CAMBRIDGE LIBRARY COLLECTION

Books of enduring scholarly value

Classics

From the Renaissance to the nineteenth century, Latin and Greek were compulsory subjects in almost all European universities, and most early modern scholars published their research and conducted international correspondence in Latin. Latin had continued in use in Western Europe long after the fall of the Roman empire as the lingua franca of the educated classes and of law, diplomacy, religion and university teaching. The flight of Greek scholars to the West after the fall of Constantinople in 1453 gave impetus to the study of ancient Greek literature and the Greek New Testament. Eventually, just as nineteenth-century reforms of university curricula were beginning to erode this ascendancy, developments in textual criticism and linguistic analysis, and new ways of studying ancient societies, especially archaeology, led to renewed enthusiasm for the Classics. This collection offers works of criticism, interpretation and synthesis by the outstanding scholars of the nineteenth century.

The History of Rome

The classical historian Theodor Mommsen (1817–1903) published his History of Rome between 1854 and 1856. His work was received with widespread acclaim by the scholarly community and the reading public. In 1902 Mommsen was awarded the Nobel Prize for Literature and acclaimed as ‘the greatest living master of the art of historical writing.’ Mommsen rejected traditional Enlightenment accounts, which glorified ancient Rome; instead, guided by a new and rigorous criticism of sources, Mommsen began the demythologisation of Roman history. In a vivacious and engaging style, Mommsen drew bold parallels between the nineteenth century and classical Rome. Volume 4 covers the establishment of the military monarchy; this English translation, first published in 1866, corresponds to the fourth edition of the German third volume. Part 2 begins with Pompey and Julius Caesar and ends with the battle of Thapsus. In this reissue, the index to the entire work is also included.

Cambridge University Press has long been a pioneer in the reissuing of out-of-print titles from its own backlist, producing digital reprints of books that are still sought after by scholars and students but could not be reprinted economically using traditional technology. The Cambridge Library Collection extends this activity to a wider range of books which are still of importance to researchers and professionals, either for the source material they contain, or as landmarks in the history of their academic discipline.

Drawing from the world-renowned collections in the Cambridge University Library, and guided by the advice of experts in each subject area, Cambridge University Press is using state-of-the-art scanning machines in its own Printing House to capture the content of each book selected for inclusion. The files are processed to give a consistently clear, crisp image, and the books finished to the high quality standard for which the Press is recognised around the world. The latest print-on-demand technology ensures that the books will remain available indefinitely, and that orders for single or multiple copies can quickly be supplied.

The Cambridge Library Collection will bring back to life books of enduring scholarly value (including out-of-copyright works originally issued by other publishers) across a wide range of disciplines in the humanities and social sciences and in science and technology.
