CAMBRIDGE LIBRARY COLLECTION

Books of enduring scholarly value

Printing and Publishing History

The interface between authors and their readers is a fascinating subject in its own right, revealing a great deal about social attitudes, technological progress, aesthetic values, fashionable interests, political positions, economic constraints, and individual personalities. This part of the Cambridge Library Collection reissues classic studies in the area of printing and publishing history that shed light on developments in typography and book design, printing and binding, the rise and fall of publishing houses and periodicals, and the roles of authors and illustrators. It documents the ebb and flow of the book trade supplying a wide range of customers with products from almanacs to novels, bibles to erotica, and poetry to statistics.

Memoirs of Libraries

This monumental work, first published in 1859, covers the history of libraries from classical times to the mid-nineteenth century, in Britain, Europe and America. The author was influential in founding municipal libraries in nineteenth-century Britain and regarded access to good libraries as crucial to education and civilisation. Volume 1, divided by the author into five 'books', is reissued here in two parts. The first two books deal with classical and medieval libraries, examining English and European monastic libraries in depth. Book 3 describes the core collections of the British Museum and other major university, ecclesiastical and public libraries of Britain and Ireland. Book 4 discusses the principal libraries of America and Book 5 those of continental Europe, from France to Hungary and Russia. This final volume (in four 'books') sets out Edwards' views on all aspects of library management, from physical layout and classification to rules and regulations.

Cambridge University Press has long been a pioneer in the reissuing of out-of-print titles from its own backlist, producing digital reprints of books that are still sought after by scholars and students but could not be reprinted economically using traditional technology. The Cambridge Library Collection extends this activity to a wider range of books which are still of importance to researchers and professionals, either for the source material they contain, or as landmarks in the history of their academic discipline.

Drawing from the world-renowned collections in the Cambridge University Library, and guided by the advice of experts in each subject area, Cambridge University Press is using state-of-the-art scanning machines in its own Printing House to capture the content of each book selected for inclusion. The files are processed to give a consistently clear, crisp image, and the books finished to the high quality standard for which the Press is recognised around the world. The latest print-on-demand technology ensures that the books will remain available indefinitely, and that orders for single or multiple copies can quickly be supplied.

The Cambridge Library Collection will bring back to life books of enduring scholarly value (including out-of-copyright works originally issued by other publishers) across a wide range of disciplines in the humanities and social sciences and in science and technology.
