CONTENTS

	PAGE
INTRODUCTION	I
GENERAL	I
Vegetative Structure	I
Sexual Reproduction	2
Spores and Spore Mother-cells	3
Accessory Spores	4
Morphology of the Spore	4
Classification	5
SAPROPHYTISM, PARASITISM AND SYMBIOSIS	6
SAPROPHYTISM	7
Saprophytes on Wood	7
Saprophytes on Soil	7
Coprophilous Fungi	8
Fungi on Fatty Substrata	10
Fungi producing Alcoholic Fermentation	10
Soot Fungi	12
PARASITISM	13
Facultative Parasites	13
Obligate Parasites	14
SYMBIOSIS	16
Endotrophic Mycorrhiza	16
Exotrophic Mycorrhiza	18
SPECIALIZATION OF SAPROPHYTISM AND PARASITISM	20
Heteroecism	22
Biological Species	22
REACTIONS TO STIMULI	27
Chemotropism	27
Hydrotropism	29
Aerotropism and Osmotropism	30
Phototropism	30
Phototaxis	31
Formative Influence of Light	31
Geotropism	31
ASCOMYCETES	34
GENERAL	34
The Ascospores	34
The Ascus	35
The Ascocarp	38
The Paraphyses	38
The Peridium	39
Alternation of Generations	39
Early Investigators	40

CONTENTS

	PAGE
Cytology	40
The Fusion in the Ascus	41
Fertilization	41
Development of the Ascus	42
Meiosis	43
The Third Division in the Ascus	44
Chromosome Association	45
The Theory of a Single Nuclear Fusion	45
The Significance of the Fusion in the Ascus	47
Pseudopogamy	48
Spore-Formation	48
Phylogeny	49
PLECTOMYCETES	55
PLECTASCALES	56
Endomycetaceae	57
Saccharomycetaceae	62
Gymnoascaceae	66
Aspergillaceae	68
Onygenaceae	76
Elaphomycetaceae and Terfeziaceae	77
ERYSIPHALES	78
Erysiphaceae	79
Perisporiaceae	90
Microthyriaceae	91
EXOASCALES	91
Exoascaceae	93
DISCOMYCETES	95
PEZIZALES	100
Pyronemaceae	101
Pezizaceae	107
Ascobolaceae	116
Helotiaceae and Mollisiaceae	122
Celiidiaceae, Patellariaceae and Cenangiaceae	124
Cyttariaceae	125
HELVELLALES	127
Rhizinaceae	128
Helvellaceae	129
Geoglossaceae	131
PHACIDIALES	132
Stictaceae	132
Phaciidaeae	133
HISTERIALES	133
TUBERALES	135
Tuberaceae	135
