CONTENTS.

860. On Briot and Bouquet's theory of the differential equation
\[ F(u, \frac{du}{ds}) = 0 \] .......................... 432

861. Note on a formula relating to the zero-value of a theta-function 442
Crelle's Journal der Mathem., t. c. (1887), pp. 87, 88

862. Note on the theory of linear differential equations ........ 444
Crelle's Journal der Mathem., t. c. (1887), pp. 286—295

863. Note on the theory of linear differential equations ........ 453
Crelle's Journal der Mathem., t. ci. (1887), pp. 209—213

864. On Rudio's inverse centro-surface ................................ 457

865. On multiple algebra ................................................. 459

866. Note on Kiepert's L-equations, in the transformation of elliptic
functions ................................................................. 490
Mathematische Annalen, t. xxx. (1887), pp. 75—77

867. Note on the Jacobian sextic equation .......................... 493
Mathematische Annalen, t. xxx. (1887), pp. 78—84

868. On the intersection of curves ....................................... 500
Mathematische Annalen, t. xxx. (1887), pp. 85—90

869. On the transformation of elliptic functions .................... 505

870. On the transformation of elliptic functions (sequel) ........ 535
American Journal of Mathematics, t. x. (1888), pp. 71—93

871. A case of complex multiplication with imaginary modulus
arising out of the cubic transformation in elliptic functions 556

872. On the finite number of the covariants of a binary quantic .. 558
Mathematische Annalen, t. xxxiv. (1889), pp. 319, 320
CONTENTS.

873. System of equations for three circles which cut each other at given angles

     Messenger of Mathematics, t. xvii. (1888), pp. 18—21

     559

874. Note on the Legendrian coefficients of the second kind

     Messenger of Mathematics, t. xvii. (1888), pp. 21—23

     562

875. On the system of three circles which cut each other at given angles and have their centres in a line

     Messenger of Mathematics, t. xvii. (1888), pp. 60—69

     564

876. On systems of rays

     Messenger of Mathematics, t. xvii. (1888), pp. 73—78

     571

877. Note on the two relations connecting the distances of four points on a circle

     Messenger of Mathematics, t. xvii. (1888), pp. 94, 95

     576

878. Note on the anharmonic ratio equation

     Messenger of Mathematics, t. xvii. (1888), pp. 95, 96

     578

879. Note on the differential equation \( \frac{dx}{\sqrt{(1-x^2)}} + \frac{dy}{\sqrt{(1-y^2)}} = 0 \)

     Messenger of Mathematics, t. xviii. (1889), p. 90

     580

880. Note on the relation between the distance of five points in space

     Messenger of Mathematics, t. xviii. (1889), pp. 100—102

     581

881. On Hermite's H-product theorem

     Messenger of Mathematics, t. xviii. (1889), pp. 104—107

     584

882. A correspondence of confocal Cartesians with the right lines of a hyperboloid

     Messenger of Mathematics, t. xviii. (1889), pp. 128—130

     587

883. Analytical formula in regard to an octad of points

     Messenger of Mathematics, t. xviii. (1889), pp. 149—152

     590

884. Note sur les surfaces minima et le théorème de Joachimsthal

     Comptes Rendus, t. cvi. (1888), pp. 995, 996

     594
CONTENTS.

885. On the Diophantine relation, \( y^a + y^b = \text{Square} \) . . . . . 596

886. On the surfaces with plane or spherical curves of curvature . 601
    293—306

887. On the theory of groups . . . . . . . . . . 639
    American Journal of Mathematics, t. xi. (1889), pp. 139—157
