- A-frame 91  
 Abutments, forces on 367  
 Accidental eccentricity 395  
 Adhesion, concrete and steel 321  
 Anchor leg 112  
   tower 112  
 Angle of friction 340  
   of repose 346  
 Approximate lever-arm method 314  
 Arch, experimental 368  
   linear 353  
   masonry 351  
   theory of 355  
   three-pinned 361–2  
   with symmetrical loading 358  
   with unsymmetrical loading 361–6  
 Arch design—general conditions 356  
   Fuller's method 365  
 Arches, depth of 368  
   failure of 368  
   loading of 356, 366  
 Area, centre of 21  
   first moment of 22  
 Ashlar, working stresses 330  
 Assumptions, in bending 193  
   in reinforced concrete beams 294  
   in framed structures 46, 47  
 Average buckling stress 381  
 Axial loads, masonry 331–2  
  
 Barr's method 175  
 Bases of columns 404  
 Beam 35, 121, 122  
   and column connections 403  
   bending strain 205–6  
   continuous 122  
   deflection of 240  
   depth of 281  
   doubly reinforced 318  
   fixed 122  
   flitch 289  
   reinforced concrete 293  
   slope of 243–4  
   tee section 309  
   tests 203, 243, 327, 328, 434, 435  
   trussed 122  
   types 122  
   width of 282  
 Beams, continuous 122, 262, 318  
   deflection 240, 249, 260  
   fixed 255  
   framed 122  
   stiffness and strength 253  
 Bearing joints, timber 418–21  
  
 Bearing stress, end to end grain 420–1  
   end to side grain 418–19  
   on rivets 271  
 Bending, external effects 123  
   internal effects 124  
   longitudinal shear 412  
   tests 203, 243, 327, 328, 434, 435  
 Bending moment, curves, parabolic 141  
   definition 132  
   diagrams, graphical method 152  
   maximum 159, 163, 164  
   scale 136, 154  
   sign 132  
 Binding, pitch of 398  
   reinforced concrete column 396, 398,  
   400, 406  
 Bolted stays, rule for 431  
 Bolts 420, 426, 427, 429  
 Bolts and washers (in timber work)  
   427, 428  
   lateral strength 429  
 Bow's notation 26  
 Breaking joint 420  
 Breaking load 437  
 Brickwork, working stresses 330  
   strength 371  
 British Engineering Standards Associ-  
   ation 440  
 British standard, angles 446, 448  
   beams (new sections) 442  
   beams (old sections) 440  
   channels 444  
   specification for Portland cement  
   288, 307  
   tees 452  
 Brittle materials 187, 370  
 Buckling load 374, 378  
   stress 374, 381  
   stress in rafter 387  
 Buildings, stability 64  
 Bulk modulus 182  
 Butt joints 273  
 Buttress, forces in a 341  
  
 Cantilever 122  
   deflection of 245  
   equilibrium of 125  
   experimental 127, 137  
   propped 265  
 Cast iron 287, 371  
   column 388, 389  
   section (I) 216  
   washers 428  
 Ceiling loads 54, 172

## INDEX

- Centre of area 21  
of gravity 21  
Centroid 21, 23, 222  
Chain-riveting 276  
Circular sections, value of  $g$  376  
Closed link polygon 32, 33, 34  
Closing line or link 33  
Coefficient of elasticity 181  
of friction 340  
Cold working 187  
Columns 374  
cast iron 388  
eccentric loading 392  
Euler's theory 377  
fixed ends 386  
fixing of ends 379  
flat ends 386, 415, 416  
Johnson's formula 381  
Johnson-Euler formula 382  
of medium length 381  
mild steel 386  
pinned ends 386  
Rankine-Gordon formula 389–90  
ratio of slenderness 374  
reinforced concrete 396  
slender 374  
timber 415  
Combined thrust and bending 396  
Commercial elastic limit 185  
Comparison of solid beam sections 219  
Complementary shear stress 224  
Components 2  
rectangular 3, 4  
Compound girders, riveting 278, 284  
Compression modulus 201  
reinforcement 318  
reinforcement, tying in 321  
testing machine 373  
tests 371, 372  
tests, timber 410  
Compressive elastic limit 435  
strength on inclined surfaces 422  
strength, steel 370  
stress 180  
Compressometer 190  
Concentrated loads 134, 148  
Concrete 288, 307  
and steel, adhesion 321  
dam 343  
normal 289  
placing plant 14, 32  
Portland cement 307  
reinforced 288  
strength 307, 372  
stress—strain graph 293  
tensile strength 288  
working stresses 307, 330  
Concurrent forces 2  
non-coplanar forces 86, 87  
Conditions of equilibrium 7, 9, 13, 34  
Connections, riveted 270  
beams to columns 403  
to steel girders 285  
to timber beams 434  
Continuous beams 122, 262, 318  
rafter 387  
slabs 318  
Counter-braced frames 45, 176  
Couples 34, 125, 128  
experiment 129, 130  
Cross grain in timber 415  
Curtailment of flange plates 282  
Curves, sum or integral 164–5  
  
Dam, in concrete 343  
pressures on base 345  
Dead loads 51, 357, 434  
Defects in timber 414  
Deficient frames 45  
Deflection due to shear 239  
of beams 240  
of cantilevers 245  
of fixed beams 260  
of freely supported beams 249  
of timber beams 434  
Deformation of structural materials 178  
Depth of arches 368  
of beams 281  
of foundations 350  
Derrick crane 74, 82, 105, 107  
stayed mast 104  
towers 111, 420  
towers, forces in 114  
towers, wind pressure 115, 177  
Derricking 74  
Design of riveted joints 277  
of solid beam sections 219  
Diagram of shear stress 233, 234  
of stress 196  
of stress-difference 230, 232, 234  
Distributed loading 140  
Distribution of load, effect 148  
of shear stress 229  
Double cover joint 274  
reinforcement 318  
Ductile materials, ductility 186  
Dynamics 1  
  
Earth pressures, graphical method 348  
Rankine's method 346  
Eccentric loads, columns 392, 400  
effect (experiment) 335  
in masonry 331, 333, 334, 337  
in slender columns 393  
reinforced concrete column 400  
Eccentrically loaded stanchion 393  
Eccentricity, accidental 395  
Economic ratio of reinforcement 299  
Effective area 397  
Efficiency of riveted joints 275

## INDEX

Weights (*cont.*)

- of roof trusses 52
  - of soils 346
  - of steel and iron 287
- White deal 409, 413, 416, 422, 437
- Width of beam 282
- Wind pressure 51, 115
- Working factor, columns 380
- Working stresses 184
- masonry 330
  - reinforced concrete 294, 307
  - riveted joints 272, 287
  - steel and iron 287

Working stresses (*cont.*)

- timber 413
- Wrought iron 287
- Yield point 184
- stress 184, 189
- Young's Modulus 181, 182
- experiment 182
- Zero readings 19, 30, 54, 70, 83, 99,
- 139, 171
  - slope 255
- Zig-zag riveting 276
