## CAMBRIDGE LIBRARY COLLECTION

*Books of enduring scholarly value*

### History

The books reissued in this series include accounts of historical events and movements by eye-witnesses and contemporaries, as well as landmark studies that assembled significant source materials or developed new historiographical methods. The series includes work in social, political and military history on a wide range of periods and regions, giving modern scholars ready access to influential publications of the past.

### **The Art of War in Italy 1494-1529**

First published in 1921, this book examines the changes in styles of warfare between the medieval period and the Renaissance. Frederick Lewis Taylor links the transformations in intellectual and cultural life in this period with contemporary military innovations. His discussion focuses on the Italian wars between Spain, France and the Netherlands between 1494 and 1529, both because the aggression of competing states in a small area led to frequent wars, and because the influence of the Renaissance was strongest in its birthplace, the Italian peninsula. Taylor traces the stages in the development in all aspects of military operations, and also investigates the development of a theoretical study of war. His work remains one of the most complete reviews in English of the Italian wars of this period, and explains the origins of the style of warfare which would dominate Europe in the following centuries.

Cambridge University Press has long been a pioneer in the reissuing of out-of-print titles from its own backlist, producing digital reprints of books that are still sought after by scholars and students but could not be reprinted economically using traditional technology. The Cambridge Library Collection extends this activity to a wider range of books which are still of importance to researchers and professionals, either for the source material they contain, or as landmarks in the history of their academic discipline.

Drawing from the world-renowned collections in the Cambridge University Library, and guided by the advice of experts in each subject area, Cambridge University Press is using state-of-the-art scanning machines in its own Printing House to capture the content of each book selected for inclusion. The files are processed to give a consistently clear, crisp image, and the books finished to the high quality standard for which the Press is recognised around the world. The latest print-on-demand technology ensures that the books will remain available indefinitely, and that orders for single or multiple copies can quickly be supplied.

The Cambridge Library Collection will bring back to life books of enduring scholarly value (including out-of-copyright works originally issued by other publishers) across a wide range of disciplines in the humanities and social sciences and in science and technology.

## NOTE

I WISH to thank Mr C. W. Previt -Orton, M.A., Fellow of St John's College, for much advice and encouragement in the preparation of these pages.

I also wish to place on record my indebtedness to the Acton Library. Owing to the generosity of Viscount Morley this valuable collection of the books of our late Regius Professor is now housed at the University Library, and but for its presence there the greater part of my essay could not have been written at Cambridge.

F. L. T.

Ardet inexcita Ausonia atque immobilis ante;  
pars pedes ire parat campis, pars arduus altis  
pulverulentus equis furit; omnes arma requirunt.

*Aeneid* VII. 623-5.
