

## Index

- action, 33–6
- alternating tensor, 5–7, 64–5, 74, 94–7, 104, 110
- associative algebra, 14, 31, 34–5
- automorphism, 19
  
- bilinear form, 66–7, 69–73, 76–7
  - degenerate, 66–7, 69–73, 76–7
  - invariant, 66–7, 69–70, 72–3, 76–7
  - nondegenerate, 66–7, 69–73, 76–7
  - skew-symmetric, 67, 69
  - symmetric, 67, 69–70, 76–7
- branching rule, 113
  
- canonical basis, 113–14
- Cartan matrix, 108
- Cartan’s semisimplicity criterion, 72, 76, 109
- Cartan–Killing classification, 30, 106–8
- Casimir operator, 72–6, 90–2, 99, 102–4, 109–10
- Cayley–Dickson algebra, 109
- centralizer, 32
- centre, 25, 31–2, 68
  - of a direct product, 30
  - of a simple Lie algebra, 29
  - of  $\mathfrak{gl}_n$ , 26, 32
- character
  - of a Lie algebra, 37–9, 41, 48, 61–2
  - of a module, 111
- commutator, 9, 13–5
- crystal basis, 113–14
  
- density theorem, 43
- derivation, 22–3
- derivative, 8–12
- derived algebra, 25–6, 29–32
  - of a direct product, 30
  - of a simple Lie algebra, 29
  - of  $\mathfrak{gl}_n$ , 26
- determinant, 2, 6–7, 111
- diagonal matrix, 15, 21, 27, 29, 78, 107
- direct product, 30–1, 48
- direct sum, 4, 27, 31–2, 44
- dual basis, 3, 60, 72, 79
- dual space, 3, 38, 60–1, 65–7
- Dynkin diagram, 108
  
- eigenspace, *see* eigenvector
- eigenvalue, *see* eigenvector
- eigenvector, 26, 42–3, 46, 48, 64, 68, 102–4
- endomorphism, 38, 66, 68, 72, 105
  
- fundamental homomorphism theorem, 28–30, 36
  
- Gel’fand–Tsetlin basis, 113
- group
  - general linear, 1, 10
  - of automorphisms, 19
  - special linear, 11
  - special orthogonal, 12
  
- highest-weight vector
  - for a simple Lie algebra, 109–10, 113
  - for  $\mathfrak{gl}_n$ , 86–98, 101–4
  - for  $\mathfrak{sl}_2$ , 52–6, 58, 61, 66, 76
- homomorphism
  - of Lie algebras, 10, 17, 19, 28–9
  - of modules, 38, 41, 65–6
  - of vector spaces, 65
  
- ideal, 24–32
  - abelian, 72, 76

- nontrivial, 25
- of  $\mathfrak{gl}_n$ , 26–7
- of  $\text{Mat}_n$ , 26
- invariant vector, 42, 65–6
- isomorphism
  - of Lie algebras, 17–20, 28
  - of modules, 38–41, 46–8
- Jacobi identity, 13–16, 18–20, 25, 37
- Kac–Moody algebra, 109
- Killing form, 70–2, 76, 109
- Kostka number, 112
- Lie algebra, 1, 10, 13–20
  - abelian, 15–19, 22, 25, 42, 46
  - general linear, 10, 14
  - linear, 14, 21
  - of derivations, 22, 31, 48, 109
  - of linear transformations, 22, 33
  - one-dimensional, 15, 17, 29, 46
  - semisimple, 108
  - simple, 29–30, 48, 106–14
  - special linear, 12, 14, 18–19, 30, 48
  - special orthogonal, 12, 14, 19, 30, 106
  - three-dimensional, 18–20, 30, 32, 48
  - two-dimensional, 16–17
- Lie bracket, 13–20
  - of  $\mathfrak{gl}_n$ , 16
  - of ideals, 25–6
  - of  $\mathfrak{sl}_2$ , 18
  - of  $\mathfrak{so}_3$ , 19
- Lie group, 1, 11, 106
- Lie’s theorem, 12
- Maschke’s theorem, 46
- module, 33–49
  - completely reducible, 45–8, 55, 99–101
  - faithful, 34–7
  - highest-weight, 52–5, 87–91, 109–11
  - infinite-dimensional, 59, 111
  - integral, 47, 79–83, 86–7, 90–3, 96, 100–2, 104
  - irreducible, 41–8, 54, 91, 96–9, 109–11
  - natural, 35–6, 43, 50
  - one-dimensional, 37–9, 41
  - over a simple Lie algebra, 109–14
  - over  $\mathfrak{b}_n$ , 43, 45
  - over  $\mathfrak{d}_n$ , 45
  - over  $\mathfrak{gl}_n$ , 35, 43, 69, 78–105, 111–13
  - over  $\mathfrak{l}_2$ , 34–5, 39–41, 47, 58, 62, 64–5
  - over  $\text{Mat}_n$ , 35
  - over  $\mathfrak{sl}_2$ , 34, 37, 47, 50–9, 61, 63, 65–6, 76, 83, 94, 99
  - over  $\mathfrak{sl}_n$ , 43, 69, 82–5, 89, 98–101
  - pullback of, 36, 46
  - quotient, 41, 55, 111
  - reducible, 41–8, 54, 91, 96–9, 109–11
  - restriction of, 36, 43, 47
  - trivial, 38, 50
  - Verma, 111
- multiplicity
  - of a weight, 51, 57, 63–4, 76, 79–81, 83–5, 98, 104–5, 107, 110–12
  - of an irreducible summand, 57–8, 101
- normalizer, 32
- perpendicular subspace, 60, 67
- pure tensor, 4, 62, 65
- quotient, 27–9
  - maximal abelian, 29, 37, 47
- rank, 108
- representation, 33–40
  - adjoint, 36–7, 39, 44, 47, 50
  - equivalence of, 38–40
  - faithful, 34–7
  - natural, 35–6
  - of a Lie group, 1
  - of  $GL_n$ , 1–11, 101
  - of  $\mathfrak{gl}_2$ , 8, 19
  - of  $\mathfrak{gl}_n$ , 10–11
  - of  $S_k$ , 112–13
- representing matrices, 34–40, 46–7
- root, 84, 107–9
  - positive, 108
  - simple, 84, 107–9
- root system, 108
- Schur polynomial, 112
- Schur’s lemma, 68–9
- Schur–Weyl duality, 113
- semi-direct product, 48, 76
- semistandard Young tableau, 112–14
- skew-symmetric matrix, 12, 15
- $\mathfrak{sl}_2$ -triple, 57, 79, 106–9

156

standard basis  
 of  $\mathfrak{gl}_n$ , 16, 74  
 of  $\mathfrak{sl}_2$ , 18  
 of  $\mathfrak{so}_3$ , 19  
 strictly upper-triangular matrix, 22, 26, 29, 78, 107  
 string, 54, 56, 58–9, 61, 63, 66, 76, 87, 94, 113  
 subalgebra, 11, 21–5, 28–9, 31–2  
 Cartan, 108  
 complementary, 32  
 generated by a subset, 23–4, 31  
 of  $\mathfrak{gl}_2$ , 16, 19, 23–4, 31  
 of  $\mathfrak{gl}_n$ , 21, 24  
 of  $\text{Mat}_n$ , 22  
 submodule, 41–9  
 complementary, 45–6  
 generated by a subset, 44, 47  
 nontrivial, 41  
 trivial, 41  
 symmetric tensor, 5–7, 64, 74, 93–5, 97, 103–5  
 tangent space, 11  
 tensor power, 6, 64, 112  
 tensor product, 4–7, 61–7, 93–7, 101–5  
 trace, 12, 14, 38, 74  
 trace form, 70–2, 74–6  
 transpose, 2, 4, 14, 61, 67, 79
