

Index

- abrupt detachment, 212
- acceleration potential, 239
- accommodation coefficient, 50
- acoustic impulse, 79
- acoustic pressure, 76
- acoustic spectra, 78
- acoustic streaming, 105, 108
- added mass matrix, 121
- air content, 24
- attached cavitation, 188, 197–200
- attached cavitation tails, 188

- barotropic relation, 146, 152–154
- base pressure coefficient, 222
- Basset term, 129, 133
- bearings, 199
- Berthelot tube, 13
- bifurcations, 102
- binodal, 2
- Bjerknes forces, 89, 107–108, 120
- blade cavitation, 197
- Blake critical pressure, 40, 103
- Blake critical radius, 40
- blockage ratio, 218
- boiling, 6
- Boltzmann's constant, 6
- boundary element methods, 238
- boundary layer
 - separation, 211, 216
- breakdown cavitation number, 235
- Brillouin-Villat condition, 213
- Brownian motion, 120
- bubble
 - acceleration, 132–135
 - chamber, 8
 - cloud, 67, 74, 102, 173–180, 196
 - cloud collapse, 74–75, 196
 - collapse, 59–85
 - damping, 95–96
 - deformation, 137–143
 - dimple, 189
 - fission, 186, 188
 - flow interactions, 184–185
 - migration, 107, 130–132
 - natural frequency, 90–93
 - stability, 39
 - translation, 110–143
- buoyancy effects, 51

- cascade, 232–236
 - flat plate, 233
 - mapping function, 232
 - unsteady motion, 242
- cavitation, 19
 - damage, 65, 71–75
 - desinence, 24
 - event, 182
 - hysteresis, 24
 - inception, 19–27
 - inception number, 20
 - large-scale structures, 183, 191–192
 - luminescence, 83–85
 - noise, 75–83
 - number, 20, 207
 - scaling, 27
 - separation, 199
 - stable acoustic, 89
 - susceptibility, 73
 - transient acoustic, 89, 103
- cavity closure, 201–203
 - models, 209–211
- cavity detachment, 211–216
- cavity pulsation, 202
- choked cavitation number, 218, 235
- choked flow, 155, 217–219
- Clausius-Clapeyron equation, 7, 34
- cloud cavitation, 196–197, 200
- cloud natural frequency, 176
- cluster radius, 9
- complex variable methods, 208
- contact angle, 14

contaminant
 gas, 8, 18, 21, 33
 particles, 8
 convective effects, 50
 cosmic radiation, 8
 Coulter counter, 16
 creep, 3
 critical gas volume fraction, 155, 159
 critical mass flow rate, 155, 160
 critical point, 2
 critical pressure ratio, 155, 160
 critical radius, 40
 critical superheat, 15
 critical temperature, 6
 critical vapor volume fraction, 160

D'Alembert's paradox, 112, 206
 deaerator, 24
 delta wings, 237
 dental drills, 74
 disperse phase, 145
 drag coefficient, 112
 dynamic stall, 242

elasticity, 3, 18
 entrainment, 202

far-wake, 112, 117
 flexible coating, 67
 fluidity, 3
 free streamline
 detachment, 207, 211–216
 flow, 206
 methods, 206
 free surface, 206
 detachment, 211–216
 Froude number, 135, 201
 fully developed cavitation, 197

Gibbs number, 10

Haberman-Morton number, 138
 Hadamard-Rybczynski flow, 114, 129, 134
 harmonic cascading, 179
 head injuries, 74
 hodograph variable, 209
 holography, 17, 24
 homogeneous equilibrium model, 149, 160
 homogeneous flow, 145
 homogeneous frozen model, 149, 160
 hydrofoil, 200–201
 biconvex, 200
 circular-arc, 223
 divergence, 242
 finite aspect ratio, 237
 flat plate, 222, 229–231

flutter, 242
 partially cavitating, 229
 supercavitating, 229
 unsteady motion, 239

impurities, 6
 inertia tensor, 121
 interfacial layer, 197, 201
 ITTC
 headform, 22, 80, 185
 tests, 22

Jakob number, 48
 Joukowski foils, 25

Kelvin impulse, 131
 Keulegan-Carpenter number, 123
 Kirkwood-Bethe approximation,
 60
 Knudsen number, 120
 Kutta condition, 230

laminar boundary layer, 184
 Landau-Darrieus instability, 53
 latent heat, 6
 limited cavitation, 182
 linearized methods, 227–229
 liquid compressibility, 60, 69, 153
 liquid explosives, 85
 liquid quality, 22
 liquid state, 1–3
 liquid turbomachines, 232

magnetostrictive device, 73
 Marangoni effects, 117–119
 mass diffusion, 43–45, 202
 metastable state, 3
 microbubbles, 8, 17
 microjet, 65–71
 microstreaming, 108
 mixture density, 145
 Morison's equation, 122

near-wake, 112, 117
 nozzle flow, 154–162
 nucleation
 heterogeneous, 7, 14–15
 homogeneous, 7–14
 rate, 10
 sites, 15–18
 nuclei, 7
 cavitation, 16
 free stream, 16, 22
 Harvey, 16, 18
 ocean, 25
 surface, 16

- numerical methods, 237–239
 Nusselt number, 50
- open-wake model, 210
 organic skin, 18
 Oseen flow, 115, 130
- partial cavitation, 200
 particle acceleration, 132–135
 patch cavitation, 189
 Peclet number, 50
 photophoresis, 120
 Plesset-Zwick equation, 35, 63
 polytropic constant, 36, 93–95
 pressure coefficient, 19
 propellers, 232
 pseudo-cavitation, 25
- Rayleigh collapse time, 39
 Rayleigh-Plesset equation, 30, 61
 Rayleigh-Taylor instability, 53
 re-entrant jet, 65
 rectified diffusion, 45, 89, 103–108
 reentrant jet, 201
 model, 211
 relative motion, 145
 relaxation time, 133
 remnant cloud, 72, 187
 reservoir conditions, 153
 residence time, 21
 resorber, 24
 Reynolds number, 19, 112
 Riabouchinsky model, 209
 ring vortices, 195
 rock-cutting, 74
- Schiebe headform, 80
 screening effect, 184
 separated flow, 145
 shape distortion, 64
 sheet cavitation, 197–200
 shock wave, 61, 71, 84, 168–173, 179
 slender body theory, 237
 smooth detachment, 213
 solidity, 232
 sonic speed, 146–152
 sonochemistry, 84
 sonophoresis, 120
- specific heat, 3
 spherical-cap bubble, 139
 spinodal line
 liquid, 2, 12
 vapor, 2
 spiral vortex models, 211
 stagger angle, 232
 Stokes flow, 114–117, 126–130, 133
 Stokes streamfunction, 112
 streamwise vortices, 195
 Strouhal number, 117
 subharmonics, 97
 super-cavitation, 200
 super-resonant flow, 180
 superheat, 3, 7
 limit, 11
 surface contaminants, 119
 surface roughening, 52, 188
 surface roughness, 27
 surface tension, 8, 117
 susceptibility meter, 18
- tensile strength, 5, 6, 9, 13–15
 tension, 3, 6
 terminal velocity, 133
 thermal effects, 45, 62, 203
 thermocapillary effects, 117
 thermodynamic equilibrium, 146
 thermophoresis, 120
 three-dimensional flow, 237
 throat conditions, 155
 tip vortices, 192
 transverse vortices, 195
 traveling bubble cavitation, 185, 191
 turbulence
 effects, 21
 free stream, 22
- ventilated cavities, 202
 ventilation, 19, 207
 viscous effects, 19
 vortex cavitation, 184, 192–196
 vortex shedding, 112, 117, 123, 184, 196, 201
- wake, 206
 wall effects, 217–219
 Weber number, 42
 Whitehead paradox, 114
