Absolute values, expectation of product, 33
Aitken, A. C., 226, 280
Allan, F. E., 226
Analysis of variance, 61, 110, 259
Anderson, R. L., 194, 202
Aspin, A. A., 63

Barnard, G. A., 55
Bartlett, M. S., 63, 137, 138
Bayes' theorem, 4
Behrens' test, 55, 58, 107, 257
Benthem, J. P., 381
Berkson, J., 26, 94
Beta functions, 48
Bias of grouped estimates, 304
Binomial distribution, 65
Birge, R. T., 138, 196, 201, 202, 207, 226, 278
Bivariate normal distribution, 32, 104
Blackman, M., 80
Bleuler, E., 80
Blom, G., 26, 46, 80
Bodewig, E., 226
Booth, A. D., 226
Both variables subject to error, 91, 95, 128, 366
Breitenberger, E., 355
Brunt, A. D., 26, 62, 356

Cadwell, J. H., 46
Calibration by regression curve, 89
Central limit theorem, 24
Change of origin, 184, 226, 400
Change of scale, 158, 331
Change of variable, 334
Characteristic function, 21
  of linear sum, 24
Check column, 148, 157, 177
Chi (χ), dashed, 38, 47
  expectation, 37
Chi-squared (χ^2) distribution, 34
  expectation and variance, 36
  testing of hypothesis by, 66
Cochran, W. G., 18, 26, 63, 80
Cohen, E. R., 280, 355
Computers, high-speed, 171, 175
Concordance of observations, 15
Confidence intervals, 52
Controlled quantities, 7, 85
Cornell, R. G., 356
Cornish, E. A., 26

Correlated variables, 261
Correlation coefficients, 32, 105
  partial, 361
  significance test for, 364
Correlation ratio, 84, 105
Correlation of residuals, 365
Correlogram, 356
Counters, types I and II, 77
Counting of particles, 69
  losses, 77
Covariance, 6
  matrix, 262, 377, 378
Cox, D. R., 46, 77, 80
Cox, G. J., 206
Crow, J. F., 63
Cumulants, 21

Daniel, C., 280
Daniels, H. E., 381
Danielson, G. C., 356
David, F. N., 280
Davis, H. T., 206, 349
Davis, P., 171
de la Garza, A., 276, 280
Degree of polynomial, choice, 280, 396
  F-test for, 257
Degrees of freedom, 36, 67
Deming, W. E., 92, 138, 226, 355, 381
Dent, B. M., 136
Dependent variable, 84
Differences of zero, 209
Discordant observations, 17
Distribution function, 4
Dixon, W. J., 63
Doolittle method, 153, 159, 169, 226
  abbreviated, 155, 163, 170
Double-tail tests, 31
Dumond, J. W. M., 355
Durbin, J., 365, 381
Dwyer, P. S., 151, 226, 312

Eddington, A. S., 138
Efficiency, 20, 293, 303, 313
Elderton, W. P., 26
Elimination of variables, 334
Elmore, W. C., 80
Equally-spaced observations, 110, 193
  grouping methods, 287
  of different weight, 214
  standard deviations, 263
  tables, 139–42, 226–47
Errors of the first and second kind, 52

More information

Expectation, 5
Exponential function, 335

F, dashed, 50, 64
F, distribution of, 49
F-test, for comparison of variances, 59
  for degree of polynomial, 257
  for harmonic components, 349
  for homogeneity, 60, 108, 259
  for Poisson parameters, 77
Factorial coefficients β, 211, 240–6
Factorial moments, 208, 215, 218
Feller, W., 77, 80
Fiducial intervals, 53
Fisher, R. A., 26, 46, 59, 201, 202, 226, 349, 356
Fitted values, from differences of zero, 209
  standard deviations of, 100, 263–76
Forsythe, G. E., 175, 226
Fourier transform, 22
Frequency function, 4
Functional relationship, 90, 366
  linear, 93, 129
  general theory, 370

Galton, F., 83
Gamma functions, 27
Gauss–Doolittle method, 153, 159, 169, 226
Gauss-Markoff theorem, 88, 260, 280
Geary, R. C., 95, 138
Geffner, J., 16, 356
Gini, C., 138
Goldsmith, G. J., 80
Gosset, W. S., 63
Gram–Schmidt orthonormalization, 171
Grouping of observations, 125, 136, 287–328
  bias, 304
  dropping of observations, 294
Grubbs, F. E., 63
Guest, P. G., 46, 71, 202, 226, 280, 315
Guide to calculating schemes, 382

Halmos, P. R., 26
Hannan, E. J., 381
Harmonic analysis, 341, 356
Hartley, H. O., 63, 222, 226, 349
Hayes, G. J., 226, 280
Heerema, N., 280
Helmert, F. R., 46
Hildebrand, F. B., 355–6
Homogeneity, 60, 108, 259
Hood, W. C., 138, 366
Horsnell, G., 63
Householder, A. S., 226, 356
Houseman, E. E., 194, 202
Hsu, P. L., 26

Ill-conditioned equations, 226, 393, 403
Implicit functions, 337
Independent variable, 84
  subject to error, 91, 128, 366
Inverse matrix, 178
  tables of elements, 206
Iterative methods for solution of normal equations, 185
