PREFACE . . . . .	v
SECTION I	
INTRODUCTION TO PRACTICAL WORK FOR TECHNICAL STUDENTS	i
SECTION II	
SAMPLING AND PRELIMINARY TESTS . . . . .	15
Sampling.	
Liquids . . . . .	16
Solids . . . . .	17
Preliminary Tests.	
Water . . . . .	17
Foreign substances . . . . .	19
Determination of fatty matter . . . . .	20
Preparation of samples for analysis . . . . .	23
SECTION III	
PRACTICAL METHODS FOR THE STANDARD ANALYTICAL DETERMINATIONS . . . . .	25
<b>① Specific Gravity</b> . . . . .	26
( <i>a</i> ) The specific gravity bottle . . . . .	26
( <i>b</i> ) The Sprengel tube . . . . .	29
( <i>c</i> ) The hydrostatic balance . . . . .	32
( <i>d</i> ) The flotation method . . . . .	34
( <i>e</i> ) Hydrometers . . . . .	36
<b>② Melting Point</b> . . . . .	38
( <i>a</i> ) Capillary method . . . . .	38
( <i>b</i> ) Platinum loop method . . . . .	41
<b>③ Solidifying Point of Mixed Fatty Acids</b> . . . . .	42
<b>④ Refractive Power</b> . . . . .	45
( <i>a</i> ) The Pulfrich refractometer . . . . .	47
( <i>b</i> ) The butyro-refractometer . . . . .	53
( <i>c</i> ) The Abbé refractometer . . . . .	56
<b>a</b> The Dispersive Power . . . . .	58

	PAGE
<b>5 Viscosity</b> . . . . .	62
Absolute viscosity . . . . .	63
The Redwood viscometer . . . . .	65
Standardising . . . . .	66
Viscosity ratio number . . . . .	70
The Coleman-Archbutt viscometer . . . . .	70
Doolittle torsion viscometer . . . . .	73
<b>6 Solubility</b> . . . . .	76
Standardisation of the solvent . . . . .	78
Acetic acid . . . . .	79
Alcohol reagent . . . . .	80
Diagram of results . . . . .	84–85
<b>7 Rotatory Power</b> . . . . .	87
The Lippich polarimeter . . . . .	89
<b>8 The Iodine Value</b> . . . . .	92
a Bromine thermal test . . . . .	97
b Maumené test . . . . .	100
c Oxygen absorption test . . . . .	102
<b>9 Elaidin Test</b> . . . . .	104
<b>10 Saponification Value</b> . . . . .	106
<b>11 Insoluble Bromide Value of Fatty Acids</b> . . . . .	109
<b>12 Reichert-Meissl Value</b> . . . . .	113
a Polenske Value . . . . .	116
<b>13 The Acetyl Value</b> . . . . .	119
<b>14 The Acid Value</b> . . . . .	123
<b>15 Unsaponifiable Matter</b> . . . . .	126

SPECIFIC TESTS FOR OILS, FATS AND WAXES . . . . .	131
Menhaden oil Hoppenstedt's test . . . . .	132
Liver oils Sulphuric acid test . . . . .	132
Tung oil Solidification test . . . . .	133
Walnut oil Bellier's test . . . . .	133
Cottonseed oil Halphen test . . . . .	133
Nitric acid test . . . . .	134
Becchi test . . . . .	134
Sesamé oil Baudouin test . . . . .	135
Soltsien reaction . . . . .	135
Rape oil Tortelli and Fortini test . . . . .	135
Holde and Marcusson test . . . . .	139
Kernel oils Bieber's test . . . . .	140
Arachis oil Bellier's test . . . . .	140
Evers' modified quantitative method . . . . .	141
Renard's method . . . . .	144
Olive oil Mazzaron's test . . . . .	146
Sulphur oil test . . . . .	146
Cacao butter Björklund's test . . . . .	146
Coconut oil Shrewsbury-Knapp method (Elsdon's modi- fication) . . . . .	147
Palm kernel oil Elsdon's method . . . . .	149
Burnett and Revis method . . . . .	150
Lard Stock-Belfield method . . . . .	152
Bömer's method . . . . .	152
Butterfat Kirschner method . . . . .	154
Avé Lallement (Baryta numbers). . . . .	155
Beeswax Weinwurm test . . . . .	156
Hardened fats Estimation of nickel . . . . .	157

## SECTION V

IDENTIFICATION AND DETERMINATION OF FATTY ACIDS AND ALCOHOLS (INCLUDING GLYCERIN) . . . . .	159
A. Mixed fatty acids . . . . .	160
Table of specific gravities . . . . .	162
„ melting points . . . . .	163
„ refractive indices . . . . .	165
„ iodine values . . . . .	166
„ mean molecular weights . . . . .	168
„ insoluble acids + unsaponifiable (Hehner No.) . . . . .	169

## CONTENTS

	PAGE
B. Separation and determination of fatty acids . . . . .	171
Lead-salt-ether method . . . . .	171
Estimation of stearic acid . . . . .	173
Hydroxylated fatty acids . . . . .	174
Oxidised fatty acids . . . . .	175
C. Examination of alcohols . . . . .	176
Estimation of the sterols . . . . .	176
Phytosteryl acetate test . . . . .	178
Wax alcohols . . . . .	179
Glycerin . . . . .	180
estimation of, in oils . . . . .	181
commercial glycerins . . . . .	181
chemically pure glycerin . . . . .	182
arsenic . . . . .	182
distilled glycerin . . . . .	183
nitration test . . . . .	183
international standard methods of analysis . . . . .	185
<i>free alkali</i> . . . . .	185
<i>ash and total alkalinity</i> . . . . .	185
<i>alkali as carbonate</i> . . . . .	186
<i>alkali as organic salts</i> . . . . .	186
<i>acidity</i> . . . . .	186
<i>total residue at 160°</i> . . . . .	186
<i>organic residue</i> . . . . .	187
<i>moisture</i> . . . . .	187
<i>acetin process</i> . . . . .	188
<i>dichromate process</i> . . . . .	191
<i>calculations</i> . . . . .	193
British standard specifications . . . . .	194
soap lye crude glycerin . . . . .	194
saponification . . . . .	195

## SECTION VI

TESTING AND ANALYSIS OF HYDROCARBON OILS AND WAXES . . . . .	197
Standard determinations . . . . .	198
Flash point . . . . .	202
Abel test . . . . .	202
Pensky-Martens' test . . . . .	207
Gray's test . . . . .	209
Ignition test (fire test) . . . . .	210
Cold test (setting point) . . . . .	211
Scotch method . . . . .	211

## CONTENTS

xiii

	PAGE
Freezing mixtures method . . . . .	212
Fluidity method (Schultz) . . . . .	212
Examination of crudes . . . . .	214
Crude petroleum . . . . .	214
Fractional distillation . . . . .	214
Crude ozokerite . . . . .	215
Crude bitumen . . . . .	215
Crude coals and shales . . . . .	216
Examination of distillates . . . . .	216
Naphtha . . . . .	216
Illuminating oils . . . . .	216
Lubricating oils . . . . .	217
Fuel oils . . . . .	218
Waxes.	
Paraffin wax . . . . .	218
Ozokerite (ceresin) . . . . .	219
Montan wax . . . . .	219

## SECTION VII

ESTING AND ANALYSIS OF ROSIN AND TURPENTINE . . . . .	221
<i>Rosin.</i>	
A. Detection.	
(a) In mineral oils . . . . .	222
(b) In fatty oils or fatty acids . . . . .	222
Liebermann-Storch test . . . . .	222
(c) In waxes . . . . .	223
B. Determination.	
(a) In mineral oils and waxes . . . . .	223
(b) In fatty oils, acids or natural waxes . . . . .	223
Twitchell method . . . . .	223
<i>Turpentine.</i>	
Standard determinations . . . . .	225
Specific tests for adulterants . . . . .	228
Fractionation test . . . . .	228
Burton's method (solubility in fuming nitric acid) . . . . .	230
Wolff's test . . . . .	232
Piest's test . . . . .	232
Grimaldi's test . . . . .	232
Zune's test . . . . .	232
Chlorinated hydrocarbons . . . . .	232
Summary of tests . . . . .	232

## SECTION VIII

	PAGE
INTERPRETATION OF RESULTS . . . . .	235
Variations in oils.	
Effect of differing varieties of plant or animal . . . . .	236
Effect of climate . . . . .	237
Effect of food . . . . .	237
Purity of the source . . . . .	238
Freshness of the oil-yielding material . . . . .	238
Method of obtaining oil, fat, etc. . . . .	238
Method of refinement . . . . .	239
Hydrogenation . . . . .	239
Effect of age . . . . .	241
Special treatment . . . . .	241
lithographic varnishes . . . . .	241
boiled oils . . . . .	242
blown oils . . . . .	242
sulphonated oils . . . . .	242
Inadvertent contamination . . . . .	242
Identity of a pure oil, etc. . . . .	243
Determination of purity of an oil, etc. . . . .	244
Deductions from analytical data . . . . .	244
Example of a sample of olive oil . . . . .	244
Example of a sample of lard . . . . .	245
Use of coloured diagrams . . . . .	245
Identity of adulterants if present . . . . .	247
Various classes of technical products.	
A. Edible oils and fats . . . . .	248
Example of a salad oil . . . . .	248
Example of a sample of margarine . . . . .	249
Table of average values for edible oils . . . . .	250--251
B. Soap manufacture . . . . .	252
Example of a sample of household soap . . . . .	252
Example of a sample of potash soft soap . . . . .	253
Example of a sample of soda soft soap . . . . .	256
Table of average values of mixed fatty acids	
for hard soap analysis . . . . .	254
for soft soap analysis . . . . .	255
C. Lubricating oils and fats . . . . .	256
Table of average values of oils used as lubricants . . . . .	257
Example of an engine oil . . . . .	258

## CONTENTS

xv

	PAGE
Example of an aircraft engine oil . . . . .	258
Example of a motor-car engine oil . . . . .	259
Example of an axle grease . . . . .	259
D. Candle manufacture . . . . .	260
Stearines . . . . .	260
Paraffin wax . . . . .	262
Beeswax . . . . .	262
Ozokerit . . . . .	262
Spermaceti . . . . .	263
Table of average values of waxes . . . . .	261
Example of a paraffin candle . . . . .	264
Example of a wax candle for church use . . . . .	264
Example of a standard sperm candle . . . . .	264
E. Illuminating oils . . . . .	264
Example of a "lighthouse" oil . . . . .	265
Example of a "colza oil" . . . . .	265
F. Wax mixtures and polishes . . . . .	265
Example of floor polish . . . . .	266

## SECTION IX

SCHEME FOR THE IDENTIFICATION OF AN OIL, FAT, OR WAX . . . . .	267
Distinguishing glycerides and non-glycerides . . . . .	268
Characteristics of glycerides . . . . .	269
Colour . . . . .	269
Odour . . . . .	269
Flavour . . . . .	270
Characteristics of non-glycerides . . . . .	270
Mineral oils . . . . .	270
Waxes . . . . .	271
Classification of glycerides . . . . .	272
Liquids.	
Class I. Marine oils . . . . .	272
Group 1. <i>Fish oils</i> . . . . .	273
Group 2. <i>Liver oils</i> . . . . .	273
Group 3. <i>Blubber oils</i> . . . . .	273
Class II. Vegetable drying oils . . . . .	273
Class III. Vegetable semi-drying oils . . . . .	274
Class IV. Vegetable non-drying oils . . . . .	274
Group 1. <i>Rape oil group</i> . . . . .	275
Group 2. <i>Olive oil group</i> . . . . .	275
Group 3. <i>Castor oil group</i> . . . . .	276

Class V. Animal oils . . . . .	276
Solids.	
Class VI. Vegetable fats . . . . .	276
<i>Group 1. Vegetable butters</i> . . . . .	276
<i>Group 2. Vegetable tallowes</i> . . . . .	277
<i>Group 3. Coconut oil group</i> . . . . .	277
Class VII. Animal fats . . . . .	278
<i>Group 1. Body fats</i> . . . . .	278
<i>Group 2. Milk fats</i> . . . . .	278
Classification of non-glycerides . . . . .	278
Class VIII. Liquid waxes . . . . .	278
Class IX. Natural waxes . . . . .	279
Class X. Bitumen waxes . . . . .	279
Class XI. Mineral oils . . . . .	280
Class XII. Mineral waxes . . . . .	281

## SECTION X

## TABLES

I Acid values, expressed in terms of oleic acid . . . . .	284
II Alcohol: s.G. of solutions . . . . .	285
III Ammonia: s.G. of solutions . . . . .	286
IV Atomic weights . . . . .	287
V Capacities of cylindrical vessels . . . . .	288
VI Carbonate of potash: s.G. of solutions . . . . .	289
VII Carbonate of soda: s.G. of solutions . . . . .	290
VIII Caustic alkali: s.G. of solutions . . . . .	291
IX Centigrade degrees equivalent to Fahrenheit . . . . .	292
X Fahrenheit degrees equivalent to Centigrade . . . . .	293
XI Glycerin: refractive indices and specific gravities . . . . .	294
XII Glycerol: theoretical yields from oils and fats . . . . .	295
XIII Hydrochloric acid: s.G. of solutions . . . . .	296
XIV Nitric acid: s.G. of solutions . . . . .	297
XV Oleic and stearic acids: iodine value of mixtures . . . . .	298
XVI Sodium chloride: s.G. of solutions . . . . .	299
XVII Sulphuric acid: s.G. of solutions . . . . .	300
XVIII Viscosities (of some liquids) . . . . .	301
APPENDIX I. A new test for oils and fats . . . . .	302
APPENDIX II. The determination of glycerin in soap . . . . .	304
SUBJECT INDEX . . . . .	306
NAME INDEX . . . . .	313
