978-1-108-00523-4 - A Preliminary Discourse on the Study of Natural History

William Swainson

Frontmatter

[More information](#)**CAMBRIDGE LIBRARY COLLECTION***Books of enduring scholarly value***Darwin**

Two hundred years after his birth and 150 years after the publication of 'On the Origin of Species', Charles Darwin and his theories are still the focus of worldwide attention. This series offers not only works by Darwin, but also the writings of his mentors in Cambridge and elsewhere, and a survey of the impassioned scientific, philosophical and theological debates sparked by his 'dangerous idea'.

**A Preliminary Discourse on the
Study of Natural History**

William Swainson FRS, was recognised principally as a zoologist, an ornithologist and a skilled and prolific illustrator. He also had a tremendous enthusiasm for seeking and identifying new species. In this 1834 volume however, Swainson addressed the nature of, foundations for and successful pursuit of zoology. It argues firmly for the key importance of taxonomy. Swainson was an ardent advocate of MacLeay's now entirely outmoded 'quinary' system of classification – even then a distinctly minority view. This sought affinities, patterns and analogies among organisms, in order to discern God's order. More than a mere curiosity, such work was of pivotal concern to enterprising naturalists of the 1820s and 1830s – including the young Charles Darwin. It also reached Robert Chambers, whose 1844 *Vestiges of the Natural History of Creation* was an important landmark in the development of the theory of evolution. 'We are indebted for what we know of these beautiful analogies to three naturalists – Macleay, Vigors, and Swainson, whose labours tempt us to dismiss in a great measure the artificial classifications hitherto used, and make an entirely new conspectus of the animal kingdom, not to speak of the corresponding reform which will be required in our systems of botany also.' – Robert Chambers, *Vestiges of the Natural History of Creation* (1844), p. 238

Cambridge University Press has long been a pioneer in the reissuing of out-of-print titles from its own backlist, producing digital reprints of books that are still sought after by scholars and students but could not be reprinted economically using traditional technology. The Cambridge Library Collection extends this activity to a wider range of books which are still of importance to researchers and professionals, either for the source material they contain, or as landmarks in the history of their academic discipline.

Drawing from the world-renowned collections in the Cambridge University Library, and guided by the advice of experts in each subject area, Cambridge University Press is using state-of-the-art scanning machines in its own Printing House to capture the content of each book selected for inclusion. The files are processed to give a consistently clear, crisp image, and the books finished to the high quality standard for which the Press is recognised around the world. The latest print-on-demand technology ensures that the books will remain available indefinitely, and that orders for single or multiple copies can quickly be supplied.

The Cambridge Library Collection will bring back to life books of enduring scholarly value (including out-of-copyright works originally issued by other publishers) across a wide range of disciplines in the humanities and social sciences and in science and technology.

CONTENTS.

PART II.

ON THE GENERAL NATURE AND ADVANTAGES OF THE STUDY
OF NATURAL HISTORY.

CHAP. I.

Introductory Remarks.—What Natural History is,—in a
general Sense, and as now restricted.—Division of the Sub-
ject.—Reflections on Nature and Art.—Distinctions, and
Object of the Study - - - Page 93

CHAP. II.

Natural History viewed in its Connection with Religion.—
As a Recreation.—As affecting Commerce and the economic
Purposes of Life.—As important to Travellers - 107

PART III.

OF THE PRINCIPLES ON WHICH NATURAL HISTORY RELIES FOR
ITS SUCCESSFUL PROSECUTION, AND THE CONSIDERATIONS BY
WHICH THE NATURAL SYSTEM MAY BE DEVELOPED.

CHAP. I.

On the Dismissal of Prejudice - - - 152

CHAP. II.

On the Principles on which Natural History, as a Branch of
Physical Science, is to be studied - - - 165

CHAP. III.

On Arrangements generally; and on those Considerations
which should form the Basis of every Attempt to classify
Objects according to the System of Nature - - 188

Cambridge University Press

978-1-108-00523-4 - A Preliminary Discourse on the Study of Natural History

CONTENTS.

vii

CHAP. IV.

On Theories in general; and on the Modes and Considerations by which they are to be verified - Page 201

CHAP. V.

On the Characters of Natural Groups - - 236

CHAP. VI.

On the Importance of Analogy when applied to the Confirmation of Theory - - - - 282

PART IV.

ON THE PRESENT STATE OF ZOOLOGICAL SCIENCE IN BRITAIN,
AND ON THE MEANS BEST CALCULATED FOR ITS ENCOURAGEMENT
AND EXTENSION.

CHAP. I.

Introductory Remarks. — Some Account of the Nature and present State of our Scientific Societies and Institutions, and of the Means they possess of encouraging Science. — National Encouragement - - 296

CHAP. II.

On the National Patronage of Science in other Countries, as compared to its Neglect by the British Government. — The Causes which produce this Neglect, and the Expediency of removing them - - - 339
