## CAMBRIDGE LIBRARY COLLECTION

*Books of enduring scholarly value*

### **History**

The books reissued in this series include accounts of historical events and movements by eye-witnesses and contemporaries, as well as landmark studies that assembled significant source materials or developed new historiographical methods. The series includes work in social, political and military history on a wide range of periods and regions, giving modern scholars ready access to influential publications of the past.

### **Society in America**

The British scholar Harriet Martineau spent two years travelling throughout the United States before writing her three-volume commentary, *Society in America*, in 1837. Her lengthy journey began in New York in the autumn of 1834, less than sixty years after the birth of the United States, and she immersed herself in the politics, economics, civilisation and religions of the country before returning to England in the summer of 1836. Her travels took her to the nation's capital, where she enjoyed the hospitality of the president, witnessed Supreme Court proceedings and visited both houses of Congress. She also went to prisons, hospitals and mental institutions, literary and scientific foundations, factories, plantations and farms around the land; lived in farmhouses and log cabins; and travelled by horse, stagecoach and steamboat. This second volume is devoted to the United States economy of the 1830s, examining American agriculture, transportation, manufacturing and commerce.

Cambridge University Press has long been a pioneer in the reissuing of out-of-print titles from its own backlist, producing digital reprints of books that are still sought after by scholars and students but could not be reprinted economically using traditional technology. The Cambridge Library Collection extends this activity to a wider range of books which are still of importance to researchers and professionals, either for the source material they contain, or as landmarks in the history of their academic discipline.

Drawing from the world-renowned collections in the Cambridge University Library, and guided by the advice of experts in each subject area, Cambridge University Press is using state-of-the-art scanning machines in its own Printing House to capture the content of each book selected for inclusion. The files are processed to give a consistently clear, crisp image, and the books finished to the high quality standard for which the Press is recognised around the world. The latest print-on-demand technology ensures that the books will remain available indefinitely, and that orders for single or multiple copies can quickly be supplied.

The Cambridge Library Collection will bring back to life books of enduring scholarly value across a wide range of disciplines in the humanities and social sciences and in science and technology.
