

CONTENTS

CHAPTER I

INTRODUCTION

General description of the Peak District. Types of scenery. Rocks and soils. Soils and their characteristic plants. Flora and vegetation. Vegetation maps. Plant communities. Vegetation maps and floristic maps. The value of vegetation maps. Rainfall. Smoke. Temperature. The upper atmosphere; temperatures; direction of the wind; velocity of the wind; humidity of the atmosphere. Note on the use of the words "acidic" and "basic." pp. 1-37

CHAPTER II

WOODLAND ASSOCIATIONS

Distribution of the woods. Woodland associations of Great Britain. Woodland associations of the southern Pennines. Factors related to the distribution of the woodland associations. Oak woods of *Quercus Robur*. Transitional woods of *Quercus Robur* and *Q. sessiliflora*. Oak woods of *Quercus sessiliflora*; trees and shrubs; variation of vegetation in the oak woods; influence of shade on the ground vegetation. Alder-willow thickets. Birch woods of *Betula pubescens*; the primitive birch-forest. Ash woods of *Fraxinus excelsior*; semi-natural woods and plantations on the limestone slopes; trees and shrubs; herbaceous vegetation. Comparison of the woodland plants of the southern Pennines. pp. 38-87

CHAPTER III

SCRUB ASSOCIATIONS

Past and present upper altitudinal limit of trees. Buried timber in the peat. Degeneration of woodland. Distribution of character of the existing scrub. Scrub in other districts. Relation of the ground vegetation of woodland to retrogressive scrub. Progressive and retrogressive scrub. Comparison of the types of retrogressive scrub. pp. 88-102

CHAPTER IV

GRASSLAND ASSOCIATIONS

Distribution of the grassland. Types of grassland. I. Grassland of the sandstones and shales: siliceous grassland; (1) *Nardus* grassland; mixed siliceous grassland; (2) *Molinia* grassland. Relationships of the plant associations of the siliceous soils. II. Grassland of the limestone: calcareous grassland; mixed calcareous grassland: transitional calcareous grassland. Calcareous heath. Pseudo-calcareous heaths. Species of the calcareous grassland and the siliceous grassland. Relationships of the plant associations of the siliceous and the calcareous soils. pp. 103–133

CHAPTER V

ASSOCIATIONS OF ROCKS AND SCREES

The limestone cliffs: limestone screes. Sandstone rocks and screes. Are the plants of cliffs and screes lithophytes? pp. 134–143

CHAPTER VI

MARSH AND AQUATIC ASSOCIATIONS

General distribution of the marsh (or swamp) and aquatic associations. Non-calcareous waters. Swamps on the sandstones and shales. Calcareous waters. Swamps on the limestone. Ruderal marsh species. Reed swamps. The vegetation of quickly flowing streams. Alien aquatic plants. The relation of calcium salts to the flora and vegetation. pp. 144–162

CHAPTER VII

MOORLAND ASSOCIATIONS

General distribution of moorland. Classification of moorland associations. The fen formation. "Hochmoor" and "Flachmoor." Moors and fens. Bryophytes of the moors. Factors related to the distribution of the moorland associations. Heather moors. Transitional association of heather moor and siliceous grassland. Bilberry moors. Transitional association of heather moor and bilberry moor. Cotton-grass moors. Transitional association of cotton-grass moor and siliceous grassland. Transitional association of heather moor and cotton-grass moor. Retrogressive moors. The Peak of Derbyshire. Bare peat. Sub-Alpine grassland. Zonation of the moorland and grassland associations. List of species of the moor formation. pp. 163–198

CHAPTER VIII

CULTIVATED LAND: CULTURE ASSOCIATIONS

Origin of the cultivated land. Nature of the cultivated land. Permanent pasture. The arable land. Plantations. Afforestation. Utilization of the peat-moors. pp. 199–213

CONTENTS

ix

APPENDIX I

SUMMARY AND RELATIONS OF THE PLANT COMMUNITIES
 OF THE PEAK DISTRICT

1. The Plant Formation of Calcareous soils (Calcarion).
 2. The Plant Formation of Siliceous soils (Silicion).
 3. The Plant Formation of the Acidic Peaty soils (Oxodion).
 4. The Relationships of the Oxodion and the Silicion.
 5. The Plant Formation of Fresh Waters.
- pp. 214-217

APPENDIX II

SUMMARY OF BRITISH PLANT FORMATIONS AND ASSOCIATIONS

pp. 218-221

APPENDIX III

- List of References pp. 222-228
- INDEX pp. 229-235

LIST OF ILLUSTRATIONS

FIGURE	PAGE
1. Subsoil map of the Peak District (northern area)	6
2. Subsoil map of the Peak District (southern area)	11
3. Oak Wood of <i>Quercus sessiliflora</i> near its upper altitudinal limit. Ground vegetation of Bilberry and silver Hair- grass	facing 38
4. Oak Wood of <i>Quercus sessiliflora</i> . Shrubby undergrowth	" 42
5. Oak Wood of <i>Quercus sessiliflora</i> . Ground vegetation of Blue-bells	" 46
6. Oak Wood of <i>Quercus sessiliflora</i> . Ground vegetation of Bracken and wood Soft-grass	" 50
7. Oak Wood of <i>Quercus sessiliflora</i> . Ground vegetation of Bilberry and silver Hair-grass	" 54
8. Birch Wood of <i>Betula pubescens</i> . Ground vegetation of Rush and tufted Hair-grass	" 60
