

General index

As well as names, this index lists topics selected for their particular relevance to the production, importation, distribution, ownership, use and survival of books in Britain. Subject entries are sometimes presented in hierarchical rather than alphabetical order for clarity. Compiled by the editors.

Bibliographic index of printed books

II · References to books printed before 1501, not in STC

Since there is not a single bibliographical reference system including all books printed after 1500 and thus placing individual works in a larger context, no attempt is made here to index the references given in the text to a variety of catalogues and bibliographies. For incunabula, only the *Gesamtkatalog der Wiegendrucke* and F. R. Goff's *Census* are indexed. Both are a convenient entry point to the ISTC database, and lead to further bibliographical information. In a few rare cases, by default, L. Hain's *Repertorium Bibliographicum* and M. F. A. G. Campbell's *Annales*, both with supplements, are quoted.
