## Subject index

- Abduction, 278, 573
- Absorption spectrum, 37
- Act of observation, 300
- Action, 72, 102, 375, 393
  - Principle of least —, 10, 389
- Action-at-a-distance, 619
- Adiabatic theorem, 369–371, 499
- Aharonov-Bohm effect, 497–499, 579
  - as geometric phase, 500, 501
- Airy function, 166, 167, 493
- Algebra, 93, 272
  - Boolean algebra, 93
- Algorithm, 659
  - Efficient —, 659
- Alpha particle, 151, 152, 402
- Amplifier, 280
- Ancilla, 644
- Angle, 239
  - operator, 239, 240
- Angular momentum, 193
  - Orbital —, 193, 195–205, 207, 219, 229, 239
    - Eigenfunctions of —, 200–205, 207
    - Eigenvalues —, 200
    - Eigenvalues of —, 198–200
  - Total —, 229, 230
- Anharmonic oscillator, 363, 533
- Annihilation operator, 158, 160, 461
- Anticorrelation, 588
- Antiunitary operator, 262
- Anyon, 247
- Apparatus, 279
  - Classical —, 284
  - Definition of —, 280
  - Macroscopic —, 286
- Associativity, 268
- Atomic number, 403
- Atomic units, 427
- Autocorrelation function, 122
- Avogadro number, 29, 35, 402
- Axial vector, 193, 423
- Azimuthal quantum number, 198
- Back action, 332
- Baker–Hausdorff theorem, 469, 477, 508
- Basis, 21
  - degeneracy, 287, 299
- Change of —, 50–56, 76, 123
  - Orthonormal —, 23
  - Orthonormality, 23
- Bath, 307
- Bayes' rule, 330, 342, 634
- Beam splitter, 14, 15
  - as unitary operator, 119, 121
  - Polarization —, 44, 120
- Bell dispersion-free-state corollary, 583
- Bell first lemma, 583
- Bell first theorem, 584
- Bell inequalities, 588, 593, 595
  - I Bell inequality, 588
  - II Bell inequality, 591
  - III Bell inequality, 593
  - Information-theoretic Bell inequality, 633
  - Quadrilateral information-distance, 635
- Bell operator, 644
- Bell second lemma, 584
- Bell theorem, 588
- Bessel function, 166
- Bessel–Parseval relationship, 76
- Black-body, 31
  - emission, 31
  - problem, 32
- Bloch sphere, 526–528, 670
- Bloch vector, 526, 527
- Bohm–Jacobi equation, 579
- Bohr frequency, 38, 155, 156
- Bohr's atom, 402
- Bohr's magneton, 224, 407
- Bohr's radius, 407
- Bohr–Sommerfeld quantization rule, 379
- Boltzmann constant, 31, 181, 629
- Boltzmann factor, 494
- Boolean function, 650
- Born approximation, 389
- Born expansion, 398
- Born–Oppenheimer approximation, 440–443
- Bose–Einstein condensate, 255, 256
- Boson, 249
  - Bose–Einstein statistics, 249, 253, 254, 463
- Bound state, 106
- Brownian motion, 522

- c-numbers, 22, 62, 284
- Canonical equations
  - Classical —, 9
- Canonical transformation, 118
- Canonically conjugate variables, 9
- Carnot engine, 513
- Casimir effect, 501–506
- Cauchy–Schwarz inequality, 86
- Cavity, 459
- Central potential, 209–211, 445
- Channel, 645
  - Classical —, 645
  - Quantum —, 645
- Characteristic function, 59, 558
  - in quantum optics, 477, 478
  - Classical —, 59
- Charge conjugation, 267
- Classical limit, 373
- Classical mechanics, 7, 10, 308
- Classical statistical physics, 528
- Clebsch–Gordan Coefficients, 232–237
- Cloning, 548
  - No-cloning theorem, 548–550, 646
  - Violation of unitarity, 549, 550
- CNOT gate, 652
- Coarse-graining, 288
- Coherence
  - Collapses and revivals, 491, 493
- Coherent state, 161, 465–470, 472, 474, 480, 491
  - Phase uncertainty, 470
- Collapse operator, 551
- Commutation
  - Commuting observables
    - Theorem, 66
- Commutation relation, 79, 80, 118
  - among different components of the orbital angular momentum, 194, 195
  - among different components of the spin, 222
  - angular momentum–angle, 240, 241
  - position–momentum, 79, 80, 82
- Commutativity, 269
- Commutator, 63
  - Properties of —, 64–67
- Complementarity
  - principle, 19, 20, 90–92, 322, 578
  - Which-path/visibility —, 311–313
- Completeness, 582
  - Complete description, 67, 88, 104
- Compton effect, 34, 35
- Compton wave length, 34, 424
- Configuration space, coordinate, 8
- Configuration space, momentum, 8
- Conservation law of the energy, 35
- Conservation law of the momentum, 35
- Conserved quantity, 551
- Constant of motion, 127, 263, 264
  - Complete set of —, 212
- Continuity
  - Principle of —, 8
- Cook’s theorem, 660
- Coordinates
  - Cylindrical —, 212
  - Spherical —, 200
  - Spheroidal —, 439, 440
- Copenhagen interpretation, 40, 284, 322, 578
- Correctness (of a theory), 568
- Correspondence principle, 72, 101, 102, 180, 181, 194, 219, 224
- Cost
  - Average —, 342, 344
  - Minimum Bayes —, 344
- Coulomb potential, 152
- Coulombian units, 427
- Coupling, 331
  - Coupling function, 281, 283
- CPT theorem, 267
- Creation operator, 158, 160, 461
- Cross section
  - Differential —, 385
  - Total —, 385
- d*-state, 414
- D’Ariano–Yuen theorem, 549
- Damping constant, 522
- Dark output, 19
- Darwin term, 424, 425
- de Broglie wave, 290
- Decision, 308
  - strategy, 341, 344
- Decoherence, 288, 289, 297–308, 462, 514, 515, 539
  - functional, 289
  - parameter, 307
  - time, 307
  - Dissipation–free, 670
- Decohering-histories approach, 288, 289
- Degeneracy, 216
- Degree of freedom
  - Rotational —, 444, 445, 447
  - Vibrational —, 444, 445, 447
- Delayed choice, 320–322
- Delta function, 50
- Density matrix, 174–177, 179, 180
  - Convexity of the — space, 187
  - Off-diagonal elements of —, 278, 298
  - Reduced —, 183
  - Sphere of density matrices, 187, 188, 280
- Density of probability current, 146, 376
- Dephasing, 297, 514
- Detector
  - efficiency, 592, 603
  - Detection operator, 343
- Determination, principle of perfect —, 7, 88
- Determinism, 8, 103
- Detuning, 488

- Deutsch's algorithm, 660  
Diffusion equation, 103  
Dirac picture, 127, 128, 180, 358, 417, 419, 516  
Direct product, 107, 182  
Direct sum, 107, 182  
Discrete energy elements, 32  
Dispersion-free state, 577, 582  
Displacement operator, 469, 471  
Dissipation, 513  
Distance between states, 537  
Distribution function, 59  
Double solution, 578  
Dulong and Petit law, 36  
  
Eavesdropping, 748, 649  
Eberhard theorem, 620  
Ebit, 646  
Effect, 330, 332  
    Commuting —, 332  
    Non-commuting —, 333  
Ehrenfest theorem, 129, 130, 172, 377  
Eigenfunction, 70  
    Non-normalizable —, 70  
    Non-normalized —, 69, 70  
Eigenoperator, 519  
Eigenvalue, 45, 46  
    — equation, 45  
    — of the measured observable, 278  
    Degenerate —, 48, 106, 107, 214  
Eigenvector, 45  
Einstein coefficients, 494  
Einstein's box, 132, 133  
Elby–Bub lemma, 299  
Electric dipole, 218, 365  
    — approximation, 419, 485  
    — momentum, 218  
Electric field, 168, 457  
    — operator, 460  
Electric permittivity in vacuum, 457  
Electromagnetic field  
    Quantization of —, 461  
Electromagnetic spectrum, 456  
Electron, 219  
    — diffraction, 38  
    Magnetic momentum of —, 219  
Emergence of classical world, 300  
Empty wave, 318, 319  
Energy, 14, 78, 135  
    — level density, 378  
Entanglement, 181, 183, 567, 610, 619  
    — swapping, 610–612  
        Conditional —, 618, 619  
        Entangled states, 182  
Entanglement swapping, 613  
Entropy, 181, 332  
    Boltzmann —, 32, 181, 628  
    Relative —, 631, 637  
    Shannon —, 629  
    von Neumann —, 181, 629, 631  
        Subadditivity of —, 630  
        Concavity of —, 630  
        Non-negativity of —, 630  
        Unitary invariance of —, 630  
Environment, 297–299, 304, 640  
EPR state, 644, 645  
Estimation risk operator, 347  
Euler angles, 197, 207  
Euler gamma function, 348, 408  
Event, 564, 565  
Event-ready detectors, 591, 611  
Exchange interaction, 254, 255, 430  
Expectation value, 59, 177, 178  
  
Factorisability, 183  
    Factorized state, 182  
Falsificationism, 568  
Fermi accelerator, 168  
Fermi golden rule, 368  
Fermi level, 434  
Fermion, 249  
    Fermi–Dirac statistics, 249, 251, 252, 431  
Fine-structure constant, 415  
Fine-graining, 288  
Finite-dimensional spectrum  
    — theorem, 47  
Fock state, 465, 466, 560, 561  
Fokker–Planck equation, 522, 523, 528, 530  
Fourier transform, 75  
Fredkin gate, 658  
Frequency  
    Angular, 38, 154, 208  
Fubini–Study distance, 542  
  
Galilei transformations, 111–113  
Gate, 642, 650  
Gauge condition, 457, 459, 486, 507  
    Coloumb gauge, 458  
Gauge transformation, 457  
Gauss law, 424  
General relativity theory, 111, 131  
Generator of rotations, 196, 197  
Generator of the transformation, 263  
Geometric phase, 371, 499, 500  
GHSZ state, 616–619  
Gleason theorem, 583  
Globality versus locality, 321  
Gravitational lens, 320
