## CAMBRIDGE LIBRARY COLLECTION

*Books of enduring scholarly value*

### Music

The systematic academic study of music gave rise to works of description, analysis and criticism, by composers and performers, philosophers and anthropologists, historians and teachers, and by a new kind of scholar - the musicologist. This series makes available a range of significant works encompassing all aspects of the developing discipline.

### A Dictionary of Music and Musicians (A.D. 1450–1880)

This is a reissue of the first edition of Sir George Grove's Dictionary of Music and Musicians, which has since evolved over more than a century to become the largest and most authoritative work of its kind in English. The project grew in the making: the title page of Volume 1 (1879) states that the book is 'in two volumes', in Volume 2 we read 'three volumes', and by the time Volume 4 appeared in 1889 there was also a 300-page appendix and a separate index volume. The dictionary was an international undertaking, with contributors from Paris, Leipzig, Berlin, Vienna and Boston alongside those based in Britain. It was 'intended to supply a great and long acknowledged want' arising from the increased interest in all aspects of music, which was 'rapidly becoming an essential branch of education', and to cater for the professional while being accessible to the amateur. It is a fascinating document of musical tastes and values in the late Victorian period.

Cambridge University Press has long been a pioneer in the reissuing of out-of-print titles from its own backlist, producing digital reprints of books that are still sought after by scholars and students but could not be reprinted economically using traditional technology. The Cambridge Library Collection extends this activity to a wider range of books which are still of importance to researchers and professionals, either for the source material they contain, or as landmarks in the history of their academic discipline.

Drawing from the world-renowned collections in the Cambridge University Library, and guided by the advice of experts in each subject area, Cambridge University Press is using state-of-the-art scanning machines in its own Printing House to capture the content of each book selected for inclusion. The files are processed to give a consistently clear, crisp image, and the books finished to the high quality standard for which the Press is recognised around the world. The latest print-on-demand technology ensures that the books will remain available indefinitely, and that orders for single or multiple copies can quickly be supplied.

The Cambridge Library Collection will bring back to life books of enduring scholarly value (including out-of-copyright works originally issued by other publishers) across a wide range of disciplines in the humanities and social sciences and in science and technology.

## P R E F A C E.

---

THE general aims and intentions of the Dictionary of Music and Musicians were stated in the Preface to Volume I., and need not be repeated here. The work now appears before the public in a complete form. The large demand for it, which has gone on steadily increasing, not only in this country and the United States of America, but on the Continent of Europe, shows that on the whole the book has fulfilled the intentions with which it started. Shortcomings there will always be in a work of this description, arising from inexperience, from the progress of the general subject, or from deaths of old musicians and arrivals of new ones ; but it is hoped that these have been met by the Appendix promised at the outset. For this very important part of the undertaking the Editor has secured the able co-operation of the gentleman whose name appears on the title-page of Volume IV., and who has been of signal assistance to him in a very trying portion of his work. To Mr. Fuller Maitland, and to all the other contributors to the Dictionary, who have so successfully and so cheerfully laboured throughout the long course of its publication, the Editor here returns his heartfelt thanks for their valuable assistance ; and embraces the opportunity to express his pride and pleasure at having had the aid of so distinguished an array of workers. To the publishers he offers his sincere acknowledgements for much patience, and many a friendly act.

It would be invidious to single out special articles in addition to those already mentioned, where all have been written with such devotion and intelligence ; but the Editor cannot help mentioning, amongst many others, the long articles on Schumann, Spontini, and Weber, by Dr. Spitta of Berlin ; on Sonata, Symphony, and Variations, by Dr. Hubert Parry ; on Song, by Mrs. Edmond Wodehouse ; on Scotish Music, by Mr. J. Muir Wood ; on Wagner, by Mr. Dannreuther ; on the Organ, by Mr. E. J. Hopkins ; the Piano by Mr. Hipkins ; the Violin by Mr. Payne ; and those on Schools of Composition, and other historical subjects, by Mr. W. S. Rockstro.

A copious Index of the whole four volumes has been prepared by Mrs. Wodehouse, and will shortly be published in a separate volume.
