necessarily representative of roles with similar titles across and within the states and territories. This purpose of this section of the text is not meant as career counselling, but rather to demonstrate the links between theory and practice. One of the most exciting aspects of practice in community settings is that it offers many unique and eclectic practice possibilities, to meet the diverse needs of each community.

.....

Acknowledgements

Diana Guzys:

I would like to thank all of those who contributed to this text, for their generosity of time and spirit, particularly my colleague Eileen Petrie. This work is dedicated to my parents, Stan and Shirley Guzys, who taught me to value knowledge and to love books.

Eileen Petrie:

I would like to thank all of those who contributed to this text, for their generosity of time and spirit, particularly my colleague Diana Guzys, who is inspirational in her dedication to writing and life. Thank you, Diana, for being there for me throughout my very difficult 2012. This work is dedicated to my dear friends and to my brother-in-law, who will remain forever young.

We would also like to acknowledge Dr Brian Phillips from Charles Darwin University for his insights and contribution to the section on social connectedness, recovery and mental health in Chapter 14.

Finally, we would like to express our gratitude to Dr Renée Otmar for her insights, comments, suggestions and efforts in helping us to create a cohesive and useful text.
