CAMBRIDGE LIBRARY COLLECTION

Books of enduring scholarly value

Classics

From the Renaissance to the nineteenth century, Latin and Greek were compulsory subjects in almost all European universities, and most early modern scholars published their research and conducted international correspondence in Latin. Latin had continued in use in Western Europe long after the fall of the Roman empire as the lingua franca of the educated classes and of law, diplomacy, religion and university teaching. The flight of Greek scholars to the West after the fall of Constantinople in 1453 gave impetus to the study of ancient Greek literature and the Greek New Testament. Eventually, just as nineteenth-century reforms of university curricula were beginning to erode this ascendancy, developments in textual criticism and linguistic analysis, and new ways of studying ancient societies, especially archaeology, led to renewed enthusiasm for the Classics. This collection offers works of criticism, interpretation and synthesis by the outstanding scholars of the nineteenth century.

Dialogues of Plato

One of the leading scholars and academic administrators of his time, Benjamin Jowett (1817–93) was Master of Balliol College as well as Regius Professor of Greek and, for a time, vice-chancellor at Oxford University. Along with his achievements in the area of academic reform, Jowett is remembered for this four-volume translation of Plato's dialogues. Characterising Plato as the 'father of idealism', Jowett reminds readers that while 'he may be illustrated by the writings of moderns ... he must be interpreted by his own, and by his place in the history of philosophy'. In this final volume, Plato's last dialogue, the *Laws*, is presented together with an introduction by Jowett. Three pieces of questionable authorship also appear in an appendix. Jowett's work represents a towering achievement in the field of classical and philosophical studies that had important influence on the subsequent study of Plato.

Cambridge University Press has long been a pioneer in the reissuing of out-of-print titles from its own backlist, producing digital reprints of books that are still sought after by scholars and students but could not be reprinted economically using traditional technology. The Cambridge Library Collection extends this activity to a wider range of books which are still of importance to researchers and professionals, either for the source material they contain, or as landmarks in the history of their academic discipline.

Drawing from the world-renowned collections in the Cambridge University Library, and guided by the advice of experts in each subject area, Cambridge University Press is using state-of-the-art scanning machines in its own Printing House to capture the content of each book selected for inclusion. The files are processed to give a consistently clear, crisp image, and the books finished to the high quality standard for which the Press is recognised around the world. The latest print-on-demand technology ensures that the books will remain available indefinitely, and that orders for single or multiple copies can quickly be supplied.

The Cambridge Library Collection will bring back to life books of enduring scholarly value (including out-of-copyright works originally issued by other publishers) across a wide range of disciplines in the humanities and social sciences and in science and technology.
