978-1-107-66473-9 - The Inequalities in the Motion of the Moon due to the Direct Action of the Planets: An Essay which Obtained the Adams Prize in the University of Cambridge for the Year 1907

Ernest W. Brown

Table of Contents

[More information](#)

CONTENTS.

	PAGE
INTRODUCTION	ix
GENERAL SCHEME OF NOTATION	1
SECTION I. THE EQUATIONS OF VARIATIONS	3
Numerical form of the equations	6
The variation of the moon's true longitude	11
Abbreviation of the formulae	12
Final form of the abbreviated equations	14
SECTION II. TRANSFORMATION OF THE DISTURBING FUNCTION	16
SECTION III. DEVELOPMENT OF THE DISTURBING FUNCTION	26
Leverrier's expansion of $1/\Delta$	26
Calculation of the functions $\beta_{s,p}^{(i)}$	28
Solution of a difficulty	34
Calculation of the coefficients M_i and of their derivatives	35
SECTION IV. A SIEVE FOR THE REJECTION OF INSENSIBLE COEFFICIENTS	37
Construction of the sieve.	41
Orders with respect to e, k , associated with the lunar arguments	45
Method for finding the periods to be examined	45
SECTION V. AUXILIARY NUMERICAL TABLES	49
Adopted values for the constants of the solar system	49
Tables for A_p, B_p, \dots , for each planet	50
The values of M_i and of their derivatives	61
An example of the computation of a primary coefficient	65
The terms retained by the sieve for computation	67
SECTION VI. THE INEQUALITIES IN THE COORDINATES	70
Terms in the moon's longitude	70
Terms in the moon's latitude	87
Terms in the moon's parallax	88
Terms in the mean motions of the perigee and of the node	88
ADDENDUM. FINAL VALUES FOR THE TERMS IN LONGITUDE	89
ERRATA	93
