

ANALYTICAL TABLE  
 OF  
 CONTENTS.

---

ESSAY I. — ON THE SPIRIT OF THE INDUCTIVE  
 PHILOSOPHY.

§ I. — THE INDUCTIVE PRINCIPLE.

	Page
Induction something beyond mere Observation - -	3
Belief in a peculiar inductive Principle - - -	7
Unnecessary: Analysis up to simpler Elements - -	13
Relations of inductive and deductive Methods: <i>à priori</i>	
Proofs of physical Truth: Examples - - -	19
Conclusion: Harmony of Reason and Nature - -	37

§ II. — THE UNITY OF SCIENCES.

Tendency towards Unity of Principle in all Branches of Science - - - - -	41
Distinctions of Sciences not essential, but provisional -	45
Alleged Exceptions unfounded - - - - -	53
1. Geology: — Founded on uniformity of natural Causes in all Time - - - - -	55
2. Organisation and Life - - - - -	65
The vital Principle, physical - - - - -	67

	Page
Physiology not founded on final Causes, but Unity of Composition - - - - -	71
Case of <i>Man</i> : no real Exception: his Superiority moral, not physical - - - - -	76
Conclusion: Unity of Science the Reflexion of the Unity of Nature - - - - -	82

### § III. — THE UNIFORMITY OF NATURE.

Hindrances to Science: false Analogies and artificial Dogmas - - - - -	86
The Philosophy of Conjecture - - - - -	93
Broad Principles of Analogy - - - - -	94
Uniformity of Nature the Essence of Induction - - - - -	102
No Limits to inductive Inquiry - - - - -	110
Interruptions of Order apparent, not real - - - - -	112
Conclusion: Inference of Supreme Reason - - - - -	116

### § IV. — THE THEORY OF CAUSATION.

The Desire to seek Causes: confused Ideas - - - - -	118
Hume's Doctrine: requires farther Distinction - - - - -	119
Physical and moral Causation - - - - -	122
Necessary Connexion <i>in Reason</i> , not in Events - - - - -	123
Some Cases of Cause and Effect convertible - - - - -	126
Cases of higher Connexion, not so - - - - -	128
Relation to Induction: physical Causes: higher Generalisations - - - - -	129
Distinction of Cause and Origin - - - - -	134
Objections - - - - -	135
Conclusion: physical Causes and a Supreme Moral Cause	136

## CONTENTS.

xv

## § V. — FINAL CAUSES, AND NATURAL THEOLOGY.

	Page
Ideas of "final Causes" require Enlargement - - -	140
Not Utility, but Order, the Proof of Intelligence - - -	142
Confused Ideas of the Argument - - - - -	146
Supposed Limits of Nature - - - - -	158
Anomalies, if real, would be Interruptions of Evidence of	
Design - - - - -	165
Higher views from improved Science - - - - -	168
Limits of Natural Theology - - - - -	171
Objections: Design and a Designer: Analogy of Mind -	172
Pantheism - - - - -	177
Conclusion; universal Order the Proof of Supreme Mind	179

## ESSAY II. — ON THE UNITY OR PLURALITY OF WORLDS.

## § I. THE ARGUMENT CONSIDERED IN A PHYSICAL AND PHILOSOPHICAL POINT OF VIEW.

Introductory Remarks - - - - -	183
Statement of the Question in relation to the Progress of	
Science - - - - -	186
Connexion with the past History of the Universe: nebular	
Theory - - - - -	196
Sidereal Nebulæ: their probable Nature, Motions, and	
Distances - - - - -	197
Bearing on Question of Inhabitants - - - - -	210
The fixed Stars: binary Systems - - - - -	212
Nebulous Portions of Solar System - - - - -	216
Present Condition of Solar System: Sun, Moon, Planets,	
Comets - - - - -	221
Probable Evolution of Life, past, present, or future -	240

§ II. — THE ARGUMENT CONSIDERED IN A THEOLOGICAL  
 POINT OF VIEW.

	Page
Opposing Views as to inhabited Worlds : each taken upon	
theological Grounds - - - - -	249
Paradoxes and retrograde Spirit of the exclusive View -	250
Relation of the Question to Man - - - - -	255
Appeal to final Causes - - - - -	266
Bearing of the Argument on Natural Theology - -	279
Alleged religious Difficulties of Plurality of Worlds -	286
From Insignificance of Man - - - - -	290
From supposed Exclusiveness of Revelation - -	291
From doctrines of Man's Nature - - - - -	298
From the Nature of Redemption - - - - -	299
Alleged Connexion with a future State - - - - -	307
More general View of the Relations of Science and	
Faith - - - - -	310
Connexion of Science with Natural Theology - -	314
with Revelation - - - - -	315
Physical Difficulties of the Bible - - - - -	321
Christianity essentially spiritual and independent of phy- sical Speculations - - - - -	323

ESSAY III. — ON THE PHILOSOPHY OF  
 CREATION.

INTRODUCTION : Nature of the proposed Inquiry - -	329
---	-----

§ I. — THE EVIDENCE DERIVED FROM GEOLOGY.

Question of Progression - - - - -	337
Law of Succession of Forms not yet made out - -	348
Principle of Continuity - - - - -	352
Apparent Breaks in the Series not real: Objections con- sidered - - - - -	356

## CONTENTS.

xvii

	Page
View of the Evidence - - - - -	358
Immutable Laws equally observed in organic and inorganic Changes - - - - -	373

## § II. — THE EVIDENCE DERIVED FROM PHYSIOLOGY.

Earlier and limited Views of Comparative Physiology -	380
Higher Principle of Unity of Composition - - -	385
Owen's Vertebral Theory - - - - -	387
Extension of Unity of Composition - - - - -	388
Nature of Species - - - - -	391
Theory of Permanence of Species - - - - -	393
Ultimate Infinity and Coalescence of Species - -	396
Permanence for limited Periods - - - - -	398
Races of Men - - - - -	398
Theories of Mutability of Species and Development -	402
Local Distribution and Specific Centres do not affect the Question - - - - -	419
Alternative of Origin of new Species out of existing Forms or inorganic Elements - - - - -	424

## § III. — GENERAL CONSIDERATIONS ARISING OUT OF THE PRECEDING EVIDENCE.

Argument for Permanence of Species from Permanence of Natural Laws, unfounded - - - - -	431
Argument from "Want of Experience" of Transmutation fallacious - - - - -	434
Physical Causes of Origination of Species - - -	438
Recapitulation: Transmutation not proved, but a probable Conjecture subordinate to more general Laws as yet unknown - - - - -	447

	Page
Opposite Views of sudden Production of Life irrational and inconsistent - - - - -	453
Principle of orderly Evolution by some natural Causes -	458
An absolute Beginning beyond physical Argument -	462

IV. — THE BEARING OF THE PRECEDING ARGUMENTS  
ON THE THEOLOGICAL VIEW OF CREATION.

Common Misconception on the Subject - - -	464
Influence of Bigotry and Prejudice - - -	466
Theological Tendency of physical Theories of creative Processes - - - - -	467
Bearing on Natural Theology: —	
Creation and Causation - - - - -	470
Nebular Theory accordant with Design - - -	474
Subsequent Revolutions: Unity of Plan evinces Design -	475
Development, if established, would afford increasing Evi- dence of Supreme Intelligence - - - - -	484
Bearing on Revelation: —	
Discrepancy with the Old Testament, not increased by Theories of Development - - - - -	488
Repeated Creations more at variance - - - - -	493
References to Creation in the New Testament not affected by any Theories - - - - -	494
Objections from Origin and primeval State of Man -	496
No Objections affecting Christianity - - - - -	502
Argument from successive Creations to Miracles inappli- cable - - - - -	503
Conclusion: real Evidence of Creation in Continuity not in Interruption - - - - -	507
Law and Order the Divine Archetypes - - - - -	511

## CONTENTS.

xix

## APPENDIX.

	Page
I. Inductive Reasoning - - - - -	515
II. The vital Principle, Dr. Carpenter - - -	529
III. The Satellite of Neptune - - - - -	530
IV. Psychology: Sir B. Brodie - - - - -	531
V. Causation - - - - -	531
VI. Professor Owen's Vertebral Theory - - -	532
VII. Mr. Huxley on Unity of Composition - - -	537
VIII. Professor E. Forbes on Specific Centres - - -	540
IX. Fossil Human Remains - - - - -	542
X. On the Distinction of Species: Dr. J. D. Hooker -	545
XI. On Comte's Classification of Sciences - - -	548
XII. Extract, on Geological Continuity: Mr. W. J. Hamilton - - - - -	549
XIII. On the Argument of Natural Theology -	552
