

## INDEX

[The numbers refer to the pages.]

- Absolute system of dynamics, 20  
 Acceleration, 3, 58  
   in polar coordinates, 253  
   tangential and normal, 98  
 Angular momentum, 137, 141, 150, 152,  
   173, 175  
 Anomaly, eccentric, 229  
   mean, 231  
   true, 228  
 Aperiodic vibration, 281  
 Apses, 259  
 Apsidal angle, 259  
 Astronomical problems, 217, 219
- Ballistic pendulum, 206  
 Bertrand, J., 324  
 Bifilar suspension, 164  
 Borda, J. C., 161  
 Boscovich, R. G., 150  
 Boulliau, I., 233  
 Boys, C. V., 241
- Central forces, 247  
 Centrifugal tension, 145  
 C.G.S. system, 22  
 Chain, motion of a, 142, 144, 147  
 'Cheval-vapeur,' 42  
 Circular motion, 100  
   pendulum, 105  
 Clairaut, A. C., 271  
 Conservation of energy, 44, 82, 127,  
   182, 320  
   of momentum, 121  
 Conservative field, 84  
 Coordinates, generalized, 301, 309, 315  
   polar, 251  
   spherical polar, 304  
 Critical orbits, 261  
 Cube, law of inverse, 266  
 Cycloidal pendulum, 110
- D'Alembert, J. C. R., 150, 153  
 Damped oscillations, 277  
 Delaunay, C., 324  
 Density, mean, of earth, 241  
 Deviation (eastward) of a falling body,  
   254  
   moment, 166  
   of plumb-line, 102  
 Differential equations, 9  
 Dimensions of units, 7, 42  
 Dirichlet, P. L., 87
- Earth, mean density of, 241  
   mass of, 219  
 Effective forces, 151  
 Elliptic-harmonic motion, 76, 255  
 Elliptic motion about a focus, 220, 227  
   formulae for, 228  
 Energy, equation of, 43, 81, 101, 157,  
   181, 320  
   kinetic, 43, 126, 139, 157,  
   potential, 43, 82  
 Epicyclic motion, 62, 100  
 Equations, differential, 9  
 Equipotential lines, 85  
 Euler, L., 178, 188, 324
- Forced oscillations, 32, 192, 282, 331  
 Fourier, J. B., 47  
 Free oscillations, 85, 129, 186, 277, 324  
 Freedom, systems with one degree of,  
   183  
   two degrees, 315
- Galitzin, Prince B., 196  
 Gauss, C. F., 32  
 Generalized coordinates, 309, 315  
 Geodesic, 302  
 Gravitation, constant of, 217, 241  
   law of, 216  
 Gravity, acceleration of, 8, 30, 160  
   apparent, 102  
   variable, 39  
 'Gravity' of a body, 18, 30  
 Greenhill, Sir G., 207
- Hamilton, Sir W. R., 58, 311  
 Hodograph, 58, 75, 99, 227  
 Huygens, C., 112, 159
- Impact, 123  
 Impulse, 23, 312  
   effect on energy, 209  
   instantaneous, 123, 147, 202  
 Inertia, coefficients of, 184  
   law of, 17  
   moment of, 156  
   product of, 166  
 Initial reactions, 200  
 Instantaneous ellipse, 237  
 Inverse cube, law of, 266  
   square, 216
- 'Joule,' 42

- Kater, Capt., 162**  
**Kelvin, Lord, 324**  
**Kepler's Laws, 217, 231, 234**  
 'Kilowatt,' 42  
**Kinetic energy, 43, 126, 139, 157**  
   theory of gases, 125  
  
**Lagrange, J. L., 237,**  
 Lagrange's equations, 308, 315  
 Laws of motion, 17, 20, 69  
 Lines of force, 85  
 Lissajous, J. A., 80  
 Logarithmic decrement, 279  
  
 Masses of planets, 218  
**Maxwell, J. C., 2, 20, 340**  
 Mean motion in elliptic orbit, 222  
 Moment about an axis, 141  
**Momentum, angular, 137, 141, 150, 152,**  
   173, 175  
   generalized, 312, 320  
   linear, 121, 137, 141, 150, 152  
**Moon, distance of, 218**  
**Multiple systems, oscillations of, 196,**  
   324  
  
**Newton, Sir I., 216, 218, 219, 283**  
 Normal acceleration, 98  
 Normal modes of vibration, 133, 328  
  
**Orbits, construction of, 223**  
   critical, 261  
   differential equation of central, 263  
   revolving, 265  
**Oscillation, centre of, 159**  
**Oscillations, forced, 30, 32, 36, 192, 331**  
   free, 24, 29, 85, 186, 324  
   of double pendulum, 129  
   of finite amplitude, 113  
   torsional, 163  
  
**Pendulum, ballistic, 207**  
   Blackburn's, 79  
   circular, 105  
   compound, 158  
   cycloidal, 110  
   double, 129, 196, 317, 321  
   horizontal, 159, 194  
   Kater's, 161  
   simple, 29  
   spherical, 79, 305, 314  
**Percussion, centre of, 204, 206**  
**Perturbations, 237**  
**Polar coordinates, 251, 318**  
**Potential energy, 43, 82**  
  
**Power, 41**  
**Principal axes of inertia, 166**  
**Projectiles, 72**  
   under resistance, 294  
  
 Quadratic law of resistance, 200  
  
**Rayleigh, Lord, 324**  
 Reactions on fixed axis, 165, 167, 204  
 Relative motion, 61  
**Resistance, linear law of, 274**  
   quadratic law of, 290  
**Resonance, 33, 285, 332**  
**Robins, B., 207**  
 Rotating axes, 88  
 Rotation about a fixed axis, 155  
  
**Segner, J. A., 166**  
**Seismographs, 192, 286, 333**  
**Ship, oscillations of, 28**  
**Simple-harmonic motion, 24**  
   superposition of, 64  
**Smooth curve, motion on, 103**  
   surface, motion on, 301  
**Space-time curves, 1, 12, 26, 279, 282**  
**Spherical pendulum, 79, 305**  
   surface, motion on a, 305  
**Square, law of inverse, 216**  
**Stability, coefficients of, 187, 325**  
**Stability of equilibrium, 87, 186, 326**  
   of orbits, 257  
**Stresses in a moving body, 198**  
**Surface, motion on a smooth, 301**  
  
**Tait, P. G., 165, 280**  
**Tangential acceleration, 98**  
**Terminal velocity, 276**  
**Thomson and Tait, 311**  
**Torsional oscillations, 163**  
**Two bodies, problem of, 219**  
**Two degrees of freedom, systems of,**  
   301  
  
**Units, 6, 17, 22, 46**  
  
**Velocity, 2, 55**  
   generalized, 309, 316  
**Velocity-time curves, 3, 12, 26**  
  
 'Watt,' 42  
**Wave on a chain, 145**  
 'Weight,' 18, 23  
**Work, 41**  
  
**Young, T., 32**
