<i>Preface</i>	<i>page ix</i>
<b>Introduction</b>	<b>1</b>
<b>PART ONE: PROBABILITY IN ACTION</b>	<b>9</b>
<b>1 Probability questions</b>	<b>11</b>
<b>2 Law of large numbers and simulation</b>	<b>18</b>
2.1 Law of large numbers for probabilities	19
2.2 Basic probability concepts	28
2.3 Expected value and the law of large numbers	34
2.4 Drunkard's walk	38
2.5 St. Petersburg paradox	41
2.6 Roulette and the law of large numbers	44
2.7 Kelly betting system	46
2.8 Random-number generator	52
2.9 Simulating from probability distributions	57
2.10 Problems	65
<b>3 Probabilities in everyday life</b>	<b>75</b>
3.1 Birthday problem	76
3.2 Coupon collector's problem	83
3.3 Craps	86
3.4 Gambling systems for roulette	90
3.5 Gambler's ruin problem	93
3.6 Optimal stopping	95

vi	<i>Contents</i>	
3.7	The 1970 draft lottery	98
3.8	Problems	102
<b>4</b>	<b>Rare events and lotteries</b>	<b>108</b>
4.1	Binomial distribution	109
4.2	Poisson distribution	111
4.3	Hypergeometric distribution	129
4.4	Problems	136
<b>5</b>	<b>Probability and statistics</b>	<b>142</b>
5.1	Normal curve	144
5.2	Concept of standard deviation	152
5.3	Square-root law	160
5.4	Central limit theorem	162
5.5	Graphical illustration of the central limit theorem	166
5.6	Statistical applications	168
5.7	Confidence intervals for simulations	171
5.8	Central limit theorem and random walks	177
5.9	Brownian motion	186
5.10	Falsified data and Benford's law	196
5.11	Normal distribution strikes again	202
5.12	Statistics and probability theory	203
5.13	Problems	206
<b>6</b>	<b>Chance trees and Bayes' rule</b>	<b>212</b>
6.1	Monty Hall dilemma	213
6.2	Test paradox	218
6.3	Problems	222
	<b>PART TWO: ESSENTIALS OF PROBABILITY</b>	<b>227</b>
<b>7</b>	<b>Foundations of probability theory</b>	<b>229</b>
7.1	Probabilistic foundations	230
7.2	Compound chance experiments	239
7.3	Some basic rules	243
<b>8</b>	<b>Conditional probability and Bayes</b>	<b>256</b>
8.1	Conditional probability	256
8.2	Law of conditional probability	266

*Contents*

vii

8.3	Bayes' rule in odds form	270
8.4	Bayesian statistics – discrete case	278
<b>9</b>	<b>Basic rules for discrete random variables</b>	<b>283</b>
9.1	Random variables	283
9.2	Expected value	286
9.3	Expected value of sums of random variables	290
9.4	Substitution rule and variance	293
9.5	Independence of random variables	299
9.6	Important discrete random variables	303
<b>10</b>	<b>Continuous random variables</b>	<b>318</b>
10.1	Concept of probability density	319
10.2	Expected value of a continuous random variable	326
10.3	Substitution rule and the variance	328
10.4	Important probability densities	333
10.5	Transformation of random variables	353
10.6	Failure rate function	357
<b>11</b>	<b>Jointly distributed random variables</b>	<b>360</b>
11.1	Joint probability mass function	360
11.2	Joint probability density function	362
11.3	Marginal probability densities	367
11.4	Transformation of random variables	374
11.5	Covariance and correlation coefficient	377
<b>12</b>	<b>Multivariate normal distribution</b>	<b>382</b>
12.1	Bivariate normal distribution	382
12.2	Multivariate normal distribution	391
12.3	Multidimensional central limit theorem	393
12.4	Chi-square test	399
<b>13</b>	<b>Conditioning by random variables</b>	<b>404</b>
13.1	Conditional distributions	404
13.2	Law of conditional probability for random variables	411
13.3	Law of conditional expectation	418
13.4	Conditional expectation as a computational tool	422
13.5	Bayesian statistics – continuous case	428

<b>14</b>	<b>Generating functions</b>	435
14.1	Generating functions	435
14.2	Moment-generating functions	443
14.3	Chernoff bound	448
14.4	Strong law of large numbers revisited	450
14.5	Central limit theorem revisited	454
14.6	Law of the iterated logarithm	456
<b>15</b>	<b>Discrete-time Markov chains</b>	459
15.1	Markov chain model	460
15.2	Time-dependent analysis of Markov chains	468
15.3	Absorbing Markov chains	472
15.4	Long-run analysis of Markov chains	481
15.5	Markov chain Monte Carlo simulation	490
<b>16</b>	<b>Continuous-time Markov chains</b>	507
16.1	Markov chain model	507
16.2	Time-dependent probabilities	516
16.3	Limiting probabilities	520
	<i>Appendix Counting methods and <math>e^x</math></i>	532
	<i>Recommended reading</i>	538
	<i>Answers to odd-numbered problems</i>	539
	<i>Bibliography</i>	556
	<i>Index</i>	558
