

Index

- Ω_p
 - metric completion of $\overline{\mathbb{Q}_p}$, 37
- δ_p -character, 82
- δ_p -derivation on \mathbb{Z}_p , 57
- \mathbb{Q}_p , 8
 - algebraic properties, 17
 - analytic properties, 17
 - construction, 9
 - locally compact, 17
 - norm, 10
 - topology of, 15
 - unramified extension \mathbb{Q}_p^{ur} , 36
- \mathbb{Z}_p , 13
 - compactness, 15
 - definition, 14
 - unramified integers \mathbb{Z}_p^{ur} , 36
- p -adic
 - distance, 8
 - integers, 14
 - norm, 8
 - order, 8
 - range of norm, 10
 - representation, 12
- p -adic norm, 10
 - extension to $\overline{\mathbb{Q}_p}$, 35
- p -derivation, 56
 - additivity, 56
 - associated homomorphism, 57
 - Leibniz's rule, 56
 - linear, 60
- ádele ring, 3
- affine n -space, 69
- affine space, 38
- affine variety, 38, 70
- algebraic closure
 - of \mathbb{Q}_p , 34
- algebraic variety, 70
- analytic function, 49
 - of level m , 50
- analyticity of a δ -function, 105
- arithmetic differential operator, 57
- arithmetic jet space, 74, 79
- Artin–Hasse exponential, 31
- Bernoulli numbers, 2
- binomial series, 24
- Cauchy sequences, 9
- characteristic function of disc
 - expansion as a δ -function, 108
 - Mahler's expansion, 51
- compactness of \mathbb{Z}_p , 16
- completion, 9
- completion of a ring at an ideal, 71
- congruence, 14
- continuous functions, 25
- convergence of series, 23
- coordinates
 - harmonic p -adic coordinates, 120
 - standard p -adic coordinates, 107
- discs, 15
- Dwork's lemma, 32
- exponential function, 30
- Fermat quotient, 1, 5
- field
 - p -adic numbers, 1, 8
 - algebraically closed, 33, 70
 - of fractions, 15
 - residue field, 61
- Hansel's lemma, 20
- hypersurface, 41
- idèle group, 3
- index of ramification, 35
- isosceles triangle property, 9
- jet bundles, 66
 - classical jet spaces, 66
- Legendre symbol, 58
- Lift of Frobenius, 75

- local ring, 67
- localization at prime ideal, 67
- locally constant function, 51
- locally ringed space, 69
- Möbius function, 30
- Mahler's expansion, 26
- Neumann operator, 40
- Newton's iteration, 18
- non-Archimedean norm, 9
- prime
 - degree of a prime, 110
 - singular, 110
 - Wronskian of p^n , 116
 - Wronskian of p , 110
 - Wronskian quotients, 110
- projective space, 38
- projective variety, 38
- rational normal curve, 38
- restricted power series, 48
- restricted sequence, 26
- Riemann zeta function, 2, 41
- ringed space, 68
- roots of unity
 - in \mathbb{Q}_p , 20
- scheme, 69
 - affine scheme, 69
 - locally Noetherian, 70
 - regular, 72
- spectrum of a ring, 68
 - principal open sets, 68
 - Zariski topology, 68
- Teichmüller representation, 52
- Theorem
 - Hasse–Minkowski's, 2
 - Mahler's, 26
 - Strassmann's, 53
 - Wilson's, 33
- Weil zeta function, 40
 - Weil conjectures, 43
- Witt ring, 128
