## PREFACE

The present volume has its origin in three articles published in the *Geological Magazine* in 1921. These articles form the foundation of the second, fifth and tenth chapters, and I am indebted to the courtesy of the Editor, Dr R. H. Rastall, F.G.S., for permission so to make use of them. The writing of the remaining chapters is due to a suggestion made to me by the late Sir Archibald Geikie, O.M., F.R.S., and my one regret in connexion with this book is that he did not live to see the result of his kindly interest.
