CAMBRIDGE LIBRARY COLLECTION

Books of enduring scholarly value

History

The books reissued in this series include accounts of historical events and movements by eye-witnesses and contemporaries, as well as landmark studies that assembled significant source materials or developed new historiographical methods. The series includes work in social, political and military history on a wide range of periods and regions, giving modern scholars ready access to influential publications of the past.

The Bettesworth Book

In 1901, businessman George Bourne published this biography of his gardener, Frederick Bettesworth. This unusual ethnographic account, written in a modified dialect, uniquely captures rural life in late nineteenth-century England. The book bridges the class divide between 'master and man' as Bourne, through the course of many interviews, gets to know his down-to-earth day labourer, and comes to understand peasant life and poverty as seen through the eyes of Bettesworth. In the Introduction, Bourne precisely lays out his interviewing methodology, which allows the reader to understand both men as the conversations, and the book, progress. Through 35 chapters, Bourne opens a window on the social relationships between the classes amid descriptions of the work, childhood, education, and family life of the region's agricultural workers. Bourne is humbled and enriched by his friendship with Bettesworth, calling him the 'voice of Britain', a man 'rugged, unresting, irresistible'.

Cambridge University Press has long been a pioneer in the reissuing of out-of-print titles from its own backlist, producing digital reprints of books that are still sought after by scholars and students but could not be reprinted economically using traditional technology. The Cambridge Library Collection extends this activity to a wider range of books which are still of importance to researchers and professionals, either for the source material they contain, or as landmarks in the history of their academic discipline.

Drawing from the world-renowned collections in the Cambridge University Library, and guided by the advice of experts in each subject area, Cambridge University Press is using state-of-the-art scanning machines in its own Printing House to capture the content of each book selected for inclusion. The files are processed to give a consistently clear, crisp image, and the books finished to the high quality standard for which the Press is recognised around the world. The latest print-on-demand technology ensures that the books will remain available indefinitely, and that orders for single or multiple copies can quickly be supplied.

The Cambridge Library Collection will bring back to life books of enduring scholarly value across a wide range of disciplines in the humanities and social sciences and in science and technology.
