 chronic migraine 132–3  
 multiple medical conditions 127–8  
 nutritional supplements 130
- older woman with blurry vision on  
 amitriptyline 135–6
- overuse of abortive treatments 132–3
- pregnancy planning 129, 128–9, 130
- refractory chronic migraine 124–7
- seizure threshold lowering 138
- seizure with tension-type headache  
 treatment 137–8
- selection for new use 121–4
- side effects 123–4
- therapeutic trials 124–6
- time to response 125
- topiramate  
 contraception effects 137  
 long-term safety 136–7  
 when to consider 119
- primary headache, mistaking for  
 another condition 20–36
- prochlorperazine 108, 111
- propranolol  
 during breast-feeding 116  
 headache after head injury 142  
 verapamil combination 138–9
- proptosis, intermittent red eye with  
 headache 45
- psychiatric illness with intractable  
 headache 88–90
- recording of medical visits 179–80
- red eye, intermittent with headache 45–6
- rescue therapies 110
- retinal detachment 85
- reversible vasoconstrictive syndrome (RVCS) 59–61
- rhinosinusitis  
 acute 21–2  
 chronic 21, 21, 22  
 clinical characteristics 22  
 diagnosis 21  
 imaging 21  
 migraine coexistence 23  
 migraine differential diagnosis 22–3  
 nasal cavity disorders 22  
 recurring 21, 22
- riboflavin 150–2
- safety of patient, evaluation after  
 disclosure 89
- scotoma, scintillating 5, 6, 33
- seizures  
 with headache 43  
 headache relationship 43–4  
 medication combination 137–8  
 preventive treatments 138  
 tension-type headache treatment 137–8

- self-care 169
- self-diagnosis 165
- serotonergic drugs, triptan interactions 104–5
- serotonin syndrome 105, 104–5
- sertraline, triptan interactions 104–5
- severe sudden headache 59–61
- sexual abuse
  - in childhood and psychiatric illness with intractable headache 88–90
  - doctor's response to disclosure 89–90
  - history taking 88–9
- side-locked headache 48–9
  - differential diagnosis 93
  - imaging 93
- sinus disease, diagnosis 21
- sinus headache 20–3
  - types 21–2
- sinusitis, acute sphenoid 41, 40–1
- sleep hygiene 148
- snoring, obstructive sleep apnea 47
- Social Security Disability Insurance (SSDI) 175, 176, 176
- sphenoid sinus 41
- spinal fluid pleocytosis 90–2
- spinal manipulation 149, 154
  - risks 154–5
- stabbing headache 13–15
  - clinical characteristics 14
  - differential diagnosis 13–14
  - incidence 14
  - treatment 14
- stable headache, imaging 55–7
- status migrainosus 111–12
- steroid therapy
  - bridging 181
  - burst and taper 133
  - complications 181
  - dependence 181–2
  - giant cell arteritis and persistent headache in elderly woman 92–3
  - hip osteonecrosis 180–1
  - overreliance in cluster headache 180–2
  - status migrainosus 111–12
  - treatment role in cluster headache 181
- stroke
  - migrainous infarction 49–50
  - risk in migraine with aura 6
- sulfa allergy with migraine 105–6
- sulfonamide group 106, 106
- sumatriptan
  - during breast-feeding 116
- chest pressure from 102–4
- cluster headache treatment 155–6
  - frequent use 119
- headache after head injury 142
- hemiplegic migraine treatment 96
  - hypersensitivity reactions 106
  - limited access to 112–13
  - postpartum headache 50–1
  - during pregnancy 114
- SUNA (Short-lasting Unilateral Neuralgiform attacks with Autonomic features) 13, 14
- SUNCT (Short-lasting, Unilateral, Neuralgiform headache attacks with Conjunctival injection and Tearing) 13, 14
- syncope
  - metoprolol off-label prescribing 183
  - orthostatic 133–5
- temporal artery biopsy, giant cell arteritis 39, 40
- temporal release procedure 159
- temporomandibular abnormalities 25–6
- temporomandibular joint (TMJ) 25
- tension-type headache
  - chiropractic care 153–5
  - diagnosis 2–4
  - diagnostic accuracy 3–4
  - history taking 1–2
  - migraine differential diagnosis 4, 1–4, 5
  - nonpharmacologic treatment 148–50
  - recording of medical visits 179–80
  - triggers 3
- tetrahydrocannabinol (THC), urine tests 77
- therapeutic relationship, physician–patient 165
- thunderclap headache
  - acute sphenoid sinusitis 41
  - causes 59
  - imaging 59–61
  - reversible vasoconstrictive syndrome 59–61
  - treatment 60
- ticks *see* Lyme disease
- topiramate 129
  - headache after head injury 142
- intraocular pressure 135
- long-term safety 136–7
- parasthesia induction 131–2
- side effects 136–7
- trauma
  - doctor's response to disclosure 89–90
  - experiences 88
  - headache prevention after head injury 141–3
  - history taking 88–9
  - see also* post-traumatic headache (PTH)
- traumatic brain injury (TBI) 141–3
- treatment imperative 168
- trigeminal autonomic cephalalgias (TACs) 12–13
  - hemicrania continua 17–18
- trigeminal neuralgia, stabbing headache differential diagnosis 14
- trigeminocervical complex 153
- triptan sensations 102–3, 104
  - avoidance of triptans 103
- triptans
  - in acute headache 102
  - avoidance in triptan sensations 103
  - characteristics 103
  - chest pressure from sumatriptan 102–4
  - cluster headache treatment 9
  - combination therapy 102
  - hemiplegic migraine treatment 96
  - hypersensitivity reactions 106
  - indications for use 103–4
  - migraine failure to respond 100–2
  - migraine treatment 9, 29
  - post-ictal headache 44
  - postpartum headache 50–1
  - serotonergic drug interactions 104–5
  - side effects 104
  - in sulfa allergy 105–6
- turbinate disorder 22
- unilateral headache 7–8, 17–18
  - migraine 7–8, 17
- urine tests
  - meprobamate 76–7
  - opioids 76–8
  - pitfalls 76–8
  - tetrahydrocannabinol 77
- valproate, during breast-feeding 116
- verapamil
  - cluster headache 181
  - monitoring 75–6
- electrocardiographic abnormalities 75
- propranolol combination 138–9

Index

vertebral artery dissection (VAD) 154–5	Visual Aura Rating Scale (VARs) 5, 86, 85–6	weakness and headache diagnostic possibilities 96–7
vertigo	visual changes with sore head 84–6	history taking 96–8
chronic 36	differential diagnosis 85	weekend headache 41–3
with migraine 34–6	tests 85–6	weight gain in migraine 123–4
diagnostic criteria 36	visual loss, giant cell arteritis 39	white matter lesions, familial occurrence 62–4
vision, normal 11	visual perceptual alterations with headache 10–11	differential diagnosis 62–3
visual accompaniments, late-life migraine 32–3	vitamin supplements, migraine 151, 150–2	imaging 62, 63
visual aura 5, 7	vomiting	white matter lesions, incidental in migraineur 61–2
clinical characteristics 86	with intractable headache 109–11	
differential diagnosis 85,	status migrainosus 111	zoster vaccine 96
