CAMBRIDGE LIBRARY COLLECTION

Books of enduring scholarly value

Cambridge

The city of Cambridge received its royal charter in 1201, having already been home to Britons, Romans and Anglo-Saxons for many centuries. Cambridge University was founded soon afterwards and celebrates its octocentenary in 2009. This series explores the history and influence of Cambridge as a centre of science, learning, and discovery, its contributions to national and global politics and culture, and its inevitable controversies and scandals.

Annals of Cambridge

Charles Henry Cooper charted over half a millennium of life at Cambridge in the five volumes of *Annals of Cambridge*. Cooper practised as a solicitor in Cambridge, and was also town clerk from 1849 until his death in 1866. He was a keen historian and devoted a great deal of time to archival research, particularly into local history. Drawing on extensive public and private records, including petitions, town treasurers' accounts, restoration records, death certificates, legal articles and letters to ruling royalty, Cooper compiled a comprehensive chronological history of Cambridge, documenting the 'city of scholars' through its tumultuous political and religious growing pains. It was published in parts, in the face of considerable opposition from the university authorities, but was eventually acclaimed as an authoritative account. This first volume, published in 1842, spans the centuries from the town's beginnings to the surveys of the colleges in 1546.

Cambridge University Press has long been a pioneer in the reissuing of out-of-print titles from its own backlist, producing digital reprints of books that are still sought after by scholars and students but could not be reprinted economically using traditional technology. The Cambridge Library Collection extends this activity to a wider range of books which are still of importance to researchers and professionals, either for the source material they contain, or as landmarks in the history of their academic discipline.

Drawing from the world-renowned collections in the Cambridge University Library, and guided by the advice of experts in each subject area, Cambridge University Press is using state-of-the-art scanning machines in its own Printing House to capture the content of each book selected for inclusion. The files are processed to give a consistently clear, crisp image, and the books finished to the high quality standard for which the Press is recognised around the world. The latest print-on-demand technology ensures that the books will remain available indefinitely, and that orders for single or multiple copies can quickly be supplied.

The Cambridge Library Collection will bring back to life books of enduring scholarly value across a wide range of disciplines in the humanities and social sciences and in science and technology.
