INTRODUCTION.

STATEMENT OF THE OBJECT AND PLAN OF THE WORK.

CHAPTER I.

SOURCES OF THE ADVANTAGES ARISING FROM MACHINERY
AND MANUFACTURES.

England peculiarly a Manufacturing Country, § 1. Its Manufactures spread throughout the World, 2. Proportions of Agricultural Population in various Countries, its gradual Increase in England, 3.—*Additions to Human Power*. Experiment on Force to move a Block of Stone, 5.—*Economy of Time*. Gunpowder, 6. Diamond for cutting Glass; its Hardness, 7.—*Employment of Materials of little Value*. Goldbeaters' Skin; horny Refuse; old Tin Ware, 8.—*Of Tools*, 9. To arrange Needles, 10. To place their Points in one Direction, 11. Substitute for Hand; Nail-making, 12. Shoe-machinery; Sash-lines, 13.—*Division of the Objects of Machinery*. To produce Power; to transmit Force; general Principles, 14. Wind; Water, 15. Steam; Force not created, 16. Economy of Time in various Modes of dividing Roots of a Tree, 17. Chinese Mode of conveying Cotton compared with European, 18.

CONTENTS.

ix

CHAPTER II.

ACCUMULATING POWER.

When the Work requires more Force than can be produced in the time allowed for its Operation. Fly-wheel, Rolling-iron, § 19. Anecdote of punching Plate-iron, 20. Pile-engine, 21.

CHAPTER III.

REGULATING POWER.

Governor of Steam-engine. Ditto moving in Water at Chatham. Uniform supply of Fuel to Steam-engine. Consuming Smoke, § 22. Vane regulated by Resistance of Air. Striking Clock, 23. Cataract for regulating Engines in Cornish Mines, 24.

CHAPTER IV.

INCREASE AND DIMINUTION OF VELOCITY.

Fatigue arising from Rapidity of muscular Exertion, contrasted with its Magnitude, § 25. Most advantageous Load for a Porter, 26. Tags of Boot-laces. Spinning by Hand and by Wheel. Machines to wind Ribbon and Sewing Cotton, 27. Tilt-hammer driven down by a Spring, 28. Scythe-making, 29. Smoke-jack, 30.

CHAPTER V.

EXTENDING TIME OF ACTION OF FORCES.

Watches and Clocks. Common Jack. Automaton, § 31. Jack useful for physical Experiments, also to agitate Chemical Solutions, 32.

CHAPTER VI.

SAVING TIME IN NATURAL OPERATIONS.

Tanning, § 33. Impregnation of Timber with Tar, &c. Accident to Boat of a Whaling Ship, 34. Bleaching Linen, 35. Evaporation of Water of Brine Springs, 36, 37. Deepening of Rivers in America, 38. Ascending Rapids, 39.

CONTENTS.

CHAPTER VII.

EXERTING FORCES TOO GREAT FOR HUMAN POWER, AND EXECUTING OPERATIONS TOO DELICATE FOR HUMAN TOUCH.

Difficulty of making a large Number of Men act simultaneously. Statue of Peter the Great. Egyptian Drawing, § 40. Rivets used when Red-hot, 41. Spinning Cotton. Steam-boats, 42, 43. Damping Paper for Bank Notes, 44.

CHAPTER VIII.

REGISTERING OPERATIONS.

Pedometer. Counting Machines for Carriage. Steam-engine, § 45. Machine for measuring Calicoes, 46. Tell-tale, 47. Instrument to measure Liquor drawn from Casks, 48. To measure Liquor remaining in Casks, 49. Gas-meter, 50. Water-meter, 51. Machine for registering the Average of fluctuating Forces. Barometer Clock, 52. Alarums, Repeating Clocks and Watches, 53.

CHAPTER IX.

ECONOMY OF MATERIALS EMPLOYED.

Cutting Trees into Planks, § 54. Printing-ink Experiment, 55.

CHAPTER X.

OF THE IDENTITY OF THE WORK WHEN IT IS OF THE SAME KIND, AND OF ITS ACCURACY WHEN OF DIFFERENT KINDS.

Top of a Box turned in Lathe, § 56. Accuracy of Work executed by Tools, 57. By Turning, 58.

CHAPTER XI.

OF COPYING.

Of Printing from Cavities. Copper-plate Printing, § 61. Engraving on Steel, 62. Music Printing, 63. Calico Printing from Cylinders, 64. Stencilling, 65. Printing Red Cotton Handkerchiefs, 66.—*Printing from Surface.* Printing

from Wooden Blocks, 67. From moveable Type, 68. From Stereotype, 69. Calico Printing, 70. Oil-cloth Printing, 71. Letter Copying, 72. Printing on China, 73. Lithographic Printing, 74. Reprinting old Works by Lithography, 75. Register Printing, 76.—*Copying by Casting*. Iron and Metals, 78. Casts of Vegetable Productions in Bronze, 79. Casts in Plaster, 80. Casting in Wax. Imitations of Plants; of the Human Body, 81.—*Copying by Moulding*. Bricks, Tiles, Cornice of Church of St. Stefano, 83. Embossed China, 84. Glass Seals, 85. Square Glass Bottles with Names, 86. Wooden Snuff-boxes, 87. Horn Knife Handles. Umbrella Handles, 88. Tobacco-pipe making, 90. Embossing on Calico; on Leather, 91, 92. Swaging, 93. Engraving by Pressure on Steel. Bank Notes. Forgery, 94, 95. Gold and Silver Mouldings, 96. Ornamental Papers, 97.—*Copying by Stamping*. Coins and Medals, 98. Military Ornaments, 99. Buttons and Nail Heads, 100. Clichée, 101.—*Copying by Punching*. Boiler-plates, 103. Tinned Iron, 104. Buhl-work, 105. Cards for Guns, 106. Gilt Paper Ornaments, 107. Steel Chains, 108.—*Copying with Elongations*. Wire Drawing, 110. Brass Tube Drawing, 111. Leaden Pipes, 112. Iron Rolling, 113. Vermicelli, 115.—*Copying with altered Dimensions*. Pentagraph, 116. Turning, 117. Rose Engine Turning, 118. Copying Dies by Lathes, 119. Shoe Lasts, 120. Copying Busts, 121. Screw-cutting, 122. Printing from Copper Plates with altered Dimensions, 123. Engraving from Medals, 124. Veils made by Caterpillars. Weight of various Fabrics, 126. Copying through six Stages in Printing this volume.

CHAPTER XII.

ON THE METHOD OF OBSERVING MANUFACTORIES.

Skeleton, General Inquiries, § 128. Skeleton for each Process, 129.

CHAPTER XIII.

ON THE DIFFERENCE BETWEEN MAKING AND MANUFACTURING.

Cambridge University Press

978-1-108-00910-2 - On the Economy of Machinery and Manufactures

Charles Babbage

CHAPTER XIV.

ON THE INFLUENCE OF VERIFICATION ON PRICE.

Modification of general Principles, § 134. Verification of Sugar, Tea, Flour, 135. Doctoring Trefoil, and Clover, 136. Flax, 137. Difficulty of distinguishing "single press" Lace, 138. Stockings, 139. Watches, 140. Measures of articles of Linen Drapery, 141. Apothecaries and Druggists, 142. Effect of Number of Proprietors on Price, 143. Ice. Oil of Cajeput, 144.

CHAPTER XV.

ON THE INFLUENCE OF DURABILITY ON PRICE.

Degree of Durability in Articles. Paper, Pens, Precious Stones, § 146. Tables, Chairs, Looking-glasses, 147.

CHAPTER XVI.

ON PRICE, AS MEASURED BY MONEY.

List of Prices of various Articles in 1818, 1824, 1828, 1830, § 148. Another List, for 1812, 1832. Advice about such Lists, 148. Causes of Alteration of Money Price. Table of Elements of Alteration, 149. Price of Plate Glass in London, Paris, and Berlin. Price of large Plates, 150. Middle-men, 152.

CHAPTER XVII.

OF RAW MATERIALS.

Nature of Raw Material, § 153. Gold and Silver Leaf, 154. Venetian Gold Chains, 155. Watch-spring, 156. Tables of Price of Raw Material and Labour in various Manufacture of France, 157. Price of Bar-iron in various Countries, 158.

CHAPTER XVIII.

OF THE DIVISION OF LABOUR.

Causes of its Advantages, § 159. Time required for learning an Art, 160. Time lost in changing Occupation, 162.

Cambridge University Press

978-1-108-00910-2 - On the Economy of Machinery and Manufactures

CONTENTS.

xiii

Skill acquired by frequent Repetition of the same Process. Nail-making; Signing Bank Notes, 164, 165. Contrivance of Tools, 166. New Principle of the Advantage of the Division of Labour, 168. Pin-making, English, 170 to 176. Table of Cost of making English Pins, 178. Ditto French Pins, 179. American Pin-making Machine, 181. Examination of its Merits, 182.

CHAPTER XIX.

ON THE DIVISION OF MENTAL LABOUR.

Great French Tables of Logarithms, § 183 to 187. On performing Arithmetical Calculations by Machinery, 189. Explanation of Mathematical Principle. Table of Square Numbers with Differences, 190. Illustration by three Clocks, 191.

CHAPTER XX.

ON THE SEPARATE COST OF EACH PROCESS IN A MANUFACTURE.

Comparative Value of Cotton of Java in various Stages of Manufacture, § 196. Statement of Expense of printing the present Volume, 197. Observations on Statement, 198—200. Effect of Duty on Paper, 201. Charge for Advertisements, 202, 203.

CHAPTER XXI.

ON THE CAUSES AND CONSEQUENCES OF LARGE FACTORIES.

Principle on which large Factories are established, § 204. Transport of Materials, 205. Machine for making Patent-net working eight Hours a-day. Same Machine working twenty-four Hours requires three Sets of Men. Porter to admit different Sets of Workmen. Workman to keep Machines in Repair, 206. Application of Steam to Weaving, 207. Lighting by Gas, 208. Accountant's Department, 209. Importance of making Workmen derive Profit from Success of Factory, 210. System in Cornish Mines, 211. Effects of large Factories, 212. Economy of Raw Produce; exemplified in Horns, 213. Middle-men. Confidence in

CONTENTS.

Character, 214. Extent of Confidence, 215. Breach of Confidence: Needles without Eyes, 216. Instance of Confidence, 217. Drawbacks, 218. Sending Agents to distant Countries. Extract from the Report of the Committee of the House of Commons relating to Factory System, 219.

CHAPTER XXII.

ON THE POSITION OF GREAT FACTORIES.

In the Line of Cheap Modes of Conveyance; Fuel, Water, Power, § 220. Mississippi, 221. Steam-boats on that River, *note*. Accumulation of Factories establishes regular Markets, 222. Removal of Factories, 223, 224. Facilities for removing different Machines, 225. Important Suggestions to Workmen on this Subject, 226.

CHAPTER XXIII.

ON OVER-MANUFACTURING.

Periodical. Effect where there are not large Establishments. System of Compensation, § 227. Effect on large Factories. Two Remedies, 228. Diminished Production. Diminished Cost of Production, 229. Effects in driving Capital to other Employments, 231.

CHAPTER XXIV.

INQUIRIES PREVIOUS TO COMMENCING ANY MANUFACTORY.

Expense of Tools and Machines. Supply of Raw Material, § 233, 234. Probable Demand. Dolls' Eyes, 235. Tolls on Steam-carriages. Effect of Atmosphere, of Wheels, and of Horses' Feet on Roads, 236. Draught of Carriages over various kinds of Roads. Draught up various Inclinations at six, eight, and ten Miles per Hour, 237. Time in which Returns can be made, — Facility of introducing new Articles, 238. Probable Opposition to new Manufacture, 239.

CHAPTER XXV.

ON CONTRIVING MACHINERY.

Power of inventing Mechanical Contrivances not very rare. Projects to prevent Forgery of Bank-notes, § 240. Best

Cambridge University Press

CONTENTS.

xv

Combinations of Machinery rare, 241. Drawings to be made to determine all the Movements, 241. Experiments for all the physical or chemical circumstances. Punching Letters on Copper, 242. Causes of Failure in Machines, 243. Want of Stiffness in Framing. Experiment should be tried with good Workmanship, 244. Same Experiment repeated at distant Intervals, 245. Expense of new Machine, 247. Advice to Projectors, 248.

CHAPTER XXVI.

PROPER CIRCUMSTANCES FOR THE APPLICATION OF MACHINERY.

When many Things of the same Kind are required, § 249. Where few Things perfectly accurate are required, 250. Where Economy of Time is required. Newspapers, 251. "The Times," 252. Conveyance of Letters, 253. Steam-carriages, 256. Diving Vessel, 257. Slide of Alpnach, 258. Competition between Machine and Hand Labour, 259.

CHAPTER XXVII.

ON THE DURATION OF MACHINERY.

Engines to produce Power last long, § 261. Improvements increase Production, 262. Age of Watches, 263. Machines let for Hire. Unexpected Effect of a Change in the Rent of Stocking Frames, 264. Stamps, and Dies, and Steam Power let out, 266.

CHAPTER XXVIII.

ON COMBINATION AMONGST MASTERS OR WORKMEN AGAINST EACH OTHER.

Rules in particular Factories, § 270. Larger Societies, 276. Objects of them, 277. Effects, 278. Gun Barrels, 279. Fear of Combination causes Expense, 282. Coal and Iron Works, 283. Cause of Removal of Factories, 285. The Truck System 287. Payment of Wages in Goods, 289.

Cambridge University Press

xvi

CONTENTS.

CHAPTER XXIX.

ON COMBINATIONS OF MASTERS AGAINST THE PUBLIC.

Instances, § 291. Gas and Water Companies, 293. Coal-owners, 294. Booksellers, 295. Profits on the present Volume, 296. Combination of Booksellers, 299. Remedy proposed, 302. Reviews, 303.

CHAPTER XXX.

ON THE EFFECT OF TAXES AND OF LOCAL RESTRICTIONS UPON MANUFACTURES.

Taxes on Paper, on Windows, § 304. Excise Regulations, 305. Effects of Duties, 307. Insurance on Smuggling, 308. Bounties, 310. Effects of Removal of a Monopoly in the Bobbin-net Trade, 312. Present State of that Trade, 313. Number and Distribution of Machines, 315. Of Patents, 317. Expence, 318. Of Copyright, 319. Of limited Partnerships, 320.

CHAPTER XXXI.

ON THE EXPORTATION OF MACHINERY.

Reason for and against, § 322. Competition between Manufacturer in poor and in rich Country, 323. Impossible to prevent Exportation of all whilst that of any is permitted, 325. Makers of new Machines interested in supplying the Home Market, 326. Foreign Orders charged higher, 327. Comparison of internal Communications in England and France, 333. Manchester Rail-Road, 334.

CHAPTER XXXII.

ON THE FUTURE PROSPECTS OF MANUFACTURES, AS CONNECTED WITH SCIENCE.

Union of Theory and Practice, § 335. Difficulties opposed to Cultivation of Abstract Science, 336. Royal Society, 337. British Association for the Promotion of Science, 338. Effect of Public Opinion on Science, 339. Manufacturers discovered Iodine and Brome, 340. Peruvian Bark, 341. Views of the Future, 344. Conclusion.
