Books of enduring scholarly value

Classics

From the Renaissance to the nineteenth century, Latin and Greek were compulsory subjects in almost all European universities, and most early modern scholars published their research and conducted international correspondence in Latin. Latin had continued in use in Western Europe long after the fall of the Roman empire as the *lingua franca* of the educated classes and of law, diplomacy, religion and university teaching. The flight of Greek scholars to the West after the fall of Constantinople in 1453 gave impetus to the study of ancient Greek literature and the Greek New Testament. Eventually, just as nineteenth-century reforms of university curricula were beginning to erode this ascendancy, developments in textual criticism and linguistic analysis, and new ways of studying ancient societies, especially archaeology, led to renewed enthusiasm for the Classics. This collection offers works of criticism, interpretation and synthesis by the outstanding scholars of the nineteenth century.

Fasti Romani

Henry Fynes Clinton (1781–1852) made an innovative contribution to classical scholarship with this history of the Roman Empire, published in two volumes in 1845 and 1850. Applying a scientific method of analysis to the study of ancient history, he organises the information chronologically in tables, demonstrating the connection between different spheres at various phases of development of the empire. Volume 2 contains appendixes to the first volume including genealogical tables of the emperors and of the Kings of Persia, indices for the authors (including abstracts from selected works), imperial documents, and an index of Christian bishops. Among his sources are chronicles, law codes, medals and coins, and classic literature, covering over five hundred years of the Roman Empire. The second volume also begins with the death of Augustus, but extends the chronological scope further, to the death of the Byzantine Emperor Heraclius in 614 CE.

Cambridge University Press has long been a pioneer in the reissuing of out-of-print titles from its own backlist, producing digital reprints of books that are still sought after by scholars and students but could not be reprinted economically using traditional technology. The Cambridge Library Collection extends this activity to a wider range of books which are still of importance to researchers and professionals, either for the source material they contain, or as landmarks in the history of their academic discipline.

Drawing from the world-renowned collections in the Cambridge University Library, and guided by the advice of experts in each subject area, Cambridge University Press is using state-of-the-art scanning machines in its own Printing House to capture the content of each book selected for inclusion. The files are processed to give a consistently clear, crisp image, and the books finished to the high quality standard for which the Press is recognised around the world. The latest print-on-demand technology ensures that the books will remain available indefinitely, and that orders for single or multiple copies can quickly be supplied.

The Cambridge Library Collection will bring back to life books of enduring scholarly value (including out-of-copyright works originally issued by other publishers) across a wide range of disciplines in the humanities and social sciences and in science and technology.
