CAMBRIDGE LIBRARY COLLECTION

Books of enduring scholarly value

Archaeology

The discovery of material remains from the recent or the ancient past has always been a source of fascination, but the development of archaeology as an academic discipline which interpreted such finds is relatively recent. It was the work of Winckelmann at Pompeii in the 1760s which first revealed the potential of systematic excavation to scholars and the wider public. Pioneering figures of the nineteenth century such as Schliemann, Layard and Petrie transformed archaeology from a search for ancient artifacts, by means as crude as using gunpowder to break into a tomb, to a science which drew from a wide range of disciplines - ancient languages and literature, geology, chemistry, social history - to increase our understanding of human life and society in the remote past.

The Jaulân

Gottlieb Schumacher (1857–1925) was an American-born German civil engineer, architect and archaeologist who was influential in the early archaeological explorations of Palestine. His parents were members of the Temple Association, a Protestant group who emigrated to Haifa in 1869. After studying engineering in Stuttgart between 1876 and 1881, Schumacher returned to Haifa and assumed a leading role in surveying and construction in the region. This volume, first published in 1888 for the Palestine Exploration Fund, contains the results of Schumacher's survey of the Jaulân region of Syria, now known as the Golan Heights. Schumacher provides an engaging and detailed description of the geography and archaeological remains of the region, with the culture, society and customs of both the settled inhabitants and nomadic Bedouin also described. The book is richly illustrated with over 140 figures of ancient artefacts and remains, together with a detailed map of the region.

Cambridge University Press has long been a pioneer in the reissuing of out-of-print titles from its own backlist, producing digital reprints of books that are still sought after by scholars and students but could not be reprinted economically using traditional technology. The Cambridge Library Collection extends this activity to a wider range of books which are still of importance to researchers and professionals, either for the source material they contain, or as landmarks in the history of their academic discipline.

Drawing from the world-renowned collections in the Cambridge University Library, and guided by the advice of experts in each subject area, Cambridge University Press is using state-of-the-art scanning machines in its own Printing House to capture the content of each book selected for inclusion. The files are processed to give a consistently clear, crisp image, and the books finished to the high quality standard for which the Press is recognised around the world. The latest print-on-demand technology ensures that the books will remain available indefinitely, and that orders for single or multiple copies can quickly be supplied.

The Cambridge Library Collection will bring back to life books of enduring scholarly value (including out-of-copyright works originally issued by other publishers) across a wide range of disciplines in the humanities and social sciences and in science and technology.

PREFACE.

THIS work is translated from the *Zeitschrift* of the German Society for the Exploration of the Holy Land. We have to acknowledge with gratitude the permission accorded by the Committee of that Society to translate and reproduce the work with all its original illustrations. It will be found a worthy pendant to Captain Conder's works. The notes are mostly those furnished by Prof. Socin for the original edition. The spelling has been chiefly conformed to the usual practice in the published works of the Fund.

I, ADAM STREET, ADELPHI,
March, 1888.

CONTENTS.

	PAGE
A.—Introduction	1-9
B.—Position, Extent, Limits and Administration of the Jaulân	9-11
C.—The Nature of the Ground, Plants and Animals, Irrigation and Climate, of the Jaulân	11-42
D.—The Inhabitants of the Jaulân	42-61
E.—Roads Communicating with the Jaulân	61-65
F.—Names and Places in the Jaulân, in Alphabetical Order, with the number of Inhabitants over ten years of age	65-273
Index to the Names.	

LIST OF ILLUSTRATIONS.

As the measurements in the illustrations have been made in metres, a scale of metres and English feet is given, showing their proportional values.

FIG.	PAGE
1. Wooden Mortar with Pestle for Pounding Coffee	46
2. Coffee Pot....	46
3. Circassian	58
4. Old Stone Wall Enclosure in Abu Kebîr	66
5. Tribe Marks of the Beni Sakhr	68
6. Greek Inscription at el-Ahmedîyeh	70
7. Nine-branched Candlestick at el-Ahmedîyeh	71
8, 9. Ornament at el-Ahmedîyeh	72
