## INDEX

- Adaptation, in relation to divergence of species, Darwin's recognition of, 108, 109
- Agriculturalists, ideas of creation, 5, 6
- ARNOLD, MATTHEW, on Lucretius and Darwin, 3, 4
- Auvergne, N. Desmarest on, 17; Scrope on, 35; visited by Lyell and Murchison, 56, 57; their memoir on, 58
- 'Beagle,' H.M.S., Darwin's voyage in, 98, 99; narrative of, 106
- BONNEY, T. G., estimate of amount of Lyell's travels by, 56, 57
- Botanical works of Darwin, 141
- British Critic*, Whewell's review of Lyell in, 53
- BRODERIP, W. J., aid given to Lyell by, 65; Vol. II. of *Principles* dedicated to, 65
- BROWN, ROBERT, assistance to Lyell by, 47
- BUCKLAND, Dr, on infant Geological Society, 26; champion of 'Catastrophism' in England, 27; his eccentricity, 42-44; 'Equestrian Geology' of, 28; influence on Lyell, 34, 44; 2nd edition of Vol. I. of *Principles* dedicated to, 44; his opposition to Lyell, 71
- Cambridge, Darwin at, 97, 98
- CANDOLLE, A. P. DE, on struggle for existence, 107
- Catastrophism, origin of idea of, 14, 15; defined, 22; origin of term, 22; connexion with orthodoxy, 21; championed by Buckland, Sedgwick &c., 27; by Cuvier, 31, 50, 102; opposition by Lyell and Darwin to, 105
- Centres of Creation, Lyell's views on, 65
- CHAMBERS, ROBERT, publishes *Vestiges of Creation*, 92; his reasons for anonymity, 93
- Chemists, part played in early days of Geological Society by, 26
- Christ's College, Cambridge, the home of Milton and Darwin, 13; of Paley, 108
- CLODD, E., his *Pioneers of Evolution*, 16
- Continuity, term for Evolution suggested by Grove, 23
- CONYBEARE, W. D., advocacy of Catastrophism, 27; criticism of Hutton, 28; misconception of Hutton, 29; on formation of Thames Valley, 58; friendship with Lyell, 69
- Creation, legends of, 5-7; use of term by Lyell and Darwin,

- 11; contrast of their views with those of Milton, 12, 13
- Criticisms of the *Principles of Geology*, 68, 69, 70, 71; of the *Origin of Species*, 132–139
- CUVIER, his strong support of Catastrophism, 31, 46, 50, 102
- DARWIN, CHARLES, nobility of character, 3; his use of term ‘Creation,’ 11; on grandeur of idea of Evolution, 12; his devotion to Lyell and the *Principles of Geology*, 63, 73–75, 78; his horror of slavery, 76; opposition to Catastrophism, 77; opinion of Lamarck’s works, 90, 91: on the *Vestiges of Creation*, 94; his dislike for speculation, 101; his optimism and courage, 77; his birth and education, 95, 96; life at Edinburgh, 97; at Cambridge, 97, 98; voyage in the ‘Beagle,’ 99, 100; first awakening to the idea of Evolution, 102, 104; work with Lyell at Geological Society, 105; begins ‘species work,’ 106; influence of Malthus’s work on, 107; intercourse with Wallace, 113; action in respect to theory, 128, 129; his first literary ambitions, 116; difficulties of work caused by ill-health, 117, 118, 119; his loss of appreciation for music and literature, and its cause, 134, 135; later writings on Evolution, 141, 144; his declining years, 147, 158, 159; his death, 147; present position of his theory of Natural Selection, 155, 156, 159
- DARWIN, ERASMUS, his independent conception of Lamarckism, 91, 92; absence of influence on his grandson, 95, 101
- DARWIN, ERASMUS (the younger), advice given to Charles on publication, 122
- DARWIN, FRANCIS, edited *Life and Letters &c.*, 121; extracts from C.D.’s note-books &c., and *Foundations of the Origin of Species*, 123; on his father’s health, 118
- DARWIN, Mrs., her care of her husband’s health, 118; read proofs of *Origin of Species*, 132
- DAUBENY, C. G. B., assists Lyell in his researches, 47
- DE LA BECHE, H., his attitude with respect to evolution, 71
- DESHAYES, G. B., assists Lyell in conchological work, 66
- DESMAREST, N., work in Auvergne, 17; evolutionary views of, 17, 20
- Earthworms, Darwin’s work on, 147
- Edinburgh, Darwin’s life at, 97; Wernerian Society at, founded by Jameson, 21, 25
- Egypt, idea of inorganic evolution originated in, 15
- Entomology, influence of, on Lyell, 42, 57; on Darwin, 96; on Wallace, 110
- ‘Equestrian Geology,’ popularity of, at Oxford, 27; at Cambridge, 28

## INDEX

167

- Evolution, in *organic* and *inorganic* world, 14; how ideas originated, 15–16, 82, 83; revolution effected by, 1, 32, 159; causes of opposition to, 20, 21, 155; opposition of Sedgwick and Whewell, 83; support of Herschel, 83
- Euclid, influence on Darwin, 103
- FARADAY, M., assistance given to Lyell by, 47
- FITTON, Dr, on supposed indebtedness of Hutton to Generali, 18; and of Lyell to Hutton, 18; on causes of Hutton's failure to reform geology, 23, 25; his attitude towards Lyell's views, 30, 71
- Fluvialists, 58
- FORBES, DAVID, intercourse with Darwin, 119
- Fossil bones, discovery of, in South America first suggests to Darwin mutability of species, 102
- Foundations of the Origin of Species*, 123
- FRAZER, J. G., on legends of creation, 5, 7
- Galapagos Islands, influence of study of fauna on Darwin, 104
- GENERELLI, advocacy of Evolution, 17, 20
- Geographical distribution, Lyell on, 65; Wallace on, 146
- Geological Society, foundation of, 25; early history, 26; connexion of Lyell with, 44, 71; of Darwin, 100, 105; of Scrope, 50; discussions on rival doctrines at, 24, 25, 29, 30, 60, 76, 77, 105
- Geology, Darwin's interest in, 96, 99, 124, 147, 158
- GIBBON, his influence on Lyell, 52, 67
- GREENOUGH, G. B., founds Geological Society and first President, 26; his strong support of Wernerianism, 26, 29
- GROVE, R., suggests term 'Continuity,' 23
- GÜNTHER, Dr, his estimate of number of species of animals, 10
- HAECKEL, E., credits Lyell with early conviction of Evolution, 84
- HENSLAW, J. S., friendship for and help of Darwin, 97, 98, 99; opposition to Evolution, 27, 72
- Heredity, early recognition of importance, 9
- HERSCHEL, J., belief in Evolution, 12, 71; correspondence with Lyell, 83, 85, 183
- HOFF, C. von, influence of his works on Lyell, 49
- HOOKER, J. D., friendship with Lyell's father, 126; voyage to Antarctic with Ross, 126; introduction to Darwin, 126; correspondence with, 127; assistance to Darwin, 126; advice to, 129; on origin of Australian flora, 139; friendship with Lyell, 79, 126
- HUTTON, his *Theory of the Earth*, 17, 18, 19, 20; rarity of the book, 30; small influence of, 21; sup-

## INDEX

- posed infidelity and persecution of, 21, 22, 25, 69; Lyell's mistaken views on, 54; difference of his theory from Lyell's, 53
- HUXLEY, T. H.**, early views on distinction of Uniformitarianism and Evolution, 23; later view of identity, 23, 24; influence of Darwin on, 24, 127, 144; on 1st edition of *Principles*, 67, 80, 81; argues for Lyell's belief in Evolution, 84; reviews *Origin of Species*, 136, 137; reply to Bishop of Oxford, 138; defence of Darwinism, 140; on Darwin's death, 147, 148; on Lyell's death, 80
- Hybridity, Lyell's discussion on, 65, 103
- Hypotheses of Creation, twofold character of, 5–8
- Ideas *v.* Actions, Wallace on, 4
- Independent discovery of Natural Selection by Wallace, 113; Darwin's letter on, 113
- Italian geologists, their anticipation of evolutionary ideas, 17
- JACOB**, his frauds based on ideas of heredity and variation, 9
- JAMESON, R.**, founds Wernerian Society 1807, 25; influence on Darwin, 97
- Journal of Researches*, by Darwin, 106; dedicated to Lyell, 72
- King's College, London, Lyell professor at, 65, 66
- Kinnordy, Lyell at, 42, 43, 46
- KIRWAN, DE LUC, and WILLIAMS**, opposition to Hutton, 25
- LAMARCK**, his *Hydrogéologie*, 87; *Philosophie Zoologique*, 88; Lyell's admiration of, 64, 89; criticism of theory, 64, 90; views of Darwin on, 90, 91; on geological time, 155
- Lectures by Lyell, 65, 66
- Linnean Society, papers of Darwin and Wallace at, 112, 129, 130
- Literature, Lyell and, 52, 67; Darwin and, 116, 117, 120; his loss of interest in, 134, 135
- LOCKHART and Quarterly Review**, 60
- LUCRETIUS**, belief in Evolution, 3, 4
- LYELL, CHARLES**, use of term 'Creation,' 11; on grandeur of idea of Evolution, 12; birth and ancestry, 41; education, 34, 42; influence of Buckland on, 34, 42–44; on Cuvier, 46; change of views not due to Hutton's works, 45; but to travel and observation, 45; in East Anglia, 45; in Strathmore, 46, 47; abandons career as barrister for geology, 48; work with Dr Mantell, 48; visits to Continent, 48; influence of von Hoff's works, 49; of Scrope, 50; his remarks on Hutton's supposed heresies, 51, 54; influence of Gibbon on his literary style, 52; praise of Hutton and Playfair at later date, 53; review of Scrope's book on Auvergne, 56; visit to Auvergne with Murchison, 56; advocacy of travel for geologists, 56; journeys in Italy, 58;

169

- Lyell on Murchison, 57; Murchison on Lyell, 58; Lyell's avoidance of controversy, 63; differences of opinion with Scrope, 62, 63; attention to literary style, 65; professorship at King's College, London, 65, 69; lectures, 66; controversies at Geological Society, 71; aid of Darwin in discussions, 71; his friendship with Darwin, 73, 104, 105; his extreme caution, 75–77; candour in finally accepting Natural Selection, 77; opposition to his views, 83, 84; his belief in Evolution at an early date, 81, 84–86; his anticipation of 'Mimicry,' 85, 86; his action in Darwin-Wallace episode, 113, 129; induces Darwin to commence writing his work, 128; his attitude towards theory of Natural Selection, 139, 140, 145; great influence of Lyell's works on Darwin and Evolution, 150; misrepresentation of his views, 152–154; his declining years, 157; last hours, 80; Hooker's tribute to his memory, 79, 80
- LYELL, CHARLES (the elder), botanist and student of Dante, 41; intercourse with the Hookers, 126
- MALTHUS, *On Population*, influence of work on Darwin, 107; on Wallace, 112
- MAN, descent of, Darwin's work on, 142, 144; Wallace's views on, 144
- MANTELL, Lyell's researches with, 48; correspondence with, 55, 89
- MATTHEW, P., anticipation of theory of Natural Selection, 92
- MILTON, description of creation, 13; Darwin's early love of his poetry, 134; at Christ's College, Cambridge, 13
- Mimicry, doctrine of, Lyell's early recognition of importance, 85, 86
- Modern Science, Darwin and*, 148
- MURCHISON, accompanies Lyell to Auvergne, 56; opinion of Lyell, 57; Lyell's opinion of, 57, 58; 3rd Vol. of *Principles* dedicated to, 66; correspondence with, 59
- MURRAY, JOHN, and *Quarterly Review*, 60; publishes Lyell's works, 60; publishes Darwin's works, 130; his reminiscences of Darwin, 132
- Music, Darwin's loss of power to appreciate, and its cause, 134, 135
- Natural Selection, theory of, defined by Huxley, 106; fore-stalled by Wells, Matthew &c., 18, 19; first conception of by Darwin, 107; by Wallace, 112 'Neptunism' or 'Wernerism' and Catastrophism, 18
- NEWTON, Professor A., on vague hopes of solution of 'species question' before Darwin, 94, 109
- Origin of Species*, first idea of, 121; plan proposed to follow

## INDEX

- Principles*, 123; first sketch of 1842, enlarged draft of 1844, commencement of great treatise on Evolution in 1856, interruption by arrival of Wallace's papers, 128, 129; the 'Abstract' or *Origin of Species* commenced, 130; finished, 131; reception of, 132-139; influence of, 1, 159
- OSBORN, H. F., his *From the Greeks to Darwin*, 16; on Lamarck, 87
- PALEY, his influence on Darwin, 108
- PHILLIPS, JOHN, his attitude towards Lyell's views, 30, 71
- Philosophers, on Evolution, 16, 82
- PLAYFAIR, JOHN, his *Illustrations of the Huttonian Theory*, 29; explains the causes of Hutton's failure, 30
- 'Plutonism,' 'Vulcanism,' or 'Huttonism,' 18
- Poets and Evolution, 16
- PRESTWICH, Sir J., opposition to Lyell's views, 72
- PREVOST, CONSTANT, aid to Lyell, 50; opposition to Cuvier, 50
- PRIESTLEY, persecution of, 21, 69
- Principles of Geology*, first idea of, 55; early draft sent to publisher in 1827, 56; withdrawn and rewritten in 1830, 56; issue of first volume, 63; success, 64; review by Scrope, 60-62; decision to confine Vol. II. to Organic Evolution, 65; 3rd volume, classification of Tertiaries and Metamorphic theory, 66; later editions, 66; *Elements, Manual and Student's elements*, 67; success of work, 67; Darwin's opinion on, 67; of Huxley, 67, 80, 81; Wallace on, 79; criticisms of, 68, 69, 70, 71
- PYTHAGORAS, his evolutionary ideas, 16
- Quarterly Review*, articles by Lyell, 56, 89; by Scrope, 60, 62
- Reviews, of the *Principles* by Scrope, 56, 89; by Whewell, 22, 53; of the *Origin* by Huxley, 136, 137
- SCROPE, G. POULETT, education, 34; travels, 34; work in Auvergne, 35; in Italy, 35; delay in publishing, 35; work on volcanoes, 36; his just views on Evolution, 37-39; cause of want of recognition of his work, 39, 40; devotion to politics, 40; reviews of *Principles*, 41, 61; correspondence with and influence on Lyell, 50, 61; his differences of opinion from Lyell, 62, 63, 151; effects of his review, 64
- SEDGWICK, A., advocates Catastrophism, 27, 28; opposition to Hutton, influence on Scrope, 34; on Darwin, 98; opposition to Lyell, 83; weakening of opposition to, 58; on *Principles*, 70, 71; dislike to Evolution, 83

## INDEX

171

- SHIPLEY, A. E., estimate of number of species of animals, 10
- Slavery, views of Lyell and Darwin, 76
- SMITH, W., influence of his teaching on Geological Society, 27
- SOLLAS, W. J., on Evolution and Uniformitarianism, 152, 153
- Species, origin of idea of, 9; number of species of animals, 10; of plants, 11
- Struggle for existence, Lyell on, 103, 107; de Candolle on, 107
- Theory of the Earth*, Hutton's, 17; Scrope's, 36
- THOMPSON, G. P., see Scrope, 33
- Time geological, Lyell on, 154; Lamarek on, 155
- TOLLET, Miss G., aids Darwin in revising *Origin of Species*, 132
- Uniformitarianism, origin of the term, 14, 15, 22
- Uniformity (or Continuity), Lyell's real views on, 62, 63; misconceptions of his views on, 151, 152, 155
- University of London, Lyell's connexion with, 59, 65
- Variation, early recognition of its importance, 9; Lyell's discussion of, 64, 103; Darwin's work on, 141
- Vestiges of Creation*, influence of, 93; Darwin on, 94; Wallace on, 110
- VINES, S. H., estimate of number of species of plants, 10
- Volcanoes, Scrope on, 36
- Vulcanism, see Plutonism &c., 18
- WALLACE, ALFRED RUSSEL, on ideas and actions, 4; his early life, 110; in South America, 110; in Malay Archipelago, 110; influence of *Principles* on, 79, 110; speculations at Sarawak, 111; influence of Malthus on, 112; conception of idea of Natural Selection, 111, 112; ignorance of Darwin's views, 112; statement on his relation to Darwin, 113, 114; his magnanimity, 114; on geographical distribution of animals, 146; his defence of Lyell's principle of Uniformity, 153
- WELLS, Dr, his anticipation of theory of Natural Selection, 92
- WERNER, success of his teachings, 21, 26, 27; his influence on early geologists, 26
- Wernerian Society, founded, 1807, by Jameson, 21, 25
- Wernerism, 18
- WHEWELL, Dr, contrast of doctrines of Hutton and Lyell, 22, 53; originates terms 'Catastrophism,' 'Uniformitarianism,' 22; and 'Geological Dynamics,' 70; reviews *Principles*, 53; opposition to Evolution, 83
- World, small part known to ancients, 9
- Worms, Darwin's work on, 147
- ZITTEL, K. VON, on Hutton's work, 19; on von Hoff and Lyell, 50
- Zoonomia* of Erasmus Darwin, 101
